REPORT ON THE REVENUE ADMINISTRATION, NORTH-WESTERN PROVINCES, FOR THE REVENUE YEAR 1890-91.

No. $\frac{821}{XII-210}$ OF 1892.

FROM

JOHN HOOPER, ESQ., C.S.,

SECRETARY TO THE BOARD OF REVENUE,
NORTH-WESTERN PROVINCES AND OUDH,

To

THE SECRETARY TO GOVERNMENT,
NORTH-WESTERN PROVINCES AND OUDH,
REVENUE DEPARTMENT.

DATED ALLAHABAD, THE 13TH APRIL 1892.

SIR,

Present:

J. R. REID, ESQ., *Senior Member,*
AND
W. KAYE, ESQ., *Junior Member.*

I AM directed to submit, with the usual enclosures, the Board's report on the Revenue Administration of the North-Western Provinces for the year 1890-91, ending with the 30th September 1891.

2. The office of Senior Member was held by the Hon'ble J. J. F. Lumsden, and that of the Junior Member by Mr. J. R. Reid, throughout the year.

3. With effect from the 1st April 1891, a redistribution was made of the Commissionerships of the North-Western Provinces and Oudh. In the North-Western Provinces, by Government Resolution No. $\frac{467}{1-549A.}$, Revenue Department, dated the 20th March 1891, the Jhánsi Division was abolished, and the districts of Jhánsi, Jalaun, and Lalitpur were transferred to the Allahabad Division; the new division of Gorakhpur, consisting of the Gorakhpur, Basti, and Azamgarh districts, was created; and the district of Jaunpur was transferred from the Allahabad Commissionership to the Benares Division. Where statistics for the year 1889-90 or previous years are given in this report, they are the statistics for the divisions as now constituted, which have been tabulated in order to supply the means of comparison with the figures for 1890-91.

4. The divisional reports, which were due in this office on the 1st December 1891, were received on the following dates:—

Gorakhpur ...	27th November 1891.	Benares ...	... 23rd December 1891.
Rohilkhand ...	18th December 1891.	Allahabad ...	... 6th January 1892.
Agra	21st ,,	Kumaun ...	... 21st ,,
	Meerut	22nd January 1892.	

PART I.

Chapter I.—AGRICULTURAL.

SEC. I.—RAINFALL AND HARVESTS. App. C.I.

5. The harvests of the revenue year under report were dependent on the rainfall of the autumn of 1890 and the winter of 1890-91.

The following table gives details of the rainfall during the past agricultural year and the preceding five years:—

Division.	Details from 1885-86 to 1890-91.					
	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.
Meerut	45·7	39·8	44·6	45·1	39·7	44·9
Agra	38·8	29·1	36·6	40·1	24·3	34·0
Rohilkhand	53·6	44·9	40·6	50·0	39·3	47·3
Allahabad	40·3	37·5	40·5	48·9	30·2	42·8
Benares	39·6	50·7	38·7	46·6	42·8	55·5
Gorakhpur...	51·2	51·5	42·2	48·5	54·6	66·8
Kumaun	62·4	50·5	46·5	59·9	67·7	70·5
Average ...	47·4	43·4	41·4	48·4	42·7	51·7

The figures of previous years for the Allahabad, Benares, and Gorakhpur Divisions will be found to differ from those given in former reports, as they have been collated for the now existing divisions. This has also affected the provincial averages.

6. The rainfall in 1890 was exceptionally irregular and ill-distributed. Heavy and incessant rains in June and July were followed by a long break in August, when the monsoon appeared to have ceased; but in September the rains set in again and continued to the end of the month. The heavy downpour in the early part of the wet season caused serious floods in Rohilkhand and the Gangetic Doáb and some of the eastern districts, and everywhere interfered with proper and timely weeding. The crops in lowlands and near the banks of rivers suffered from floods, while those in the uplands were affected by the protracted drought, especially where irrigation was not available. Much of the kharíf sowings having been lost, owing to the excessive rainfall, an unusually large area was put under spring crops, and these were greatly benefited by light rains that fell in January. In the western districts frost in February caused injury to arhar, gram, and peas, while in the following month much damage was done by hail to the standing crops in many villages in the lower Doáb. The rainfall in March was much in excess of the average for that month and did some harm in the eastern districts. The average outturn of the autumn crops was poor and compares unfavourably with 1889. The Director of Land Records and Agriculture reports that the average outturn of rice and cotton may be put, as in the previous year, at 12 annas and 11 annas respectively, 16 annas being taken as a full crop: but that the outturn of maize fell from 12 annas to 9 annas; of the millets and pulses, juár, bájra, urd, &c., from 11 annas to 10 annas; and of indigo from 13 to 12 annas. On the other hand, the outturn of the spring harvest was better for almost all crops than in the previous year. The outturn of wheat, barley, and masur was 13 annas, of gram and peas 12 annas, and of rapeseed and linseed 11 annas. The tobacco and opium crops were less good than in 1890, their outturn being rated at 13 annas and 12 annas respectively. A brief summary of the reports of Commissioners and District Officers on the rainfall and harvests in the respective Divisions follows:—

Meerut Division.—The rainfall was much more abundant in Muzaffarnagar, Bulandshahr, and Aligarh than in the previous year, but the distribution was irregular, and the irregularity was extreme in Bulandshahr, where the fall ranged from 44·10 inches in Khurja to 24·20 in Sikandrabad, and in Aligarh, where it varied from 39·3 inches in Sikandra Rao to 19·5 in Iglas. The monsoon commenced by the end of June, and continued with slight interruptions till the second week of July. Then heavy and incessant rain fell and continued till the second week in August. After this there was a long break, lasting up to the middle of September, which gave rise to much anxiety. In the latter part of September 1890, a timely and heavy fall restored confidence and greatly improved the kharíf outturn and the rabi prospects. Notwithstanding this, the outturn of the kharíf was considerably below the average, all the crops having suffered more or less, Indian corn, indigo, juár, and the latest sown kharíf staples the most. The winter rains were light in all districts except Dehra Dún and Saháranpur. Arhar, wheat, peas, and gram suffered from frost, and oilseeds were seriously damaged by blight.

Agra Division.—The season was not propitious in respect to the distribution of the rainfall over the various parts of each district and its opportuneness. The rains, at the outset, were heavy, and then deficient, ending finally in a saving downfall of a mild, but most acceptable, character. There was frost in March, but still the rabi was extensive and of fair quality. Much of the kharíf had been spoilt. In Muttra the autumn harvest was good, and the spring harvest pretty fair, while the prospects of the future are reported to be good. In Agra a prolonged break somewhat injured the autumn crop, but the spring crop was good. In Farukhabad the rains were very intermittent, and a long break did much harm, benefiting only the canal dues, which swelled accordingly. Advances were given for the rabi, and a large area was sown with good results. Much the same account is given of the rainfall and crops in Mainpuri, Etáwah, and Etah. In all three districts there was frost in March which did harm.

Rohilkhand Division.—Taking the division as a whole, the rainfall of the year was sufficient, but was unevenly distributed, causing in many districts, either by its absence

or its ill-timed abundance, damage to the crops. In Bijnor the rain began late and its distribution was unequal; in Dhámpur tahsíl it was so excessive as to be injurious. Towards the end of July and the beginning of August the excessive rain and the long break which followed it threatened for the time the prospects of the kharíf, but a timely fall in the middle of September saved the crops. In spite of the heavy winter rains and continuous fogs, the rabi harvest was above the average, and the outturn was held by some of the oldest resident zamíndárs to be the best they could remember for 20 years. In Moradabad the rains were pretty evenly distributed, except in tahsíls Amroha and Bilari; but the excessive downpour from the 9th July to 13th August injured the kharíf crops, many fields bordering the rivers being submerged and the seed rotting. The showers at the beginning of the calendar year 1891 greatly benefited the rabi, which on the whole gave a fair outturn. The rains in Budaun were neither uniform nor regular. They were unusually heavy in July, and were interrupted by an extremely long break in August, which lasted till the middle of September. The fall during the latter part of that month improved the state of the crops; but the damage done in lowlying riparian tracts was considerable. The winter rains were ample; and, but for damage done by frost to tobacco and arhar, the outturn of the spring crop would have been a full one. In Bareilly, a long break, which followed the heavy downpour in August 1890, caused grave anxiety, not only as regards the prospects of the kharíf crops which had escaped the floods or had been subsequently sown, but also as to the possibility of proper rabi ploughings. Towards the end of September rain fell; but, owing to the heavy floods of July 1890 and the subsequent drought, the rice and Indian corn crops were in many tracts destroyed. Many of the fields were subsequently resown with bájra and úrd; but, notwithstanding the excellent outturn of these later crops, the kharíf harvest on the whole was an inferior one. The winter rains were sufficient, but unusually severe frosts in February caused considerable damage, especially to arhar, peas, and gram. In Sháhjahánpur the rainfall, which exceeded the average of previous years, was generally well distributed. The rains commenced in the beginning of June, and continued with occasional breaks till the end of September. The Rámganga floods, however, were specially injurious in the lowlying tracts in the Jalalabad tahsíl, and in this portion of the division the destruction of crops was most serious. The heavy rains in March are said to have injured the wheat and other rabi crops: frost also did some damage. In Pilibhít the rainfall, though slightly above the average of the previous year, was not well distributed, especially in the southern portion of the district. The heavy rains caused damage to the rice crops, and the subsequent break had the effect of drying up whatever kharíf crops still remained on the ground. The winter rains, however, were ample; and, despite slight damage done by westerly winds and frost, the rabi was a good one.

Allahabad Division.—The rains set in fairly early; and, though irregular, were on the whole well distributed. During the first part of the rainy season the fall was excessive in some districts, interfering to some extent with sowing operations and causing damage to the crops in lowlying lands. A long break in August occasioned some apprehension as to the security of the kharíf crops; but the rains again set in about the middle of September and the break proved in some degree beneficial, especially to the cotton, and it allowed of weeding for kharíf and ploughing for rabi. The winter rains failed entirely in Cawnpore, and the fall in Fatehpur, Hamírpur, and Bánda was insufficient. In the Allahabad district the rainfall at the end of January was general and well distributed. In Jhánsi the fall, though insufficient, was timely: and in Lalitpur and Jalaun the winter rains proved very beneficial. The rabi crops were much injured in many places by hailstorms.

Benares Division.—Except in Jaunpur, the rainfall of 1890 was much above the average of previous years, and in some districts, especially in Mirzapur, Gházipur, and Ballia, the heavy and incessant showers caused considerable damage. In Benares, Jaunpur, and Gházipur the early winter rains improved the rabi crops; but the later falls did more harm than good. The year is described as a decidedly bad one. The

excessive and incessant rains seriously injured nearly all the kharíf crops. In the Ballia district, the kharíf in the lowlands was almost totally destroyed by the overflow of the Ganges and the Ghogra; and, though the crops on the high lands escaped the floods, they suffered from the continuous downpour. Sugarcane, arhar, and indigo were also damaged by floods in Gházipur and Ballia; but in Benares the cane crop was excellent. The rice crop, on the other hand, was in some districts good. The greater part of the late rice in Gházipur perished, and the early rice suffered severely; but in Jaunpur the yield is reported to have been a bumper one, in Benares it is described as "the best for ten years," and in Mirzapur it was on the whole a good one, as well as in the high lands in Ballia. In Gházipur the rabi sowings were retarded by the heavy and incessant rainfall, and the outturn was materially affected. The Collector of Mirzapur reports that the hailstorms of January and February, and the heavy rains in the beginning of the year, completely destroyed a large area of poppy cultivation.

Gorakhpur Division.—The seasons were unfavourable throughout the division. The rainfall was excessive, and all three districts suffered seriously from floods. The kharíf harvest was deficient, especially the early kharíf, and the crops in much of the land near the Ghogra and its branches were destroyed. The rabi in Azamgarh was indifferent, as ploughings were late, and the crops were damaged by rain in February. The rabi crops in the Gorakhpur district suffered from inopportune winter rains, and yielded on the whole not more than an average outturn. In Basti the rabi harvest is reported to have been good, except in the southern part of the district, where it was damaged by a severe hailstorm.

Kumaun Division.—The rainfall of the year, which commenced on the 1st June 1890, was generally above the average. In Kumaun the monsoon fall was unusually heavy and, except at Haldwani, heavier than in the year immediately preceding, which was itself an abnormally wet season. Winter rains were abundant, and their general distribution so favourable that the harvests were excellent. In Garhwál the fall was not so timely as regards the kharíf harvest, which, though a vast improvement on that of 1889, was somewhat light; the winter rain was, however, seasonable and sufficient, and the rabi harvest of 1891 was consequently an excellent one. In the Eastern and Central Tarái the monsoon was heavy: in the Western Tarái moderate, but the distribution was somewhat unsuitable. At the end of July there was a downpour of crushing force, which resulted in disastrous floods. And this was followed by a prolonged break, in consequence of which the crops which had survived the floods were injured by drought: the autumn harvest was therefore somewhat light. The winter rains, however, were propitious, and the yield of the spring crops was good.

7. The following summary of the character of the season of 1891, and the prospects of the current year, is taken from the halfyearly Agricultural Report of the Director of Land Records and Agriculture :—

Kharíf season of 1891.—During the first week of June there were some scattered showers; but, except in the Gorakhpur Division, these falls were everywhere very light. During the next two weeks the sky remained quite clear. Towards the close of June the rains again set in, and light showers continued to fall throughout the whole of July. In August the rains came in torrents, submerging the lowlands and drowning the plants over large areas. In September the rain, though not extraordinarily heavy, was generally in excess of the normal fall for that month. In the early part of the season all crops more or less suffered from drought, and in the latter part crops on lowlands suffered much from floods and inundations. But over the greater portion of the province, with the exception of cotton, the crops were good and the yield of juár, bájra, and other millets in many districts exceptionally large. Sugarcane has given good results, and the arhar crop should prove large as in the winter it entirely escaped frost. Taking 16 annas to denote a full average condition, the following table shows the condition of the present and preceding year's kharíf crops, exclusive of arhar

and sugarance, the results of which were not known when the District Officers submitted their reports :—

	1890.	1891.
Rice	12	11
Maize	9	10
Juár	10	12
Bájra	10	12
Mandua, kodon	12	12
Urd, mung, moth	11	12
Cotton	11	8
Indigo	12	13

SEC. II.—HAILSTORM AND FLOODS.

8. The districts of Allahabad, Cawnpore, and Jalaun were visited by severe hailstorms in February and March 1891, and very serious damage was caused to the standing crops. In Allahabad a large number of villages in the trans-Jumna and Doába parganas suffered from hailstorms towards the end of February, and it was found necessary to grant remissions and suspensions of revenue, amounting to Rs. 18,360 and Rs. 9,931 respectively, on account of the injury caused. In Cawnpore there were two falls of hail, one on the 22nd February and the other on the 12th March. The damage done by the earlier storm was confined to a few villages ; but the second storm partially or wholly destroyed the ripening crops in 469, villages, covering an area of 32,477 acres, and the remissions of revenue sanctioned in consequence amounted to Rs. 40,328. Jalaun also suffered severely from the storm of the 12th March, which passed over all the parganas except Orai, and caused extensive injury as the crops were all ready for the sickle. The remissions of revenue for damage by hail in Jalaun amounted to Rs. 32,135. In the east of the province a good deal of damage was caused by hail in Basti and Mirzapur. In Basti, especially, the injury to the poppy crop is reported to have been considerable ; but in neither district was the loss so serious as to require relief in the form of suspension or remission of revenue. The crops in 3 villages in Etáwah and 14 in Pilibhít were sufficiently injured to call for remissions and suspensions of revenue, which were duly granted. In other districts, where hail fell, no serious harm was done.

Flights of locusts passed over many districts, but fortunately did not seriously injure the crops, except in Jalaun and Jhánsi and a few villages in Hamírpur. In all three districts it was the kharíf that was damaged by swarms of locusts that appeared in October 1890. Suspensions and remissions of revenue were found necessary in the villages that suffered severely, but the relief granted in this way did not amount to a large sum. In some villages of the Atrauli tahsíl of Aligarh, the young indigo plant was completely eaten up by locusts, and had to be resown.

The serious and extensive inundations in some districts which resulted from the heavy rains in 1890 have been referred to in paragraph 6 above and their effect on the harvests generally noted. In Muzaffarnagar many villages in the Jansath and Muzaffarnagar tahsíls were badly flooded, and the Collector found it necessary, with the concurrence of the canal officers, to cut the canal and rájbaha banks in order to allow the flood water to escape. Measures to improve the drainage of this district are being undertaken by the Irrigation Department. Flooding due to imperfect drainage is also reported in Bulandshahr, and the Collector states that the drainage projects which are being carried out are insufficient. In Aligarh the kharíf in some villages in tahsíls Khair and Iglas suffered so severely from inundations in the rains of 1890 that it became necessary to remit Rs. 7,320-8-0 of land revenue. In all three districts, Muzaffarnagar, Bulandshahr, and Aligarh, the drainage question is an important one, and the Board would urge the necessity for pressing on the drainage operations that have been undertaken.

In Farukhabad there were considerable floods along the Ganges and the Rámganga, and the lands in more than half the villages of the Aligarh tahsíl were inundated. There were, fortunately, no losses of human lives or of cattle, but the damage to crops was considerable. Advances amounting to over Rs. 27,000 were made to assist the people in purchasing seed for the rabi sowings. Floods in September 1891 are reported to have destroyed the kharíf crops in several villages in the Fatehpur Sikri tahsíl of the Agra district. The effects of these floods will be noted in the report for the current revenue year.

In Sháhjahánpur, some 20 villages along the banks of the Rámganga suffered serious injury from floods in the rains of 1890. Nearly all these villages had been visited with heavy floods in the previous year, and they were again flooded in the rains of 1891.

The effects of the floods of 1890 on the kharíf harvest in Bareilly have been referred to in paragraph 6 above.

In the Cawnpore district the lowlying lands along the Ganges were submerged by the rising of the river in August 1890, and injury was done to the kharíf crops, to houses, and to the Oudh and Rohilkhand Railway. Portions of the city were flooded, and many houses were washed down. Measures had to be taken for the temporary relief of the poor, who had been rendered homeless. The Municipal Board voted a sum of Rs. 500 for this purpose, which was supplemented by private and spontaneous subscriptions.

The injury caused to the crops by the floods of 1890 in Gházipur and Ballia has been already referred to. In Ballia the Ghogra is reported to have risen to an unprecedented height. Some human lives were lost, and a good many cattle drowned; the destruction of houses and property was great; and many of the people in the inundated tracts were rendered entirely destitute. A charitable Muhammadan gentleman, Haji Niamat Ali, supplied food to a number of the destitute, and the Collector, Mr. Rustomji, obtained subscriptions from the well-to-do, with which he was enabled to alleviate the distress of the people. The Maháráni Sarna Mai of Kasim Bazár and Sir Radha Prasad Singh, Bahádur, K.C.I.E., of Dumraon, each subscribed Rs. 500. A special grant of takávi was made, and advances to the amount of Rs. 18,450 were given.

The effect of the floods of 1890 on the harvests of the Gorakhpur Division has been mentioned above. In the Gorakhpur district, besides the damage to the crops, the soil in some of the inundated tracts was injured by the deposit of sand. The failure of the kharíf and the indifferent outturn of the rabi, combined with the high price of food grains, produced some distress among the poorer classes; and many, who were unable to find employment, were reduced to begging. Takávi advances were freely given when the floods subsided, the total sum advanced amounting to Rs. 24,510. It was not found necessary to remit or suspend rent or revenue, but the Collector judiciously refrained from pressing for revenue in those tahsíls which were most affected, and the realization in full of the Government demand in tahsíls Hata, Deoria, and Bansgaon was thus delayed beyond the end of the revenue year. In Basti also it was found necessary to give takávi advances to the extent of Rs. 10,000, and the Collector found work for the poorer classes on the district roads. In Azamgarh poorhouses were started at Sagri and Maháráj ganj in order to relieve the distress caused by the floods, and a considerable amount was distributed in advances to zamíndárs and cultivators. Fortunately in 1891 all three districts in the Gorakhpur Division escaped floods; and distress has disappeared. The considerable damage caused by the heavy rains of 1890 to communications in the hills and to canal works in the Bhábar and Tarái was referred to in paragraph 7 of last year's report. The cart road to Naini Tal through Kálikhán has had to be finally abandoned, and a new road constructed from the Brewery on the right bank of the Ballia. In the Tarái much land on the banks of the rivers was washed away, and many of the cultivators were flooded out of their houses. Much help had to be given to tenants on the Government estate for purchase of seed grain and cattle and for rebuilding houses.

SEC. III.—HEALTH.

9. The public health in the western divisions, Meerut, Rohilkhand, Agra, and Kumaun, was, on the whole, fairly good, although in some of the districts there were severe outbreaks of cholera. In the central and eastern districts, those of the Allahabad, Benares, and Gorakhpur Divisions, the year was decidedly unhealthy, and cholera epidemics caused considerable mortality, especially in the Allahabad and Benares Divisions. Small-pox was less prevalent than during the previous year, and was generally of a milder type. Subjoined is a summary of the divisional reports:—

Meerut Division.—The public health was, on the whole, decidedly better than in 1889-90. The mortality from fever and small-pox was smaller. But there were

severe outbreaks of cholera in parts of the Muzaffarnagar and Meerut districts. In Kairana (Muzaffarnagar) an epidemic of cholera suddenly broke out in August, and in the course of a month killed nearly 600 of the inhabitants. A panic set in, and a number of the townspeople fled to other parts of the district, carrying the disease with them. The total number of deaths from cholera in Muzaffarnagar was 1,722. In the Meerut district there were 666 cholera deaths, chiefly in the town of Baraut and mostly in the month of September.

Agra Division.—The year was comparatively a healthy one. In Etah and Farukhabad cholera assumed something of an epidemic form, and in Mainpuri and Etáwah there were sporadic cases. Small-pox accounts for a smaller percentage of deaths, and Etah especially, where last year the mortality from this disease was very great, has this year enjoyed almost complete immunity. During the year the Vaccination Act has been extended to all the Municipalities in the division, which have accepted its provisions voluntarily and with no demur. This liberality of sentiment on the part of these bodies is, as the Commissioner remarks, highly creditable to them, and it is to be hoped that good results will ensue in a marked diminution of sickness. There was no improvement apparent in the mortality from fever. The improvement in the health statistics of Agra is attributed in great measure to the sweet water supply, the benefits of which are at present confined to the city; but its extension to cantonments, the civil station, and other places is at present engaging the attention of the Municipal Board, who are alive to the necessity of taking action at a very early date.

Rohilkhand Division.—The year, on the whole, was a healthier one than its predecessor. Cholera, which broke out in Bareilly in July 1890, retained its virulence till October, and 1,026 deaths occurred during the latter month. With the advent of the winter the disease died out, but cholera in the cold weather is reported to be becoming an unpleasant feature in the sanitary history of Bareilly. This disease also prevailed more or less in all the districts of the division. Both in Budaun and in Pilibhít there was a decrease in the prevalence of malarial fevers. In Sháhjahánpur there was a marked increase in the number of deaths from cholera. This disease was most prevalent in that part of tahsíl Jalalabad lying south-west of the Rámganga. The Collector of Bareilly is the only officer who has noticed the subject of vaccination. The Act has now been introduced in the city, and the Collector anticipates a considerable increase in the number of vaccinations.

Allahabad Division.—In the case of the five old districts of this division the year was an unhealthy one and was marked by the prevalence of cholera in an epidemic form during portions of the hot weather and rains. In Allahabad cholera was very severe during the hot weather months and accounted for 7,428 deaths out of a total of 8,156 for the whole year from this disease. There was also a bad outbreak in May among the European troops who were sent into camp in Rewah territory. While, however, the disease raged in the interior of the district, the city enjoyed comparative immunity, which the Collector is inclined to attribute to the new water supply. The other districts of the old Allahabad Division also suffered severely. Jhánsi and Jalaun were almost entirely free from cholera, while the mortality from it in Lalitpur was slightly in excess of that in the preceding year. Except in Fatehpur, the mortality from fever was less than in 1889-90, but still high. Small-pox cases were fewer.

Benares Division.—The year was a very unhealthy one. The number of deaths from cholera rose from 5,142 in the previous year, to 20,914 in the year under report. The number of deaths in Benares, if the figures of the previous year are correctly reported, increased tenfold. Except in Gházipur and Ballia, small-pox was less virulent, and the number of deaths was much smaller during the year than in 1889-90. In Gházipur, however, the disease is reported to have been of a virulent type, and both in this district and Ballia the number of deaths from it compared with the previous year shows a considerable increase. The total number of deaths attributed to small-pox is somewhat larger than in the year before.

Kumaun Division.—In Kumaun the public health was unusually good; in Garhwál there was more sickness than ordinarily, principally in the shape of malarial fever; in the Tarái the year was a fairly healthy one.

Gorakhpur Division.—The health of the people was indifferent. Fever and bowel complaints prevailed north of the Ghogra, and cholera south of it.

SEC. IV.—CATTLE DISEASE.

10. There was less cattle disease than usual in the Meerut Division, except in low-lying inundated villages, where there was some foot and mouth disease.

In the Agra Division, there was no unusual mortality among cattle. The fodder supply was ample, except in some of the flooded villages.

As compared with the previous year, the number of cases of foot and mouth disease, rinderpest, and dysentery reported from Pilibhít is small; but the Collector distrusts the figures furnished by the police and believes that the mortality from foot and mouth disease is understated. At any rate, there seems to have been less cattle disease than in the previous year. In the other districts of the Rohilkhand Division there was hardly any mortality of note except in Budaun, where, however, the total number of deaths is reported to have been 111 less than in the previous year.

In the Allahabad Division the condition of the cattle was generally good. Cattle disease of the ordinary type was more or less prevalent, but there was no epidemic. Except in Jhánsi, the fodder supply appears to have been generally sufficient.

There was some disease in Ballia and Mirzapur, and, in the latter district, deaths were numerous. With reference to this Mr. Crooke writes—"The number of deaths "has gone down to a half of that in last year. The numbers look large, but south "Mirzapur is the refuge of enormous herds of wretched underfed beasts from the "Gangetic valley. There is no attempt made to isolate them when epidemics occur, and "the mortality is naturally very large. The value of the animals is, however, so small "that the loss is not serious." In Jaunpur the Collector reports that there were many deaths from want of fodder owing to the late rains, and some deaths from the use of poisonous fodder. Fodder is reported to have been just sufficient in Ballia, and somewhat scarce before the rains fairly set in in Benares. In Mirzapur, the Collector states that large quantities of coarse, indifferent fodder were grown in the jungles; but the produce of millet fodder and chaff was small. Hence when the rains were delayed, the cattle suffered heavily in some places.

In every district of the Kumaun Division the cattle suffered less, whether from foot or mouth disease, rinderpest, or dysentery, than in the preceding year. The mortality was, however, very considerable. The Commissioner deplores the extraordinary apathy of the people in the adoption of preventive measures; but he notes that they are not altogether blind to the importance of one of the principal remedial measures—the prohibition to the movement of cattle from infected into healthy tracts. He reports that it was at the request of the villagers that the Senior Assistant Commissioner in Garhwál, with the concurrence of the Senior Assistant Commissioner in Kumaun, closed the district forests and grazing grounds bordering on the Kumaun district against the tainted herds of the neighbouring Kumaun tracts. The Kumaunis have sought in every way possible to evade the prohibition and to induce the Commissioner to set it aside, but without success.

There was no cattle disease of an epidemic form in any district of the Gorakhpur Division during the year under report. The condition of the cattle was good and there was no scarcity of fodder.

SEC. V.—PRICES.
E.—Miscellaneous.
App. I.

11. With the sanction of Government, a slight alteration has been made in the headings of the table of prices in Appendix E-I, so as to indicate, more exactly than before, the periods for which prices are compared. The table enables a comparison to be made between the prices of the principal food grains on the 1st January 1891 and the 1st January 1890: it compares the prices of the millets, juár and bájra, on the 1st August with those at the beginning of the year, and gives the prices of the chief rabi staples for the 1st April and the 1st November. Whichever set of figures is compared, it will

be seen that food grains were exceptionally dear. The prices of all of them, except rice, were considerably higher at the beginning of 1891 than they were a year before. The high rates for wheat, barley, and gram, with which the year opened, were on the whole maintained, though at the end of the year there was a tendency to a fall; while bájra and juár, owing, no doubt, to the lateness of the monsoon, had become by the 1st August very considerably dearer than they were on the 1st January.

In paragraph 7 of the Government Review of last year's report it was noted that the price prospects at the close of the revenue year ending on the 30th September 1890 were unfavourable, owing to an exceptionally bad kharíf then on the ground, and to the fact that the spring crop of 1890 had been, with the exception of wheat, inferior to that of 1889. The character of the seasons in 1890-91 was not such as to improve the prospects thus forecasted; while the check on exports, effected by the comparatively high rate of exchange in 1889-90, ceased, and large quantities of grain were shipped to Europe in addition to the supplies which the province contributed in aid of the wants of Rájputána and Madras. The rise in the prices of the coarser grains has been a serious matter to the poorer classes, which include the mass of the population, especially in some of the eastern districts, where the spring harvest was indifferent, and in those portions of the Agra Division which have suffered from a period of agricultural depression. The remarks of the Commissioner, Mr. Neale, on the effect of high prices on the population of the last mentioned tracts are of sufficient general interest to be quoted in full. He writes—"Owing to various causes, prices have ranged higher than in the previous year, "chief among these causes being the poor outturn of the previous year's harvests, the "late setting in of the rains, which retarded the kharíf sowings, and the large exports "due to scarcity in Rájputána and Madras and the famine in Russia. As long as "railways and other public enterprises are being carried out, the landless population "can find food even at these high prices. The stress really tells most heavily upon "whatever portion of the agricultural community may happen from local causes to be "depressed. These have no resource but to abandon their homes and their means of "livelihood; they must either fly or die. Thus in cases such as those of some parts of "Etah and Mainpuri and Farukhabad the population sinks and its material strength "disappears with strange rapidity, so that it becomes doubly necessary to alleviate all "real fiscal burdens of an agricultural character with the utmost promptitude and "generosity. Deliberation is no longer so commendable as it was when grain sold at a "rupee for half a maund."

The following is a summary of the remarks on the subject of prices in the reports of the other districts and divisions.

In the Meerut Division there was a general rise in the prices of the principal food grains as compared with 1889-90, itself a year of higher prices than 1888-89. The rise is attributed to the heavy exports of the valuable grains, and the poor outturn of the coarse kharíf grains which form the staple diet of the bulk of the people.

In all the districts of the Allahabad Division prices ruled higher than in 1889-90, especially in the case of those staples which form the food of the mass of the population and are only indirectly affected by the export trade. Prices did not follow a precisely similar course in every district, owing to local causes which are reported to have operated in addition to those that affected the province generally. In Allahabad, prices were higher in consequence of the unfavourable character of the rainy season, the heavy hailstorms, which caused great injury, and the floods of 1891. But, except in the case of bájra and juár, they were easier at the close of the year than at the end of 1889-90. In Cawnpore, also, the dearness of grain is said to have been the consequence of poor harvests, as well as of the tightening of the markets owing to the delay in the rains and to the brisk export trade in wheat. In Hamírpur, prices were very high, but, as the Collector explains, they are the prices of the isolated town of Hamírpur and are not a fair index of the general prices in the district. In Bánda, where the crops were on the whole good, the Collector is inclined to attribute the rise in prices to the large exports from the district.

The Collector of Jhánsi remarks that the approximation in the price of all kinds of grain shows that the year must have been one of considerable hardship to the poor classes. Local rates for grain have, owing to the railway, ceased to exist. Heavy exports of wheat having depleted stocks, the price of this staple rose, and, in consequence, the prices of the coarser grains.

In Jalaun, there was no scantiness in the produce of the district; but the lateness of the rains caused prices to rise, and the rise was kept up by large exports to Cawnpore and Gwalior. The high prices in Lalitpur are attributed to the heavy exports to Bombay from Malwa and from the district itself, as well as to the general uneasiness caused by the delay in the setting in of the rains.

In most of the Rohilkhand districts the prices of food grains were high. This is attributed in a great measure to exports and also to the apprehension of a failure of the rains. In Sháhjahánpur, in February and March, the prices were almost at famine pitch, but after the rabi was cut they fell considerably. In Bareilly there was a combination of city grain dealers in March, which threatened at one time to assume unpleasant proportions and to cause much distress to the poorer classes. With the assistance, however, of Lala Banke Lal, Treasurer and Municipal Commissioner, the Collector was enabled to break down the combination.

In the Benares Division prices ruled high and pressed much on the labouring class.

In the Gorakhpur Division prices rose very considerably in the months of June, July, and August, when there were apprehensions of a famine. The greatest fear of scarcity was entertained in Azamgarh, and in this district grain was dearest. Since the opening of the Bengal and North-Western Railway line through the trans-Ghogra section of this division, prices have risen everywhere.

In the Kumaun Division prices ruled high throughout the year; and, as harvests were good, large profits accrued to agriculturists. The Commissioner reports that the people, warned by their recent sufferings, when there was a failure of crops after they had sold out their reserves of grain under the temptation of high prices, were careful to hold considerable stocks in reserve.

Chapter II.—FINANCIAL.

SEC. I.—INTRODUCTORY.

12. The total receipts from the several sources of income treated of in this report amount to Rs. 5,86,57,380 as against Rs. 5,79,10,416, showing an increase of Rs. 7,46,964. The details are given in the following table:—

Division.	Sources of income.	Receipts in 1889-90.	Receipts in 1890-91.	Increase.	Decrease.
		Rs.	Rs.	Rs.	Rs.
1	Fixed land revenue current demand ...	4,23,05,886	4,43,39,599	20,33,713	...

Kumaun	5,06,894	5,02,634	4,260	95·9	99·1
Provincial ...	44,975,872	4,43,39,599	6,36,273	98·9	98·6

The increase in the aggregate demand over that of the previous year was Rs. 21,86,425. As was explained in paragraph 17 of last year's report, this large increase consists mainly of the enhancements of revenue at the regular revision of settlement in Saháranpur, Bulandshahr, Gorakhpur, Basti, and Jalaun which were brought on the roll at the end of 1889-90. The percentage of the collections to the demand was 98·6, or ·3 less than that of the previous year. The balance, however, includes nominal items which will eventually be removed from the accounts. When these are eliminated, the percentage of collections to demand is as shown in the following table :—

Divisions.	Percentage of collections to demand after deducting nominal items.	
	1890-91.	1889-90.
Meerut	99·94	99·97
Agra	96·17	96·77
Rohilkhand	99·87	99·81
Allahabad	99·31	99·35
Benares	99·91	99·72
Gorakhpur	99·14	99·98
Kumaun	99·16	96·07
	98·98	99·12

The total balance is thus classified :—

	Rs.
(1) Recoverable	2,89,226
(2) Doubtful	1,35,087
(3) Irrecoverable	34,307
(4) Nominal	1,77,653
Total ...	6,36,273

Details of the nominal and irrecoverable balances will be found in Appendix E-II. The important items under these heads are remissions for damage caused by hailstorms, floods, and locusts, and reductions of revenue for diluvion or on account of the revision of assessment of portions of the districts of the Agra Division.

Of the doubtful balance of Rs. 1,35,087, no less than Rs. 1,32,968 belong to four districts of the Agra Division. This amount has either been proposed for remission, or is held under suspension pending the submission of proposals for reduction of revenue in connection with the revision of assessment which is being carried out in the distressed

tracts of Farukhabad, Mainpuri, Etáwah, and Etah. The reductions of revenue which have been sanctioned, or proposed for sanction, in the districts of the Agra Division are here noted for comparison with the sums entered as "doubtful" or "nominal" in columns 7 and 9 of Appendix A-I, the divisional total of which is Rs. 1,81,385 :—

	Rs.
(1) Muttra—Sanctioned during the year 1890-91	7,471
(2) Agra „ „ „	24,987
(3) Farukhabad—(*a*) Sanctioned during the year 1890-91	34,435
(*b*) Subsequently sanctioned	26,851
(4) Mainpuri—Sanctioned after the close of 1890-91	11,883
(5) Etáwah „ „ „	9,005
(6) Etah—(*a*) Sanctioned during the year 1891-92	28,261
(*b*) Proposed by Settlement Officer, not yet sanctioned	26,075
Total ...	1,68,968

The revision of assessment in Agra and Etáwah has been completed. A few villages in Muttra and Farukhabad and a larger number in Mainpuri, which have been inspected this cold weather, have still to be reported on. The Settlement Officer has finished the inspection and assessment of the Etah villages, and his last report is now under the consideration of the Commissioner.

Rupees 1,07,912 of the recoverable balance were collected shortly after the close of the year. This left Rs. 1,81,314 outstanding, the details of which, according to the classification in Appendix E-II, are as follows :—

	Rs.
Under recovery	7,664
Due from estates under attachment	1,17,183
„ Chaudhri Ráj Kumar of Bishangarh	10,509
„ mahâls proposed for farm, transfer, sale, &c.	4,339
„ distressed villages	26,748
„ defaulters residing in other districts	1,796
To be adjusted by refund from excess collections in 1889-90	470
Due to acquisition of land for which compensation has not yet been settled ...	57
Suspensions on account of damage done by locusts, floods, hail, &c.	12,548
Total ...	1,81,314

If the district details given in Appendix A-I are examined, it will be seen that the whole of the realizable demand was collected in the following twelve districts :—Dehra Dún, Saháranpur, Muzaffarnagar, Meerut, Bijnor, Moradabad, Fatehpur, Mirzapur, Jaunpur, Basti, Garhwál, and Tarái. To these may be added Bulandshahr and Benares, as the small balances entered as doubtful against these two districts are, in fact, nominal and irrecoverable. It will be observed that the list of districts with a clean balance sheet includes three—Saháranpur, Bulandshahr, and Basti—in which the land revenue has been largely enhanced at the recent revision of settlement. If the return is now examined by divisions it will be noticed that in the Meerut Division only one district, Aligarh, shows a real balance, and that not of large amount. The recoverable arrear is Rs. 5,028, of which Rs. 2,541 are due from attached estates, and the rest has either been collected since the close of the year or is in process of recovery. The bulk of the arrears in the province is again in the Agra Division, to which 57·4 per cent. of the total balance and 73·5 per cent. of the realizable balance belong. In this division the balance classed as "in train of liquidation," that is to say, recoverable, amounts to the large sum of Rs. 1,83,605. It is necessary to examine the balance statements in some detail in order to explain why, notwithstanding the liberal remissions and reductions of revenue that have been granted, so large a portion of the realizable demand has remained uncollected.

In Muttra the recoverable balance, Rs. 5,176, is not large, and the greater part of it is due from a few attached estates in the Muttra tahsíl, the assessments of which a special officer has been engaged in revising during the past cold weather.

Of the arrear of Rs. 22,266 classed as recoverable in the Agra district, Rs. 3,590 were held under suspension pending the receipt of sanction to reduction of revenue in

two villages in the Agra tahsíl. Sanction has since been given, so that the real balance is reduced to Rs. 18,676, the greater part of which belongs to estates under attachment in tahsíl Fatehpur Sikri. Some remarks on the condition of this tahsíl will be made later. Here it may be noted, as regards the arrears, that it will probably be found necessary to expunge a portion of them from the accounts, and that the rest may be expected to be recovered in 1891-92.

Of the recoverable balance in Farukhabad, Rs. 3,934 were collected shortly after the year closed, leaving Rs. 8,843 for adjustment. Of this sum nearly Rs. 8,000 were due from the Chaudhri of Bishangarh, a prominent defaulter, to whom reference has been made in previous reports. The Chaudhri's arrears have since been paid, after the sale of a number of his villages had been sanctioned. The actual balance in Farukhabad has thus been reduced to less than Rs. 1,000.

The recoverable balance in Mainpuri at the close of the year was Rs. 25,315. In this district also the Bishangarh Chaudhri is answerable for a large portion of the arrear, the amount due from him being Rs. 13,691, of which he afterwards paid up Rs. 11,141, while the balance, Rs. 2,550, has been recovered by the farm of one of his villages. Rs. 4,375 were collected after the end of the year from other defaulters, and Rs. 365 have been realized by the transfer of a share under section 157 of Act XIX of 1873. The balance has thus been reduced to Rs. 6,884, all of which belongs to the Bhongaon tahsíl, where the distressed villages of the Mainpuri district are mostly situated. Of this amount, again, Rs. 2,007 are due from villages which have been brought under revision of assessment during the past cold weather, and most, if not all, of it will eventually be remitted.

In Etáwah Rs. 13,428 have been classed under the head "in train of liquidation." Rs. 9,953 of this were due from the Rája of Bharch, whose mismanagement and default necessitated the attachment of a large portion of his estate under section 154, Act XIX of 1873. The Rája subsequently paid in the arrears due, after sanction had been given, under section 159, to the farm of fourteen of his villages. The collection of nearly all the remainder of the recoverable balance has been suspended on account of damage caused by hailstorms and floods.

The Etah district exhibits the largest arrear in the province, as it did last year, the recoverable balance being Rs. 1,04,643, or 36 per cent. of the total under this head. This balance belongs almost entirely to the Kasganj and Aliganj tahsíls, in which the deteriorated tracts of the district are situated. It is exclusive of the doubtful balance of Rs. 49,830, which represents approximately the amount by which the land revenue will be reduced when the proposals of the Settlement Officer regarding the revision of assessment of the deteriorated estates are sanctioned. The Collector states that some few thousands of the recoverable balance should be regarded as "doubtful," as there are some villages in which the balances are due to inability to pay and not to recusancy. Even allowing for this, the real balance, after effect has been given to the large reductions of revenue that have been proposed, will not fall far short of a lakh of rupees. The Collector's remarks on the subject of the heavy balance of revenue, which may be quoted in full, are as follows:—"The 1298 fasli crops having suffered in some "places more than in others and in consequence of the heavy September fall in Aliganj, "the kharíf harvest will in places not suffice to pay off balances in addition to its own "revenue demand. It must be remembered that the accumulation of revenue and rent "balances in consequence of successive disastrous seasons alleviated by no corresponding "remissions is one of the reasons of the very low agricultural condition obtaining in these "tracts at present, and a favourable discretion should be exercised in order that the ball "be not set rolling again. A separate report will shortly be submitted on this subject. "The heaviest balances are in the three parganas where the degree of deterioration is "highest, *viz.*, Sahawar and Sirhpura in tahsíl Kasganj, and Azamnagar in tahsíl "Aliganj. In pargana Nidhpur the balance is partly accounted for by the custom of "the villagers of paying land revenue from the produce of the ensuing cane crop which "is largely grown in that pargana."

The analysis of the balances in the Agra districts which has been given above will have shown that in Muttra and Etáwah, when full effect has been given to the reductions of revenue which have been made or will shortly be sanctioned, the portion of the real demand for 1890-91 remaining for collection will be trifling. The canal tract in Muttra has greatly improved; the villages which have seriously suffered from over-saturation have been made the subject of special inquiry; and, when the necessary relief has been given in these, there should be little further difficulty in the collection of the land revenue. Etáwah is fairly well off. Only a few villages have suffered from purely local causes, and in these ample relief has been given by the recent revision of assessment. The district as a whole has enjoyed a good settlement, and under the watchful administration of the Collector, Mr. Alexander, all misfortunes of season are sure to receive full consideration. In Agra the management of attached estates has not yielded very satisfactory results and the uncollected balance is considerable. The relief given by the revision of settlement seems to have been sufficient; and, if the wire fence is continued as proposed, the Fatehpur Sikri tract, which has given trouble for so many years, will have a chance of recovery. The only real danger now to be feared there is from the floods of the Utangan or Banganga river, from which the tahsíl has repeatedly suffered. The question of controlling the vagaries of this river is both serious and difficult. If the Utangan finally adopts the bed of the Khári nadi, as it threatens to do, a large tract of country will be ruined by flooding and by deposits of sand, and the injury done to roads and bridges will be very great. The Irrigation Department has suggested a scheme for preventing these disastrous results (G. O. No. $\frac{1339}{I-479}$, dated the 11th June 1891), which has been referred to a Committee consisting of the Commissioner of Agra, the Collector of Agra, and the Superintending Engineer, 2nd Circle, Irrigation Works. This Committee was to meet at Agra during the past cold weather, but has not as yet submitted its conclusions. In Etah the arrears are so large as to make the situation a serious one, and in Mainpuri and Farukhabad, though comparatively little of the realizable demand remains to be collected, the realization of the land revenue has been attended with the greatest difficulty, and the good results that have been shown have only been obtained by unremitting exertions on the part of the Collectors. The Commissioner, Mr. Neale, in discussing the financial condition of these three districts, after referring to the accumulation of arrears in the deteriorated tracts and the default of bankrupt landowners like the Chaudhri of Bishangarh, makes the following remarks:—"The present state of affairs also gives rise to danger and difficulties from an opposite source, because the existence of revision of settlement in any district encourages malingering and recusancy on the part of the well-to-do. All three Collectors of the districts just named have observed and deplored this tendency, and it is certainly likely to influence the collection of the revenue for the next few years." As Mr. Neale shows, the situation in Etah, Mainpuri, and Farukhabad is distinctly difficult. The seasons of recent years no doubt have been unfavourable to the recovery of the affected tracts, especially in Etah; but the relief given under the special rules approved by Government has been ample, and the difficulty which is now experienced in the revenue administration will probably, under careful management, disappear by degrees, when the revisional proceedings are completed. Revisions of assessment have been going on in all these districts, and the zamíndárs have discovered that the best way to ensure attention to their claims to relief is to refuse to pay their revenue. The most persistent defaulters have, it is to be feared, sometimes benefited more than those who have paid what they could. Default, in fact, has become chronic, and the Collectors for some years to come will find it no easy task to collect the just dues of Government. Once the revisional proceedings are ended, the greatest firmness will have to be shown in insisting on the punctual payment of the land revenue.

The Commissioner, in referring to the revision of assessment, makes the following remarks in criticism of the provisions of rule VII of the Rules for the revision of settlement in Mainpuri:—"I will venture to remark," he writes, "upon Rule VII, which orders in effect that, where a talúka is concerned, if the talúka, taken as a

"whole, has not suffered appreciable loss, no single villages in it which have suffered "such loss should obtain remedial measures. I think it is generally admitted that "it is the mahál, and not the aggregate of mahals forming a talúka, which is the "unit of settlement. This being so, to refuse relief to parts of such an aggregate, because "the whole aggregate is fairly off, seems to me to be adopting a principle which slides "into socialism, sanctioning the appropriation of profits whenever the loser seems able "to afford it." This rule was introduced by Government. It has only been fully acted on in the case of one or two large estates, such as that of the Rája of Awa, for which, it is believed, the rule was more particularly intended. As it has been applied in practice, the rule is, the Board consider, fair enough, provided that the tenants are not directly concerned through section 23 of the Rent Act. As the Board have interpreted it, the rule merely provides that where a man holds a large estate, settled with him for a long period, for better or for worse, Government may look to see whether the proprietor obtains from the whole less than the amount which it proposed to leave him when the settlement was made. As Government has debarred itself from sharing in the enhanced profits of the parts of the estate which have improved, it may fairly take advantage of the proprietor's obligation to bear the loss upon other portions that have deteriorated.

In the remarks which have been offered above on the financial condition and prospects of the Muttra and Agra districts, allusion has been made to the wire fence which has been put up along a portion of the Bhartpur border, in order to keep out the cattle that infest the adjoining villages in British territory. The Junior Member inspected the fence, both in Muttra and Agra, during his recent cold weather tour, and found that, as far as it has been put up, its success is complete. Mr. Kaye was gratified to find the border village of Hansela, which had paid its way through several famines, but had been ruined by the wild cattle, rapidly recovering. The inhabitants were really grateful and had not a complaint to make. To cattle, the fence is perfectly impervious. Pigs get through it, but the people can protect themselves against them, and have already done so to some extent, for the diminution in the number of these animals is, Mr. Kaye was informed, remarkable. The great benefit of the fence to the three villages in Agra which are at present protected by it, will be apparent from the following statistics :—

(1) *Hansela.*—Increase in the rabi cultivation compared with the previous year, 777 bíghas, *viz.*—

	Bíghas.
Rabi, 1890-91	509
„ 1891-92	1,286

(2) *Gahra.*—Increase in cultivation, 308 bíghas, *viz.*—

Rabi, 1890-91	55
„ 1891-92	363

(3) *Tirpuri.*—Increase in cultivation, 55 bíghas, *viz.*—

Rabi, 1890-91	190
„ 1891-92	245

In the Agra district a formidable ditch has been dug at the cost of the zamíndárs for a distance of 27¾ miles, along the portion of the boundary at present unprotected by the fence, and extension of the fence for 21¼ miles has been sanctioned by the Government. The unprotected villages in Muttra beyond the extremity of the fence are naturally plagued with more cattle than before; but the extension of the fence on the Muttra side is attended with the difficulty that a suitable termination cannot be found short of the Gobardhan hills.

The land revenue collections in the Rohilkhand Division call for a brief notice only. Four districts, Bareilly, Budaun, Sháhjahánpur, and Pilibhít, show real balances, all of small amount. The greater portion of the arrears has either been recovered since the close of the year, has been suspended by competent authority, or is in course of adjustment. There are only one or two doubtful cases in which it is possible that the

revenue demand presses somewhat heavily, and where it may be necessary, eventually, to grant a remission. Such cases are rare and altogether exceptional, and are not of sufficient importance to call for detailed notice in the revenue administration report.

In examining the balance statements of the Allahabad Division, it will be convenient to notice separately (1) the central districts of Cawnpore, Fatehpur, and Allahabad, and (2) the Bundelkhand districts of Bánda, Hamírpur, Jhánsi, Jalaun, and Lalitpur.

In the first group, the nominal balances in Cawnpore and Allahabad represent chiefly remissions on account of the severe hailstorms which injured the crops in a large number of villages in February and March 1891. The recoverable balance of Rs. 6,540 in Allahabad is a portion of the revenue which was suspended for the same cause. The greater part of the realizable arrear of Rs. 3,236 in Cawnpore is due from eight estates which are held under attachment under section 154 of the Land Revenue Act. In four of these villages the revenue has now come to bear an excessive proportion to the assets. The Board have negatived a proposal for sale of one of them and annulment of settlement in another, and have directed further inquiry to be made into their condition. The balance in the remaining four villages will probably be shortly collected.

In two only of the Bundelkhand districts, Bánda and Jalaun, are the arrears at all heavy. Hamírpur, which last year showed a recoverable balance of Rs. 22,431, is this year practically clear, the whole of the realizable demand (except a small sum of Rs. 52 suspended on account of damage by locusts) as well as a large sum on account of outstanding arrears of former years, having been collected.

At page 13 of the report of 1889-90 the Board remarked that the arrears in Hamírpur were partly due to a want of decision in dealing with defaulters on the part of the former Collector, and it is satisfactory to find that the prompt action taken by his successors, Messrs. Holmes and Brereton, has been so successful. Failure to meet the Government demand in Hamírpur is attributed by Mr. Brereton, in the great majority of cases, to contumacy and not to inability to pay. The seasons of 1295, 1296, and 1297 fasli were decidedly unfavourable to agriculture in Hamírpur; but the rabi of the past year is reported to have been excellent; and the present condition and prospects of the district are such as to give no cause for anxiety. The recoverable balance in Bánda, Rs. 11,397, is the largest in the Division, but it is considerably less than that of the previous year, which amounted to Rs. 28,185. Some difficulty has been experienced in Bánda, as in Hamírpur, in enforcing the punctual payment of the Government demand, and the Collector has had to deal with habitual defaulters from whom the revenue can only be collected by means of the severer processes authorized by the law. Proper measures have been taken in cases of wilful default, and the Collector expects to realize the greater portion of the outstanding balance within the current year. There are some cases, however, in which arrears are probably due to inability to pay the land revenue. The shrinkage of cultivation in some portions of the Bánda district, owing to the spread of *káns* grass, has formed the subject of special inquiry, of which the results have been reported to Government (Board's No. $\frac{2550N.}{III-61}$, dated 5th October 1891). During the past cold weather the Collector (Mr. Hoey) has been engaged, under the orders of Government, in inspecting those estates which appeared, from the statistics, to have suffered seriously, and in framing proposals for reduction of revenue in cases where relief was found on inquiry to be necessary. His proposals when received will be submitted for the orders of Government.

The arrears entered as recoverable in Jalaun amount to Rs. 10,453. Of this Rs. 1,009 were got in immediately after the year closed and Rs. 1,695 are suspended on account of damage caused by locusts, leaving Rs. 7,749, classified in the district returns as in course of liquidation or due from attached estates. The working of the recent settlement in Jalaun has been under special inquiry with reference to G. O. No. 999, dated 16th June 1890, and the result of the inquiry will shortly be

submitted to Government. The fiscal histories of 51 estates in which the settlement shows signs of breaking down were examined by the Board in August last, and the Collector has since prepared similar histories for a number of other villages the condition of which appeared to call for inquiry. These last have not yet reached the Board, but the statistics they have at present examined do not indicate any general breakdown of the new settlement, though they show that in a certain number of estates, owing mainly to unfavourable seasons, a very serious deterioration, attended by a diminution in cultivation and rental, disappearance of cultivators and plough cattle, and increased indebtedness among landholders and tenants, has taken place since the settlement was made. It is to estates of this description that the arrears of land revenue chiefly belong. These balances will be reviewed in detail when the report on the working of the Jalaun settlement is submitted to Government. Some of them are really irrecoverable; and will eventually have to be remitted, as well as the outstanding arrears of previous years.

The collections in the Benares Division have been good, although the crops were below the average. Two districts exhibit arrears, Ghâzipur (Rs. 3,821) and Ballia (Rs. 372). Of the former sum, Rs. 2,260 were collected shortly after the close of the year, and the remainder will shortly be adjusted. The small balance in Ballia may be called accidental. A suspension of revenue had been granted in certain permanently settled alluvial mahâls, to which they were in no way entitled. When the facts of the case were brought to the notice of the Board, they directed that the standard jamas should be re-imposed. The orders were issued after the close of the year, and, in consequence, a balance appears, which will be promptly collected.

Two of the districts of the new Division of Gorakhpur—Gorakhpur and Azamgarh—show a balance. In the third district, Basti, as has been remarked above, the revenue was collected in full. The balance in Gorakhpur amounted to Rs. 25,548, which was reduced to Rs. 8,306 by collections made shortly after the close of the year. The arrears accrued in the lowlying tracts of the Bansgaon and Hata tahsîls, which are subject to inundation and during the year under report suffered great injury from the floods of the Ghogra and Rapti, which were exceptionally severe and appear to have been more destructive in Gorakhpur than in the adjoining district of Basti. An experienced Assistant Collector was deputed to inspect the estates in which the land revenue was in arrear and to ascertain whether relief in the shape of suspension of the demand was necessary. The amount will probably be collected during the current year, the prospects of which are excellent. The real outstanding balance in Azamgarh was Rs. 26,204. Of this, Rs. 25,377 were collected in October 1891, leaving Rs. 827 only for adjustment, Rs. 528 of which have been suspended in two villages on account of injury to the crops caused by floods. The Collector remarks on the difficulty of collection in Azamgarh owing to the multiplicity of sharers and the decay of the lambardâri system, and states that, though every effort was made to realize the demand within the year, it was found impossible to do so. Considering the indifferent character of the harvests in Azamgarh, the Board agree with the Commissioner that the collections were as good as could be expected.

The only district in the Kumaun Division which shows a balance is Kumaun. The balance, which amounts to Rs. 4,256, is attributed to the scarcity which prevailed during 1889-90, from the effects of which the people have not wholly recovered. The entire sum is in train of liquidation and will eventually be realized.

In accordance with paragraph 34 of the Government review on the last report, the Board suggested the adoption of the plan introduced in his district by the Collector of Basti of fixing days, from the first date of the instalment on to the 15th, for the payment of the Government demand in turn by different sections of each tahsîl, the estates of the most troublesome landlords being placed in the earlier dates. The arrangement has been adopted in few districts. The Collector of Hamîrpur, who has issued instructions to his tahsîldârs to try the plan, thinks it can hardly succeed in a district like Hamîrpur. He observes—"In Basti there are a good many large landholders.

"In Hamírpur villages are huge pattidáris. As far as I am able to discover, I believe "few villages pay their revenue direct into the tahsíl voluntarily, at any rate in "the Hamírpur tahsíl. In most cases there is absolute contumacy until pressure is "brought to bear." The Commissioner's comment on this is that, in the "pattidári "mahals the main point is to leave all questions of account to be settled between the co- "sharers. If this is done, it is undoubtedly useful to have dates fixed by the tahsíldár "for the payment of revenue by different sections of the tahsíl. The whole tahsíl "cannot pay in on one day, and the Basti arrangement is an old one which, to my "predecessor's knowledge, was in force in Bánda in 1882. Its adoption will not only "facilitate the work of the tahsíli account department, but enable the tahsíldár to be "beforehand with habitual defaulters." Mr. Brereton is mistaken if he supposes that large coparcenary communities are not common in Basti; and, if the system of fixing dates for the payment of the land revenue by different sections of the tahsíl is less likely to succeed in Hamírpur than in Basti, it is not because of a difference in the nature of the proprietary tenures, but because of the recusancy of the Hamírpur proprietors. If, as is reported to be the case in the Hamírpur tahsíl, in most instances there is absolute contumacy until pressure is brought to bear, the landowners are not likely to appear at the tahsíl on the dates fixed for their attendance. But the Board are of opinion that the system should be persevered with in Hamírpur. As the Commissioner remarks, it will enable the tahsíldár to be beforehand with habitual defaulters, and wilful default may be expected to diminish if it continues to receive the same firm treatment as has been shown in dealing with it during the past revenue year. The Board will, further, be glad to see the system introduced in other districts where it has not yet been tried.

App. A.-II. Outstanding balances of previous years.

14. The outstanding balances of land revenue at the end of last year amounted to Rs. 6,47,697, of which Rs. 4,83,561 were on account of 1889-90 and Rs. 1,64,136 were arrears of previous years. A total of Rs. 6,49,556, however, has been shown as the opening balance of the year under report; the difference, an increase of Rs. 1,859, being the result of the adjustment of the accounts of an estate held under attachment, under section 154 of the Land Revenue Act, in the Pilibhít* district. Of the sum of Rs. 6,49,556, Rs. 1,91,577 have been remitted, Rs. 2,03,906 collected during the year, and Rs. 2,359 shortly after the close of the year, leaving Rs. 2,51,714 outstanding.

The net balance remaining is classed as follows in Appendix III-E :—

	Rs.
Due to revision of settlement of deteriorated and other villages	1,70,886
„ „ suspensions in deteriorated and other villages	33,769
„ from estates attached under section 154, Act XIX of 1873	35,590
„ „ „ the settlements of which have been annulled under section 158 of the Land Revenue Act	4,371
Realizable by instalments	2,676
Due from estates purchased by Government sold under section 166, Act XIX of 1873	3,525
Amount of jama of land appropriated for railway purposes	110
Petty sums realizable	787
Total ...	2,51,714

The bulk of the arrears is comprised in the first two items, and belongs almost entirely to the deteriorated tracts of the Agra Division, the assessments of which have been under revision. Under the rules for the revision of settlement in these districts, which have been approved by Government, whenever the revenue of a village is reduced, all outstanding arrears of revenue are to be remitted. The greater portion of these balances will therefore be removed from the accounts during the current year. In the Etah district alone, out of the balance of Rs. 1,55,927 entered in Appendix A-II, the

* The explanation is as follows. The estate consisted of several villages, and the collections were credited to the estate generally and not to the individual villages. Two villages were sold by order of the Civil Court and were released from attachment. In these two villages more than the Government demand had been collected. The Collector refunded the excess collected to the purchasers, and thus increased the arrears due from the portion of the estate which remained under attachment.

remission of Rs. 1,36,414 has been recommended by the Settlement Officer, and a portion of the remainder is also irrecoverable, as it belongs to deteriorated villages inspected during the past cold weather, the Settlement Officer's proposals regarding which have not as yet reached the Board. The greater part of the balance due from attached estates belongs to the Agra Division; it is also in part due from estates in Jhánsi and Jalaun. It is probable that the arrears in some of the attached estates in Jhánsi and Jalaun, which have suffered from the growth of *káns* or from general deterioration, will have to be remitted.

The Rs. 4,371 entered as due from estates the settlement of which has been annulled belongs to three villages in the Hamírpur district. The arrears in two of them have been paid by the persons to whom the maháls have been given in farm; the balance in the third, which is under direct management, has been remitted.

The item of Rs. 3,525 shown as due from estates sold under section 166, Act XIX of 1873, and purchased by Government, represents the arrears that remained due from three estates—two in the Jalaun district and one in Hamírpur—which were purchased by Government for nominal sums. The balance of the arrears in the Hamírpur estate have since been remitted. The arrears of the Jalaun estates are still shown as due from the former proprietors under rule 27 of Circular No. 3—III, but the Board have directed that no steps should be taken for the present to recover them, as the maháls in which they accrued are among those which are the subject of the special inquiry as to the working of the Jalaun settlement which has been referred to in paragraph 13 above.

The adjustment of the small item of Rs. 110, shown as due to acquisition of land, awaits the disposal of the question as to the amount of compensation payable on account of land appropriated for the Muttra-Bindraban Railway in the Muttra district.

With the exception of a trifling sum, the whole of the abnormally large balances, which remained uncollected in the Kumaun and Garhwál districts at the close of last year, have been recovered. The Commissioner observes that "the success in collecting the arrears of revenue suspended on account of the scarcity in 1889-90, is very satisfactory evidence of the recuperative powers of the landowners. The sum to be recovered was in Garhwál more than Rs. 15,000, and with the exception of a small item of Rs. 21, which was, on sufficient cause being shown, remitted by Government, the whole of this was realized without the exercise of any undue pressure."

Advance collections of land revenue on the roll.

15. The year opened with a balance of Rs. 51,699, and Rs. 39,93,308 were collected during the year, bringing the total amount for adjustment up to Rs. 40,45,007. Of this, Rs. 39,77,403 were credited and Rs. 820 refunded, leaving Rs. 66,784 for future adjustment.

App. A.-III.
Demand, collections, &c., of land revenue not on the roll.

16. In 1889-90 the portion of the land revenue demand classified as not on the roll amounted to Rs. 19,79,440. During the year under report the demand under this head, including a balance from previous years of Rs. 7,726, was only Rs. 48,940, as the enhanced land revenue assessed at the recent revision of settlement of the Bulandshahr, Gorakhpur, Basti, and Jalaun districts was, under the orders contained in G. O. No. $\frac{415}{1-619A.}$, dated the 15th March 1890, transferred from "revenue not on the roll" to "revenue on the roll" at the beginning of the year. The collections within the year amounted to Rs. 44,867, and Rs. 527 were realized shortly after the year ended, while Rs. 272 are returned as nominal, leaving Rs. 3,274 for adjustment. The greater part of the recoverable arrear belongs to Etah and Moradabad, where it is due chiefly from alluvial maháls, the assessments of which were not sanctioned in time for the collections to be made within the year. The trifling balance of Rs. 28 in Basti is the remainder of the sum realizable by instalments from Arazi Chaukia, to which reference was made in paragraph 15 of the last report. Particulars of the demand and balances are given in Appendix E.-IV.

App. E.-V.
Demand, collections, and payment of málikána.

17. The total demand for the year under report, including an arrear of Rs. 846 from the previous year, was Rs. 1,92,028. Of this demand Rs. 1,90,940, or 99·4 per cent., were collected, and Rs. 616 remitted, leaving Rs. 472 outstanding. In addition, a small portion of the demand for 1891-92 was collected in advance, and the actual receipts amounted altogether to Rs. 1,90,639, which with Rs. 60,018, the balance in deposit at the beginning of the year, made a total of Rs. 2,50,857. Of this, Rs. 2,23,371 were paid during the year, leaving Rs. 27,486 for future adjustment.

The balance in hand in Gorakhpur, Rs. 19,606, though considerably less than that at the end of 1889-90, is still large. The málikána rolls (Circular 9 B. F.—III), to which reference was made in paragraph 16 of last year's report, have all been distributed in the Gorakhpur district, and there is now no apparent reason why a large balance should remain in deposit. The Collector will be asked to endeavour to clear the accounts.

In Bareilly and Mirzapur the balances in hand are large in proportion to the total receipts; but adequate explanations, which need not be reproduced, are given in the district reports. The unadjusted balances in the other districts are not such as to call for special remark. A few more payments have been made out of the old balance of málikána in the Basti district to which reference was made in paragraph 16 of last year's report. Out of the total sum of Rs. 16,758, Rs. 4,021 altogether had been disbursed up to the end of the year, and Rs. 572 more have been paid since, leaving a balance of Rs. 12,165. The circumstances under which the accumulation of unpaid málikána in Basti was provisionally removed from the accounts were explained in this office letter No. $\frac{2085N.}{III-79}$, dated 10th September 1891.

SEC. III.—STATEMENT SHOWING THE ALTERATIONS THAT HAVE OCCURRED IN THE DEMAND FOR LAND REVENUE ON THE ROLL.
App. A.-IV.

18. The demand of land revenue on the roll has risen from Rs. 4,49,75,872 at the commencement of the year under report to Rs. 4,52,43,768 at its close, a net increase of Rs. 2,67,896. The chief items of increase are the enhancements of land revenue declared at the recent regular revision of settlement of the Muzaffarnagar district (Rs. 3,02,143), and on the assessment of certain time-expired grants in the Saháranpur district. Details of the alterations in the demand are subjoined :—

	Rs.	Rs.
Demand on 1st October 1890		4,49,75,872
(1) *Increase*—		
By lapse or assumption of revenue-free tenures	13,327	
„ revision of assessment at regular settlement	3,13,093	
„ alluvion	14,204	
„ territorial transfer	38,839	
„ grant of waste land	43	
„ progressive assessments	4,373	
„ land released from Government-occupation	461	
„ other causes	2,708	=3,87,048
	Rs.	4,53,62,920
(2) *Decrease*—		
By revision of assessment at regular settlement	35,727	
„ summary reduction of revenue on account of over-assessment, or any other cause	9,288	
„ diluvion	27,464	
„ territorial transfer	38,839	
„ Government appropriations	1,671	
„ other cause	6,163	=1,19,152
Demand for 1891-92 ...	Rs.	4,52,43,768

The only noticeable item, besides the increase by revision of assessment at regular settlement, is that of Rs. 38,839 under "territorial transfer," which appears on both sides of the account. This sum is the land revenue of the parganas transferred from the newly constituted district of Almora to that of Naini Tal. The various alterations in the demand are detailed in Appendix E.-VI.

SEC. IV.—TWELVE PER CENT LOCAL RATE.

19. The demand for the 12 per cent. local rate was Rs. 49,90,215, which is Rs. 14,556 less than the sum leviable at 12 per. cent on a land revenue demand of Rs. 4,17,06,432. The difference is accounted for as follows :— App.A.-V. Current demand.

		Rs.	Rs.
Decrease—			
	By exemptions under Government orders	8,847	
	„ „ of small revenue-free holdings and religious endowments ...	4,980	
	„ compounding fractions of a rupee	1,073	=14,900
Increase—			
	By imposition of special rate on certain villages of the Rája of Mursan in Muttra	277	
	„ imposition of rate on summary settlement of grove lands	9	
	„ compounding fractions of a rupee	58	=344
	Net difference ...		Rs. 14,556

The enhanced land revenue assessed at the recent regular revision of the settlement of Saháranpur added Rs. 33,622 to the local rate demand of that district. The net provincial increase is, however, Rs. 32,614. The difference is chiefly due to the decrease in the land revenue by diluvion.

App. A.-VI. Collections on account of the current demand.

20. Rupees 49,54,091, or 99·3 per cent. of the realizable demand, were collected within the year, and Rs. 5,652 soon after its close, leaving Rs. 30,472 outstanding. This balance is classified as follows :—

	Rs.
Recoverable	7,978
Doubtful	12,713
Irrecoverable	9,781
Total ...	30,472

Particulars of the balances are given in Appendix E.-VII. Nearly 79·3 per cent. of the total recoverable arrears are due from the Agra Division. The balances in Farukhabad and Mainpuri were chiefly due from the Chaudhri of Bishangarh; the amounts due by the Bishangarh estate were paid up shortly after the close of the year, but in Farukhabad only after sale of part of the Chaudhri's estates, for arrears of land revenue, local rates, and water rates, had been sanctioned by the Board. Of the sum of Rs. 1,099 in Etáwah, Rs. 1,080 were due from the Rája of Bhareh, for the recovery of which and other Government dues his estates were attached. The arrears were collected soon after the end of the year. After the deduction of Rs. 3,837, collected after the close of the year, the comparatively large recoverable balance of Rs. 3,170 is still outstanding in Etah. This is 56·8 per cent. of the recoverable arrears still outstanding in the Agra Division, and 39·7 per cent. of the amount now recoverable in the province. Almost the whole of it is due from estates held under attachment under section 154 of Act XIX of 1873. Some of these estates are deteriorated villages which have not yet been reported on with a view to revision of assessment, so that it is probable that a portion of the arrears will eventually have to be remitted. The arrears in other districts are trifling and do not require special notice.

App. A.-VII. Outstandings of previous years.

21. According to the returns of the previous year, the outstanding balance was Rs. 30,386. In consequence, mainly, of the adjustment of the accounts of an estate held under attachment in the Pilibhít district, to which reference has been made in paragraph 14 of this report, the balance was increased by Rs. 135, and stood at the commencement of the year at Rs. 30,521. Of this demand, Rs. 9,536 were remitted. The amount still outstanding was therefore Rs. 20,985, and the collections, including a sum of Rs. 100, realized soon after the close of the year, aggregated Rs. 10,423, or 49·6 per cent., leaving Rs. 10,562 classed as follows :—

	Rs.
Recoverable...	1,095
Doubtful	8,977
Irrecoverable	490
Total ...	10,562

The "recoverable" balance now outstanding is distributed between five districts as follows :—

	Rs.
Muttra	14
Agra	181
Farukhábad	4
Etah	701
Pilibhít	195
Total ...	1,095

Rs. 895 are due from estates held under attachment under section 154 of Act XIX of 1873; the collection of Rs. 65 has been postponed, the amount will be recovered in 1891-92; and the remainder is composed of petty amounts. Appendix E.-VII furnishes particulars of the total balance.

SEC. V.—ACREAGE RATE AND OTHER CESSES.
Apps. A.-VIII AND A.-IX.
App. A.-VIII.

22. The gross demand amounted to Rs. 5,91,531, as compared with Rs. 5,91,410 in the previous year. The trifling difference is due to the re-assessment, under the rules contained in Circular No. 4—VIII, Board's Extant Circulars, of land appropriated for Railway purposes and subsequently relinquished, and to enhanced assessments of alluvial mahâls in Benares and Ballia. The collections were, within the year, Rs. 5,90,826 and Rs. 20 after the 30th September 1891; altogether Rs. 5,90,846, or 99·9 of the demand. The balance outstanding is nominal, and will be duly removed from the accounts.

App. A.-IX.
Outstandings of past years.

23. The outstanding balance, according to the return of the previous year, was Rs. 1,428, but this has been raised to Rs. 1,435 by the assessment, with retrospective effect, of certain alluvial mahâls in the Benares district. Of this, Rs. 1,162 were realized, and the remainder (Rs. 273) remitted.

SEC. VI.—ACQUISITION OF LAND.
App. A.-X.

24. During the year 2,297 acres of land were appropriated, of which 1,629 were acquired permanently, and 668 temporarily. The total compensation paid under both heads was Rs. 59,909, and revenue was reduced to the extent of Rs. 1,620-3-9 annually. Of the appropriated area, 231 acres were taken up for roads, 761 for canals, 1,212 for railways, and 93 for buildings and miscellaneous purposes. The appropriations for railways were on account of the Oudh and Rohilkhand Railway, the Bombay Baroda and Central India Railway, the Lucknow-Pilibhít Railway, the Indian Midland Railway, the Bengal and North-Western Railway, and the Rohilkhand and Kumaun Railway. In the Pilibhít and Shâhjahânpur districts the acquisitions for railway purposes were dealt with by a special officer. The average rate of compensation per acre paid during the year of report for the area acquired permanently was Rs. 32-11-1 and that for land acquired temporarily Rs. 9-15-7, as compared with Rs. 58-0-8 and Rs. 7-2-6 respectively in the preceding year. Land acquired permanently has been obtained at a much lower rate than in the preceding year, but there is a slight increase in the average cost of compensation for land acquired temporarily. The causes of the comparatively high average rate of compensation paid in the preceding year were explained in paragraph 23 of last year's report. During the year 738 acres of land were given up by Government, for which Rs. 7,700 were realized on sale. The greater portion of this sum was on account of land in the Meerut, Bareilly, and Cawnpore districts, where Rs. 6,561 were realized as the price of 683 acres.

In 269 cases in which land has been acquired, compensation had not been paid up to the close of the year. The dates of the oldest pending cases and the districts to which they belong are given below :—

Meerut	25th July 1888.
Aligarh	8th January 1889.
Farukhabad	3rd April 1888.
Bareilly	7th November 1889.
Bánda	20th April 1888.
Hamírpur	1st July 1889.

The number of pending cases shows an unsatisfactory increase. Bánda is responsible for 71 of such cases, and the Collector's explanations of the delay in some instances are reported by the Commissioner to be insufficient. The Collector's attention will be specially drawn to the necessity for clearing his file during the current year. In Farukhabad also the proceedings in some cases appear to have been needlessly protracted by the issue of incorrect notifications and delay in issuing fresh ones. For this, however, the present Collector is not responsible.

A memorandum is given at the foot of the appendix showing the cases in which lands were acquired by Government without resorting to the provisions of Act X of 1870. The area thus appropriated was 81 acres and 29¾ poles, the compensation paid Rs. 5,236-0-5, and the annual reduction of revenue Rs. 92-2-11. These cases are not included in the figures of the appendix.

SEC. VII.—RESUMPTION OF REVENUE-FREE HOLDINGS. App. A.-XI.

25. Rupees 2,045 were added to the land revenue by the assessment of lapsed and resumed revenue-free tenures, and Rs. 8,797 by the re-assessment of grove lands which had been brought under cultivation. The statistics under this head, of which details are given in the appendix, present no feature worthy of special remark.

SEC. VIII.—MISCELLANEOUS LAND REVENUE. App. A-XII.

26. Including the recoverable arrears of previous years (Rs. 119), the current demand amounted to Rs. 71,252, as compared with Rs. 94,080 in 1889-90. Of this Rs. 70,998 were collected, leaving a balance of Rs. 254. The whole of this small arrear, which is on account of the water mill rents in the Kumaun district, is recoverable. The decrease in the demand occurred in the two districts Kumaun and Mirzapur, which alone contribute largely to this description of revenue. The falling off in the former district compared with the previous year amounts to Rs. 10,128. It is explained by the fact that the demand for 1889-90 was an abnormal one, including the refund of a large amount which had been advanced from the mill rent fund for the purchase of grain during the scarcity in Garhwál. In Mirzapur the decline in the income from the stone quarries continued, and the receipts were less than the previous year by Rs. 11,759. The depression of the trade in stone, and the consequent falling off of the royalty, are ascribed to various causes, which have formed the subject of separate correspondence between Government and the Board.

SEC. IX.—CANAL OCCUPIERS' AND OWNERS' RATES. App. A.-XIII. Occupiers' rate, current demand.

27. The current demand amounted to Rs. 49,76,450, as compared with Rs. 44,69,097 in the previous year. There was thus an increase of Rs. 5,07,353, or 11·12 per cent., to which the following districts contribute very largely :—Bulandshahr (Rs. 72,030), Aligarh (Rs. 52,277), Farukhabad (Rs. 52,891), Mainpuri (Rs. 50,306), Etáwah (Rs. 89,166), and Cawnpore (Rs. 1,43,454). The increase is chiefly due to the prolonged break in the rains of 1890 and to deficient winter rains. The Collector of Bulandshahr states that a larger area than usual was available for the rabi sowings, and that the delay in the winter rains, with their total absence in the Sikandrabad tahsíl, led to a strong demand for canal water. The enhanced demand in Aligarh is attributed to "deficient winter rains." The Collector of Farukhabad explains that the increase "was almost "entirely due to the break in the rains from the 13th August to the 14th September 1890, "when the irrigation of the kharíf crops by artificial means became an urgent necessity." As regards the rise in the demand in Mainpuri, the Collector writes—"It accrued "almost altogether during the kharíf harvest, and is the immediate result of the "re-opening of the Bewar Branch of the Lower Ganges Canal, which had remained "closed since the destruction of the Nadrai Aqueduct in 1885. The previous rabi had "received canal water from it, but this was the first year in which it had been "continuously available for irrigation. There was also a slight, but much less marked, "increase over the Etáwah branch, in consequence of the opening out of new distribu-"taries." The long break in the rainfall in August and September, and the deficient winter rains, led to extensive irrigation from the canal in Etáwah, and considerably increased the demand for water rate. The most noticeable increase occurs in the Cawnpore district. It amounts to Rs. 1,43,454, and accounts for 3·21 out of the 11·12

per cent. increase in the demand of the province. The increase in the kharíf is, the Collector states, reported by the canal officers to be due to the cultivators having taken largely to grow rice sown with the aid of canal water before the rains begin. In the past few years the cultivators have derived large profits by this method of cultivation and the Collector reports—"This year, when hope of the other kharíf crops seemed gone, there was a most promising rice crop. The outturn has exceeded the promise, so there is a probability that there will be an extension of rice cultivation next year." The rise in the rabi is, the Collector adds, "principally to be ascribed to the comparatively small unirrigated kharíf area (part of which was injured by the heavy rains of July and August) having enabled a large area to be brought under rabi." The enhanced demand in Hamírpur is mainly the result of the early close of the monsoon and deficient winter rains; but it is also in some degree attributable to a growing appreciation of the advantages of the irrigation which is supplied by the Betwa Canal. That canal was opened in Hamírpur in 1887-88, and the income since then has been—

	Rs.
1887-88	154
1888-89	691
1889-90	919
1890-91	1,664

The demand in the period under report was nearly double that of the previous year. The figures for Jalaun show a largely increased resort to canal irrigation, the demand having risen from Rs. 68,356 in 1889-90 to Rs. 98,534. The steady increase in the water rate income appears to give grounds for hoping that the Betwa Canal may, as it becomes better appreciated in districts where canal irrigation was till lately unknown, prove more successful than at first seemed likely. Five districts show a decline in the demand, *viz.*, Dehra Dún (Rs. 1,256), Muzaffarnagar (Rs. 12,922), Muttra (Rs. 37,967), Agra (Rs. 12,937), and Tarái (Rs. 1,221). The comparatively large falling off in Muttra is on account of the rainfall in September 1890, which was sufficient to allow of the spring sowing being made without the aid of canal water.

Of the total demand of Rs. 49,76,450, Rs. 30,300 were remitted and Rs. 48,51,378 collected; Rs. 48,29,498 within the period under report and Rs. 21,880 shortly after its close. The balance still outstanding amounts to Rs. 94,772. The balances which call for special notice are those in Farukhabad, Mainpuri, Etáwah, Etah, and Cawnpore. The net amount for realization in Farukhabad was recovered from the defaulter, the Chaudhri of Bishangarh, after the sale of a number of his villages had been sanctioned. Rs. 7,566 were realized from this landowner in Mainpuri also shortly after the year closed, by which and other collections the district balance was reduced to Rs. 14,635, regarding which the Collector writes—"The year has been a very hard one in many ways, and I do not deem the results, all "things considered, unsatisfactory. It must be remembered that the actual collections "for 1889-90 were over Rs. 34,000 less than those of the year under report." In Etáwah the recoverable arrears amount to Rs. 6,239, the greater portion of which was due from the Rája of Bhareh, and has since been recovered by the use of coercive measures. The Etah district returns a balance of Rs. 43,486, of which the greater portion belongs to the distressed villages in the Burhganga and Kali nadi tracts. Of the arrears (Rs. 22,385) in Cawnpore, Rs. 8,214 have since been realized, and Rs. 8,079 are nominal, being the amount proposed for remission by the Canal Department on account of damage done to crops by hail. This amount will shortly be removed from the accounts. The sum still outstanding amounts to Rs. 6,092; of this Rs. 967 are due from estates held under attachment, the collection of Rs. 322 has been suspended on account of injury done to crops in three villages by hail, and Rs. 4,803 are in train of liquidation. The failure to realize the last mentioned sum was owing to the action of the Collector in suspending collections until receipt from

the canal officers of lists showing the names of the cultivators in whose favour remissions of water rate had been allowed. This was done in order to avoid the possibility of collecting sums already remitted. The Collector also notices that there seem to be some grounds for a complaint that in parts of Bhognipur water reaches land which is of a kind not very largely benefited by canal irrigation. The consequence is difficulty of collection of the water rates if the crops for any reason fall below the average. Rs. 1,21,055 were disbursed on account of fees for collection and measurement by lambardárs and patwáris.

The question of the enhancement of the occupiers' rate in the districts of the Lower Doáb, referred to in paragraph 13 of the Government review on the last report, has been submitted by the Government of the Province for the consideration and orders of the Government of India. On the 28th January 1892, the Board were directed to take the necessary measures for having an inquiry instituted in the Meerut and Aligarh districts upon the same lines as those upon which the inquiry on the Lower Doáb was conducted. The matter has been referred to the local officers for inquiry and report. In accordance with the orders contained in G. O. No. $\frac{67}{\text{I—98A.}}$ of the 18th January 1892, instructions have been issued that the higher occupiers' rate will be imposed in the Saháranpur and Muzaffarnagar districts with effect from the rabi of 1892.

28. The arrears of previous years amounted to Rs. 76,327, of which Rs. 50,656 have been collected and Rs. 3,464 remitted, leaving Rs. 22,207 still outstanding. Of this, Rs. 429 have since been realized. The only item which requires special notice is that in Etah (Rs. 19,032). The amount is due from attached estates and from distressed villages of the Kasganj and Aliganj tahsíls. Since the close of the year the Commissioner has, under the authority of G. O. No. $\frac{31}{\text{I—604A.}}$ of the 22nd February 1890, remitted Rs. 4,902 of the amount due from some of the distressed villages, and it is anticipated that further remissions will shortly be made. App. A.-XIV.

29. With the declaration, with effect from the 1st October 1890, of the revised land revenue, assessed at the recent revision of settlement, the owners' rate hitherto assessed on revenue-paying estates in the Saháranpur district disappeared and became merged in the land revenue. In this district, as well as in Bulandshahr, the owners' rate will henceforth only be taken from revenue-free, revenue assigned, and revenue redeemed estates and detached muáfi plots. In estates of these descriptions the rate has been assessed on the principle laid down by Government to which reference is made in paragraph 28 of the last report, and engagements for payment have been taken both in Saháranpur and Bulandshahr with effect from 1890-91. The amounts assessed in the two districts during the year under report are Rs. 10,386, *viz.*, Rs. 3,383 in Saháranpur and Rs. 7,003 in Bulandshahr. Compared with the figures of the previous year the decrease in the demand in Saháranpur, owing to the change of system, was Rs. 12,803; while the increase in land revenue, due to canal irrigation, which was obtained at the recent revision of settlement, is estimated at Rs. 48,500. As was explained in last year's report, no demand on account of owners' rate was shown against Bulandshahr for the year 1889-90. The owners' rate levied on revenue-paying estates in Muzaffarnagar has also become merged in the land revenue, with effect from the 1st October 1891, the date from which the revised land revenue demand was declared; and the rate will now be taken from estates of the same class only as those assessed to it in Saháranpur and Bulandshahr. App. A.-XV.
Owners' rate, current demand.

Notwithstanding the abolition of owners' rate in revenue-paying estates in Bulandshahr and Saháranpur, the total demand for the year under report stood at Rs. 3,68,052 as compared with Rs. 3,43,016 in 1889-90. The causes of the increase are identical with those referred to in paragraph 27 above in connection with occupiers' rate. After deducting remissions aggregating Rs. 8,164, the net demand was Rs. 3,59,888. Of this sum, Rs. 3,45,461 were collected within the year and Rs. 1,565 shortly after its close, leaving Rs. 12,862 for adjustment, classed as (1) recoverable Rs. 10,205, and (2)

nominal Rs. 2,657. Nearly 78·3 per cent. of the recoverable balance is on account of five districts of the Agra Division. The bulk of the arrears in this division is in the Mainpuri and Etah districts, where it is due chiefly from the tracts which have been passing through a period of depression. The greater portion of the balance will, it is expected, be shortly collected. The realizable balance in Cawnpore is outstanding in the villages referred to in paragraph 27 and will be duly recovered. The nominal balance has been proposed for remission by the Executive Engineer, Bhognipur Division, on account of damage caused by hail. Rs. 6,428 were disbursed on account of lambardárs' fees, compared with Rs. 6,484 in 1889-90.

App. A.-XVI. Outstandings of previous years.

30. Rupees 48 have, at the instance of the Executive Engineer, Rohilkhand Canals, been added to the sum shown as outstanding on the 30th September 1890. This raised the opening balance of the year under report to Rs. 8,043, of which Rs. 175 were remitted and Rs. 5,456 collected before the end of the year, and Rs. 140 soon after, leaving Rs. 2,272 for adjustment, due in Muttra (Rs. 289), Mainpuri (Rs. 54), and Etah (Rs. 1,929). All but Rs. 29 of the balance in Muttra is payable by estates held under attachment under section 154 of the Land Revenue Act. The arrears in the two other districts are due from deteriorated estates. It is expected that they will be duly recovered.

SEC. X.—STATE PROPERTIES AND WASTE LANDS. Apps. A.-XVII and E.-X.

31. At the beginning of the year there were 329 estates, with a land revenue demand of Rs. 1,37,369 in the possession of Government; and 13 properties with a jama of Rs. 3,233 were acquired within the year. Another property, the "stud lands" in Gházipur, returned to the possession of Government within the year. The question of its future management has not yet been decided (*c.f.* G. O. No. $\frac{287}{B.-566}$, dated 14th January 1892); but the rental and collections from it have been included in the return. Excluding the "stud lands," 5 of the 13 estates are not assessed; they are small plots of land relinquished by the Canal Department in Muzaffarnagar and have since been resold to the original proprietors. One estate carrying a jama of Rs. 835 was sold for arrears of revenue in Hamírpur and purchased on behalf of Government in default of bidders. The remaining 7 estates, which are assessed at Rs. 2,398, were bought in the Jhánsi district under the Jhánsi Encumbered Estates Act. During the year 15 villages, or shares in villages, bearing a jama of Rs. 13,540, were alienated, leaving 328 properties with a jama of Rs. 1,27,062 in the possession of Government on the 30th September 1891.

App. E.-X.

32. The total current demand amounted to Rs. 7,07,481 as against Rs. 6,74,923 in 1889-90. The estate of the late Musammat Kamar-ul-nissa in Sháhjahánpur was sold in the previous year (*c.f.* paragraph 30 of the report for that year), and its rental demand of about Rs. 8,000 has been removed from the accounts, but this has been counterbalanced by the income from the "stud lands" referred to above.

Towards the increased demand of the year Allahabad contributes Rs. 1,097, Jhánsi Rs. 5,440, Jalaun Rs. 1,034, Mirzapur Rs. 2,018, and Kumaun Rs. 22,448. In Allahabad the increase is mainly due to a rise in the rental of the Khargapur estate: in Jhánsi it is abnormal, and the greater part of it represents the profits of past years of estates in the tract ceded to Gwalior, which have been paid by the Gwalior Darbár on acquiring the proprietary rights of the British Government (*vide* G. O. No. $\frac{179}{IV-200}$, dated 18th March 1891); while in Jalaun it is chiefly owing to the fact that in 1889-90 the rental of 2 estates was only received for part of the year. The increase in Mirzapur is chiefly due to an enhanced demand in the Dudhi Government estate, including Rs. 683 on account of progressive assessments. The large increase in Kumaun is the result of enhancements in the Bhábar estates consequent on the revision of settlement which is in progress in them.

Including the arrears of the previous year (Rs. 15,270), the gross provincial rental demand amounted to Rs. 7,22,751, of which Rs. 6,99,499 were collected and Rs. 23,252 remained outstanding. Of this sum, Bánda is responsible for Rs. 6,002, Allahabad Rs. 3,750, Jalaun Rs. 1,030, and Gházipur Rs. 10,048. Of the balance in Bánda the

greater portion is again due from mauzas Jaspura and Jauharpur. Rs. 3,734 of the arrears have since the close of the year been remitted, Rs. 1,003 are doubtful, and the remainder, Rs. 1,265, is in course of realization. The special report regarding these villages called for in paragraph 14 of the orders of Government on last year's report was submitted with Board's No. $\frac{2486N.}{IV-136}$, dated 30th September 1891. The entire balance in Allahabad is due from the Khargapur and Sarái Bharat estates. Rs. 1,155 of the amount have since the year closed been struck off (Rs. 735 on account of damage done by hail), Rs. 1,481 are classed as doubtful, and Rs. 1,114 as recoverable. Of the amount outstanding in Jalaun, Rs. 272 have been remitted, Rs. 385 are under suspension, and the remainder is in train of liquidation. The entire balance in Gházipur is due from the stud lands. The amount is large, but the property has only recently reverted to the possession of Government and, as already mentioned, the orders of Government as to management are awaited. The total expenditure amounted to Rs. 3,39,124, *viz.*—

	Rs.
(1) Establishment	68,930
(2) Contingencies	68,263
(3) Improvements	2,01,931
Total ...	3,39,124

The percentage of cost to the rental demand was about 9·5 as compared with 8·2 in the previous year. The increase is principally in Kumaun and the Tarái, where it is due almost wholly to the salary, &c., of the Special Engineer whose employment was sanctioned in G. O. No. $\frac{114}{I-701A.}$, dated 21st January 1891. The expenditure on improvements increased by Rs. 78,024, chiefly on account of a large outlay on water works at Kathgodam and Haldwani in Kumaun and the execution of special original works in the Garhwál Bhábar. On receipt of the orders contained in G. O. No. $\frac{3050}{I-310}$, dated 8th December 1891, the Board called upon Collectors to submit reports of the improvements which they would recommend on the estates in their districts the rental of which amounted to Rs. 3,000 or more. Where the rental is below this sum, it is rarely possible to carry out more than very trifling improvements; but in the large estates the Board are taking measures for increasing the expenditure under this head.

Including the sum of Rs. 59,025 outstanding at the end of the previous year, advances to tenants amounted to Rs. 1,23,281 in the Dudhi estate in Mirzapur and the estates in the Tarái. Of this amount Rs. 60,887 were realized during the period of report, and the remainder will be recovered in due course.

33. At the beginning of the year Rs. 1,169 were due on account of confiscated and escheated land, and during the year 939½ acres of such land were sold for Rs. 13,437 and 18 poles of waste land for Rs. 1,400. The total demand was thus Rs. 16,006, of which Rs. 14,837 were realized, leaving Rs. 1,169 still outstanding. There was no demand for interest. App. A.-XVII.

34. The statement below gives details of the results of the management of this estate. The total demand was Rs. 6,199, and the collections amounted to Rs. 6,119, of which Rs. 5,069 were paid on account of land revenue and local rates, and Rs. 637 were expended on management and other charges. The balance, Rs. 413, was credited in the personal ledger in favour of the estate. The total surplus in the personal ledger at the end of 1890-91 amounted to Rs. 1,797. During the last cold season another attempt was made by the Collector to effect a reconciliation between the zamíndárs, but without success. The estate must therefore continue under direct management for the present. Kharauni estate.

Statement showing the result of management, during the revenue year 1890-91, *of the Kharauni estate in the Ballia district held by order of Civil Court of* 19*th February* 1828.

SEC. XI.—REVENUE DEPOSITS. App. A.-XVIII.

35. In consequence of an error in the treasury accounts of the Dehra Dún district, the number and value of the deposits remaining for adjustment on the 30th September 1890 were shown as 51 and Rs. 4,169 respectively. The error has since been rectified, and the opening balance of the year under report has been corrected to 50 deposits amounting to Rs. 4,168. Thirty-two items, of the value of Rs. 8,125, were received within the year. Rs. 5,657 of the amount deposited during the year were paid on account of revenue arrears in two cases, one of farm under section 159 of the Land Revenue Act, and one of transfer under section 157, by the proposed farmer and transferee. As was remarked in last year's report, this method of payment of the land revenue is now but little used. Details regarding the adjustment of the amounts in deposit will be found in the appendix.

SEC. XII.—PAYMENT OF LAND REVENUE AND MISCELLANEOUS REVENUE BY MEANS OF MONEY-ORDERS. Land revenue remittances.

36. The total number of money-orders issued during the year was 115,691, or 1,378 more than in the previous year, and the sum remitted amounted to Rs. 24,76,720, an increase of Rs. 1,35,964 over the figures of 1889-90. The details by districts are subjoined :—

The merits and defects of the system of remitting revenue by money-orders have been sufficiently discussed in previous reports. It is, in the Board's opinion, a boon to those who have to make small payments of revenue; and, in this respect, it will be sufficient to note the fact of its steady growth in popularity as evidenced by the figures in the table. The system is reported to have worked without friction of any kind, but a serious case of embezzlement was discovered during the period under report. This occurred in the Mardah Post-office of the Gházipur district. The Postmaster was convicted and sentenced by the Magistrate of the district to five years' rigorous imprisonment. A retrial has, however, been ordered by the Judge on technical grounds. Laxity in the supervision of the Postmaster's work appears to have facilitated the embezzlement, rather than any defect in the rules.

All the districts of the Benares Division except Ballia show a decrease. compared with last year, in the amount of revenue remitted by money-orders. The Commissioner remarks—"The cause of this almost general falling off is not due to any decrease in "the popularity of the system, but to a general scarcity of money, as pointed out by the "Collectors of Jaunpur and Gházipur, through poor harvests." Again the largest decrease in both the number of money-orders issued and in value occurs in the Azamgarh district. It is explained by the Collector as follows :—"The decrease is due, I "should say, to the fact that very considerable personal pressure had to be put on zamín-"dárs this year to compel them to pay their revenue, which was doubtless largely paid into "the hands of the peons (a procedure contrary to rule, but one which I am told largely "prevails), instead of being remitted by money-orders." The Collector has been instructed by the Commissioner to put an immediate stop to this improper practice. The use made of the system in particular years for voluntary payment may thus become an index of the condition of the petty landholding community. There has been a considerable increase in the amount of land revenue remitted by means of money-orders in all Divisions except Benares and Gorakhpur, the increase being most marked in the Meerut Division. The system is much appreciated, the Collector of Allahabad observes, "where "the payers of revenue reside at considerable distances from the tahsíl, and in estates "where the co-sharers are numerous and pay their quota of the revenue demand direct." The Collector of Meerut thinks that "a considerable amount of revenue is undoubtedly

"sent by lambardárs to save the trouble of a journey." He adds—"On the other hand, "it is certain that sharers remit a considerable amount of revenue in this way. Lam- "bardárs here do not receive any *hakk-ul-tahsíl*, and consequently they have got into "the habit of increasing the head of village expenses. When the sharers object to "this, they send the revenue by money-order, leaving the lambardár to sue for the "expenses."

Miscellaneous revenue remittances.

37. There has been an increase of 1,908 in the number of miscellaneous money-order remittances and of Rs. 45,665 in their value. The district details are given in the statement below :—

During the year under report this system was confined to payments on account of income tax, excise receipts, canal dues, *i.e.*, owners' and occupiers' rates, ferry dues, and fees and fines in mutation cases. From the 1st October 1891 it has been extended to the other heads of accounts detailed in Circular No. 26—IX, rule 5, and a further increase in remittances of this description may be expected.

Chapter III.—RENT LAW.

SEC. I.—SUITS AND APPLICATIONS. Apps. B.-I, II, IIA., IIB and III.

38. The Rent Law litigation of the year did not differ materially in character from that of 1889-90. Its most noticeable feature is that, for the first time since 1885-86, there is a decrease instead of an increase in the number of institutions compared with the previous year. The litigation, however, was still heavier than that of any year except 1889-90. The annual institutions from the year 1874-75 are given in the table in the margin. It will be seen that the decrease was both in suits and applications; but chiefly in the latter class of litigation.

Year.	Number of suits instituted.	Number of applications instituted.	Total number of suits and applications instituted.
1874-75 ...	59,168	31,939	91,107
1875-76 ...	71,646	35,576	107,222
1876-77 ...	66,599	36,321	102,920
1877-78 ...	72,917	28,955	101,872
1878-79 ...	73,862	40,756	114,618
1879-80 ...	63,710	41,007	104,717
1880-81 ...	68,456	54,229	122,685
1881-82 ...	72,631	86,092	158,723
1882-83 ...	71,681	88,194	159,875
1883-84 ...	72,101	116,546	188,647
1884-85 ...	79,713	134,566	214,279

The statistics of 1889-90, for the Allahabad, Benares, and Gorakhpur Divisions, are those of the districts which now belong to those Commissionerships. The redistribution of districts has done much to equalize the revenue case work of the Divisions. Benares no longer heads the list in respect to the number of institutions; while the addition of the Jhánsi Division to Allahabad has done little to make up for the transfer of Jaunpur. The statistics of 1889-90 for the Divisions of Allahabad and Benares, as they stood in that year, are noted below for comparison :—

	1889-90.
Number of institutions in Allahabad	41,373
„ „ Benares	58,931

The decrease took place in the Rohilkhand, Allahabad, Benares, and Gorakhpur Divisions, being largest in the first named. In Agra and Meerut there was an increase.

39. A classified statement of the suits instituted during 1889-90 and 1890-91 is given below. The only important variations were an increase of 466 in suits connected

with distraint, and a decrease of 943 in suits for arrears of rent and of 251 in suits for profits and settlement of accounts.

Class of suit.	Instituted suits.		Increase.	Decrease.
	1889-90.	1890-91.		
I.—Arrears of rent...	78,112	77,169	...	943

Total ...	86,705	85,967	...	738

The number of suits decreased chiefly in Jaunpur (748), Meerut (505), Ballia (465), Sháhjahánpur (355), Aligarh (339), and Bánda (331). The chief increase occurred in Bulandshahr (976), Muttra (493), Moradabad (383), and Gházipur (335).

There was an unimportant increase under classes II, III, and IV taken together, and a decrease on the whole in suits connected with the recovery of rent (classes I, V, VI, and VII), though a decrease in suits for arrears of rent is partly counterbalanced by an increase in suits connected with distraint; and in suits between members of the proprietary body (classes VIII to XII). The proportions which these different groups of cases bore to the total number of suits are shown in the following table by divisions :—

Division.	Classes I, V, VI, and VII.		Classes VIII to XII.		Classes II, III, and IV.	
	Percentage.		Percentage.		Percentage.	
	1889-90.	1890-91.	1889-90.	1890-91.	1889-90.	1890-91.

Total ...	93·55	93·71	6·29	6·11	·16	·18

40. The majority of suits were as usual for arrears of rent under class I. These formed 89·77 per cent. of the total number filed under all classes, the percentage in the two previous years, 1888-89 and 1889-90, having been 90·88 and 90·09. The fluctuations under class I generally are not such as to require special remark, except as regards the following districts.

In Bulandshahr the increase of 983 is attributed to (1) poor harvests; (2) tenants disputing higher rents found to be payable and recorded by the Settlement Courts; (3) ill-feeling between landlords and tenants, engendered by recent settlement operations. The last two are probably the true causes. In Muttra the increase of 516 is entirely explained by the fact that a Bengali barrister, who is receiver for the large estate of Rája of Paikpara, instituted over 500 suits for arrears, and as this estate is partly

situated in Bulandshahr, the same cause may partly account for the increase in that district also. The decrease in Meerut (580) is attributed to good wheat and sugar crops, combined with high harvest prices, which enabled tenants to pay their rents without difficulty. In Jaunpur there was a decrease of 769. The good advice given by a tahsíldár to tenants, urging them to pay their rents promptly, is mentioned as a partial explanation of the falling off. This reason satisfied neither the Commissioner nor the Board, and further enquiries have been ordered.

41. The question of jurisdiction of Revenue and Civil Courts, referred to in paragraph 41 of last year's report, has recently been decided by the High Court. A copy of the judgment has been applied for, and will be forwarded to Government when received.

42. The question of the effect of the system of payment of rent by money-orders on agricultural relations and on rent litigation, was discussed at some length in last year's report; and in paragraph 17 of the Government review it was directed that the large and increasing numbers of money-orders in Meerut, Etáwah, Bijnor, Moradabad, Bareilly, Budaun, and Cawnpore should receive the special attention of the Board. The fluctuations in the value of rent money-orders, as compared with last year, are shown in the following table:—

Districts.	Total value of rent money-orders.		Increase.	Decrease.
	1889-90.	1890-91.		
	Rs.	Rs.	Rs.	Rs.

Azamgarh	29,028	25,218	...	3,810
Total ...	6,77,948	6,78,829	881	...

It will be observed that the total value of the rent money-orders issued during the year is practically the same as in 1889-90. In most districts there is an increase; but, on the other hand, there is a remarkable decrease in Bulandshahr of more than Rs. 78,000, and the net increase in the province is only Rs. 881. The Collector of Bulandshahr attributes the large falling off to an improvement in the relations between landlords and tenants. He states that tenants are beginning to pay their landlords, as usual, through the agents instead of resorting to the post-office. As has been remarked above, however, in this district there is a considerable increase in the number

of suits for arrears of rent, which the Collector ascribed to ill-feeling and disputes between landlords and tenants. The improvement in agricultural relations therefore is not very evident. Further enquiry is being made as to the cause of the decrease. The Commissioner of Meerut again urges the view, put forward by him last year as Commissioner of Allahabad, that the increased use of rent money-orders is not a cause of increase in the number of suits for arrears: and the Collector of Aligarh attributes the continued decline in his district of this class of litigation to the extension of the money-order system. In Bulandshahr the great falling off in the use of money-orders is coincident with a large increase in the number of suits for arrears; in Meerut, while money-orders have largely increased, suits for arrears have considerably decreased; and in Saháranpur and Aligarh also, where there is an increase in the money-orders, the number of suits for arrears has fallen off. The districts outside the Meerut Division, in which there has been any considerable increase in the value of rent money-orders, are Bijnor (increase Rs. 10,183) and Gorakhpur (increase Rs. 12,192). The returns for these districts also show a decrease in the number of suits for arrears though not a large one. The Board do not desire to lay too much stress on these coincidences; but they show that the extended use of the money-order system for the payment of rent is, at any rate, not necessarily accompanied by increased rent litigation. In the other districts, Etáwah, Bareilly, Budaun, Moradabad, and Cawnpore, in which the Board were directed to pay special attention to the effects of the money-order system, the statistics of rent money-orders do not differ materially from those of the previous year. In Etáwah and Bareilly the value of the money-orders issued has somewhat increased, and the number of suits for arrears of rent has fallen; in Budaun and Moradabad the number of suits has increased, and the amount of rent paid by money-orders has declined; and in Cawnpore, where the value of rent money-orders was practically the same as in the year before, the number of suits for arrears has risen from 3,660 to 3,762. In Cawnpore, suits of this class have been steadily rising in number since 1886-87. The Collector does not consider that the resort to rent money-orders has in any way increased litigation. He points out that the growth of litigation was to be expected, remarking that "every year the number of mahálś is increased and every year villages pass into the hands of money-lenders who have not the same influence over the tenants as the old zamíndárs had and are less inclined to let arrears run on."

43. The use of printed forms of receipt for payment of rent is another matter which has been referred to in previous reports. No very great progress has been made during the year in the introduction of the printed receipt forms, except, perhaps, in the Meerut and Rohilkhand Divisions. In Saháranpur, Muzaffarnagar, Bulandshahr, and Meerut the use of printed receipts is reported to be steadily increasing. In Meerut about 1,400 books were disposed of during the year. No books were distributed in Aligarh, as the supply was not received from the Government Press; but the Collector states that the practice of giving printed receipts is almost universal among the larger landlords, a fact which may have something to do with the continued decline in the number of suits for arrears of rent which has been already referred to. In Rohilkhand the use of printed receipts is said to be more or less general in all districts. In Bijnor these receipts are reported to be making their way even in petty estates, and the Collector states that it is quite common to see the counterfoil book receipts produced as evidence in rent litigation. In Moradabad the forms are said to be generally used. The Collector of Bareilly has endeavoured to extend the use of them among the larger landowners. He reports, however, that the landlords, while they are profuse in their acknowledgments of the utility of the receipts and are quite ready to buy copies to please the Collector, take little real interest in the matter and their *karindas* naturally prefer to give no receipts whatever. In Sháhjahánpur the receipts are used in Court of Wards and attached estates, and many zamíndárs are said to be adopting them. In Pilibhít 130 books were sold against 16 in the previous year, and the supply was exhausted; but the Collector's remark, that the books are not in much request in the district, seems to show that sales were forced, and that, as in Bareilly,

books were purchased to please the Collector. In Mainpuri, Etáwah, and Etah the use of the forms is said to be far from general, though a good example is set by the invariable use of them in Court of Wards estates. In Cawnpore the printed forms have been extensively introduced; but not much further progress has been made during the year under report, and some zamíndárs who had purchased the forms are reported not to have used them. In Fatehpur the use of printed receipts is said to be increasing. In the other districts of the Allahabad Division very little progress has been made; and, as the Commissioner remarks, the reports do not encourage the belief that printed receipts will ever be largely appreciated or extensively used. The Collector of Benares states that zamíndárs will not voluntarily purchase the books, and that the system is not popular. In Mirzapur the system is reported to be gaining ground, but slowly. In Gházipur the receipts are used by some of the large zamíndárs. The Collector of Gorakhpur reports that the zamíndárs do not appreciate the books, and that in many cases those who have purchased them do not use them. In Basti 1,614 books were issued during the previous year, but none during the year under report. In Azamgarh 437 books were sold. In the opinion of the Board, it does not seem possible, for the present, to do more than generally encourage the use of printed receipt forms and to set an example by the continued use of them in Court of Wards and other estates under Government control. It will be long before the illiterate tenant will learn to refuse any but printed receipts, or to demand such receipts for every payment however small.

44. The increase in the provincial total of distraint suits (466) is accounted for by fluctuation in various districts, the only considerable one being in Gorakhpur, where the increase was 49. There it is said that distraint was more freely resorted to as the readiest means of realizing from tenants, in a year of agricultural adversity, whatever it was possible to realize from them at all.

Under no other class of suits are the variations sufficiently great to call for special remark by the Board. Small variations must occur in every district, from year to year, from accidental causes; and the Board do not think that there is any profit to be derived from dealing separately with each of these small differences. It is only where the increase or decrease in litigation under any class is very marked, that it seems necessary to endeavour to ascertain the cause, or possible to make any deduction of value.

45. Altogether there were 91,038 suits for disposal against 92,450 in 1889-90. The number decided was 86,240 against 87,379 in the preceding year, and the pending file at the close of the year amounted to 4,798 against 5,071 at the commencement. The following table shows the manner in which the suits decided in 1890-91 were disposed of, and compares the percentages for the two years 1890-91 and 1889-90:—

	Number.	Percentage on total number decided.

The number of cases in each Division which had been pending for more than three months at the close of the year is shown in the margin. The pending file in Benares of 1,611 cases was no doubt heavy; but, as only 42 of these cases were pending for over three months, it is attributable to numerous institutions during the last quarter of the year. The heavy pending file in the Gorakhpur Division is accounted for by the large number of cases, 525 against 377 last year, which remained undecided in the Gorakhpur district. This is explained by the Collector to be due to heavy institutions in September, and to the absence and illness of a tahsíldár. The Commissioner, however, commenting on the duration of cases in this district, remarks that from what he has seen in cases coming before him in appeal, he thinks some blame is to be attributed to the Courts for unnecessary delays and postponements. On the whole, the average duration of contested cases has risen from 1 month 17 days to 1 month 19 days, while that of uncontested cases has fallen from 27 to 25 days. The following are the only variations which appear to require explanation :—In Dehra Dún an increase in the duration of contested cases from 14 days to 1 month 1 day is ascribed to constant postponements in one suit under class II, necessitated by connected proceedings in the Civil Court. In Jaunpur an increase from 1 month 21 days to 2 months 6 days in contested, and from 1 month 3 days to 1 month 7 days in uncontested, cases was attributed to much of the time of a tahsíldár having been taken up by enquiries in the Sohni indigo factory criminal case. This seems an insufficient explanation of the figures, and further inquiry has shown that the high average duration was also due to dilatory proceedings in the courts of some of the Deputy Collectors, which supervision by the Collector might have checked. The officer who appears to have been most to blame (Saiyid Mehdi Ali) has been called upon for an explanation. In Ballia the duration of contested suits rose from 2 months 16 days to 3 months 13 days, and of uncontested suits from 1 month 21 days to 2 months 4 days. This is attributed to the fact that a Deputy Collector suddenly fell ill and was obliged to leave the district, and that his cases had to be transferred to an already overburdened file. The duration in this district, however, last year even was very high. In Gorakhpur the duration increased from 1 month 10 days to 1 month 25 days in contested, and from 28 to 30 days in uncontested, cases. The Collector's explanation has been partially noticed above. He also attributes the increase in duration to census work, for which patwáris had to be released from attendance in the Courts during some months of the year. As the Commissioner remarks, this cause should equally have applied to Basti and Azamgarh, where there was no such increase. His remarks as to dilatory proceedings in the Gorakhpur Courts have already been alluded to, and there

Benares	... 42	Meerut	... 9
Gorakhpur	... 25	Allahabad	... 8
Rohilkhand	... 20	Agra ...	... 5

appears to the Board to be some foundation for them. In Benares the average duration of suits shows improvement. It was 1 month 25 days in contested, and 1 month in uncontested, cases, as compared with 2 months 2 days and 1 month 1 day last year.

47. The percentage of cases decreed *ex parte* in the Benares Division, 47·07, is high, and for this the Benares district, which returns a percentage of 58·58, is mainly responsible. The high percentage of uncontested cases in this district was remarked on in paragraph 50 of last year's report. This feature of Benares litigation is explained by the Collector to be the result of the relative positions of tenants and landowners in the district. Privileged tenants are very numerous and strong. The zamíndárs are in many cases city bankers, money lenders, and shopkeepers, who never go near their estates and work entirely through agents. There is no social tie between them and their tenants, and a large proportion of the latter refuse habitually to pay their rents except under pressure, and wait till they are sued, although they do not dispute and have no intention of contesting their landlords' claim. The provincial percentages of contested and uncontested cases do not differ materially from those of the previous year. There is an increase in the number of *ex parte* decrees, but the reports show that District Officers, as a rule, have paid due attention to the procedure of their Subordinate Courts in cases of this description. Cause lists are now maintained in all Courts, and a careful scrutiny is generally exercised by Collectors over cases in which there might be a possibility of injustice being done by *ex parte* decisions.

48. The classification of cases as compromised and disposed of without trial has formed the subject of special inquiry by the Board. The procedure in different districts has proved not to be uniform, and the Board have issued instructions that, under the head of "compromised" should be entered only those cases in which the parties attest in Court an agreement between them for the disposal of the case, and that under "disposed of without trial" are to be shown (1) claims withdrawn by the plaintiff as satisfied or for other reasons before hearing and not decided after hearing, and (2) cases struck off for non-payment of fees or stamps, or as plainly barred by limitation, or for other similar causes. These instructions were only issued early in the present year, and therefore could not affect the returns of the year under report.

49. The following statement shows, by classes, the applications under section 95 of the Rent Act which were instituted during 1889-90 and 1890-91. There is a decrease under every class except classes II, VI, XVIII, and XX. The total decrease amounts to 2,479.

Class of application.	Instituted cases.		In-crease.	De-crease.
	1889-90.	1890-91.		
I.—Determination of tenure	241	216	...	25
II.—Resumption of grants	58	78	20	...
III.—Determination of value of crops (section 42)	2,549	2,448	...	101
IV.—Determination of rent (section 42)	75	66	...	9
V.—Compensation for improvements	31	20	...	11
VI.—Enhancement or determination of rent	6,715	7,599	884	...
VII.—Compensation for wrongful dispossession...	162	95	...	67
VIII.—Recovery of occupancy	1,607	1,506	...	101
IX.—Abatement of rent	90	48	...	42
X.—Lease and determination of rent of lease or counterpart ...	132	81	...	51
XI.—Production of patwáris' accounts	1,416	1,189	...	227
XII.—Crop appraisement	1,238	887	...	351
XIII.—Deposit of rent	1,440	1,111	...	329
XIV.—To divide the holding of an ex-proprietary tenant (section 7) ...	199	179	...	20
XV.—To survey land (section 22*a*)	21	20	...	1
XVI.—To declare notice of relinquishment invalid (section 33*a*) ...	613	376	...	237
XVII.—To take out of deposit any amount deposited (section 55*a*) ...	137	79	...	58
XVIII.—Application from a landholder to eject a tenant with rights (section 35)	17,340	17,862	522	...
XIX.—Application from a landholder to have a notice served on a tenant-at-will (section 36)	59,809	57,875	...	1,934
XX.—Application made by a tenant to contest notice under section 39 ...	16,630	16,851	221	...
XXI.—Application by a landholder for assistance to eject a tenant-at-will whose tenancy has ceased (section 40)	36,821	36,259	...	562
Total ...	147,324	144,845	...	2,479

The number of applications filed in 1890-91, as compared with the preceding year, was in each Division as follows:—

	1889-90.	1890-91.
Meerut	33,599	34,701
Agra	18,431	19,413
Rohilkhand	36,187	33,757
Allahabad	15,879	15,317
Benares	21,568	20,880
Gorakhpur	21,660	20,777
	147,324	144,845

	Increase.	*Decrease.*
*Meerut	1,102	...
Agra	982	...
Rohilkhand		2,430
Allahabad		562
Benares		688
Gorakhpur		883
	...	2,479

There has been a decrease in every Division* except Meerut and Agra. The number of applications increased in the following districts, notably in Bulandshahr under classes VI and XVIII, in Basti under class XIX, and in Sháhjahánpur under classes XIX and XXI:—

	Increase.
Bulandshahr	1,251
Basti	1,223
Sháhjahánpur	1,025
Mirzapur	491
Gházipur	475
Farukhabad	416
Agra	325
Jhánsi	270
Muzaffarnagar	232
Etah	225
Jalaun	215

The increase in the Meerut Division occurred chiefly under class VI, enhancement or determination of rent, and that in the Agra Division under class XIX, applications under section 36 of the Rent Act. The classes of applications marginally noted account for 95 per cent., against 94 per cent. in the previous year, of the litigation under section 95 of the Rent Act.

	Per cent.
Class VI.—Enhancement of rent ...	5
„ XIII.—Deposit of rent	1
„ XVIII.—Applications under section 35 ...	12
„ XIX. „ „ 36 ...	40
„ XX. „ „ 39 ...	12
„ XXI. „ „ 40 ...	25
	95

The following table shows the percentage of the total number of applications under each of the above-named classes in each division during the two years 1889-90 and 1890-91:—

Division.	Percentage under class—											
	VI.		XIII.		XVIII.		XIX.		XX.		XXI.	
	1889-90.	1890-91.	1889-90.	1890-91.	1889-90.	1890-91.	1889-90.	1890-91.	1889-90.	1890-91.	1889-90.	1890-91.

50. The classes of applications which call for comment will now be noticed.

Class VI.—The increase under this class last year has been followed by a further increase this year. It occurred chiefly in the Bulandshahr district, where applications for enhancement or determination of rent rose from 464 to 1,640 in consequence of the

close of settlement operations. An increase in the number of applications for enhancement is to be expected in the years immediately succeeding a revision of settlement, as landlords endeavour, not unnaturally, to pass on a portion, at any rate, of the enhanced demand to their tenants. In the districts of Gorakhpur and Basti there has been no very remarkable recourse to this class of applications. In Gorakhpur cases of this description have increased in number; but the total is small, and the Collector states that he expected a much greater increase. Generally, in these districts, rents have been re-adjusted without recourse to the Courts. The applications which have been instituted are mainly due, the Collector of Gorakhpur holds, to cases where rents were fraudulently understated before settlement with a view to obtaining light assessments. Where the tenant has repudiated an agreement to continue to pay a higher rent than that recorded at settlement, and the landlord has failed in establishing the higher rate asserted to be actually paid, he is obliged to have recourse to a regular enhancement.

Class XII.—Applications for assistance in the division or appraisement of crops under section 43 of the Rent Act decreased by 351. They continue to be filed chiefly in Saháranpur, Bijnor, and Moradabad. In two of these districts, Saháranpur and Moradabad, they decreased by 311 and 126, respectively, as compared with last year. The decrease in Saháranpur is accounted for by the numerous commutations of grain to money rents effected by the Settlement Officer. The Collector of Moradabad offers no explanation of the decrease in his district, which is not a very important one.

Class XIII.—The number of applications to deposit rent has decreased in every Division. The only district in which there has been any important increase is Gorakhpur (63), where it is another result of the disputes about rent referred to under class VI. Where the tenant declines to pay a higher rent than that recorded at settlement, he either deposits it in Court or remits it by money-order. The largest decreases occurred in Basti (96), Aligarh (87), and Meerut (43), in all of which there was an increase in the rents remitted by money-orders.

Class XVI.—Applications to declare notice of relinquishment invalid decreased in every Division, except Benares and Gorakhpur, where they were almost stationary.

Class XVIII.—The number of applications under section 35 of the Rent Act for the ejectment of tenants with rights of occupancy increased by 522. The increase occurred in every division except Rohilkhand and Benares. The most noticeable variations were in the districts marginally noted. The determined efforts of the zamíndárs in Bulandshahr to oust their occupancy tenants have led to an increase in that district. A similar reason is assigned for the increase in Azamgarh, where the landlords, taking advantage of the hard times their tenants were passing through, ejected the old tenants whom otherwise they would not have been able to move. The increase in Gházipur in class XVIII as well as in class XIX is the natural outcome of the increased difficulty experienced in getting in rents owing to the badness of the seasons. That in Gorakhpur in class XVIII is attributed to the great number of suits for arrears of rent decreed in the past three years, and to the alleged fact that these applications are in a great measure used as a means of enforcing an agreement to pay enhanced rent. In Allahabad the increase is attributed to the fact that the landlords do their utmost to prevent the acquisition of rights by their tenantry.

Increase.		Decrease.	
Bulandshahr	345	Benares	427
Azamgarh	208	Jaunpur	130
Gházipur	176	Meerut	113
Gorakhpur	163		
Allahabad	149		
Mirzapur	125		
Ballia	100		

The number of notices actually issued under section 35 of the Act, amounted to 17,625, but many of these relate to the 2,889 pending applications of 1889-90, on which action was taken in the year of report. The area affected was 122,897 acres. Ejectment followed in 6,818 cases, or in 38·68 per cent. of the notices issued, as against 36 per cent. of the previous year. The area affected was 43,553 acres compared with 39,815 acres in 1889-90. In the Benares district, where 1,532 notices were issued, 700 ejectments took place—a high proportion. The Collector, in reply to inquiries made by the Board, states that the high percentage of actual ejectment is apparently due to

indifferent harvests and high prices, which have told severely on the financial condition of the tenantry and rendered many of them unable to meet the decrees against them. The facts alleged in explanation, however, obtained in others of the eastern districts, where they were not apparently accompanied by the same results.

The statistics given below of the areas held by the different classes of tenants in 1888-89 and 1889-90, the last year for which figures are available, show that, notwithstanding the large number of ejectments which are made every year, the area held by tenants with rights continues to increase :—

	1888-89.	1889-90.
Total tenant area	20,753,545	20,808,076
Area held under some kind of right	9,938,301	10,066,987
„ by tenants-at-will	10,815,244	10,741,089
„ by tenants for more than 12 years ...	2,592,832	2,800,807

The figures showing the results of the notices issued for each Division during the past two years are given in the following table :—

Division.	Number of notices issued under section 35.		Area affected.		Number in which ejectment took place.		Area affected.		Percentage of cases in which ejectment took place.	
	1889-90.	1890-91.	1889-90.	1890-91.	1889-90.	1890-91.	1889-90.	1890-91.	1889-90.	1890-91.
Meerut ...	2,276	2,515	21,305	23,028	744	984	6,349	7,552	32·69	39·13

Total ...	17,432	17,625	122,791	122,897	6,275	6,818	39,885	43,553	36·00	38·68

Class XIX.—There is a decrease as compared with the previous year of 1,934 in the number of applications for the ejectment of tenants-at-will. 57,875 of these applications were instituted, and they amount to nearly 40 per cent. of the total fresh litigation under section 95 of the Act. The most noticeable fluctuations occurred in the districts marginally noted. All the districts of the Agra Division show an increase except Mainpúri ; and all the districts of the Rohilkhand Division show a decrease except Sháhjahánpur. The decrease in the Rohilkhand Division of 1,329 cases is reassuring, as tending to diminish the apprehensions to which the steady increase up to last year of this class of litigation between landlord and tenant had given rise. The large diminution of 906 applications under section 36 in Moradabad is especially satisfactory. The reason why the number of these applications has continued to increase in Sháhjahánpur, while in the other districts of the Division it has fallen off, is not explained. The result of the inquiries made by the Board regarding the continued increase in the number of applications for the eviction of tenants-at-will in the Rohilkhand Division during 1888-89, with reference to the remarks in paragraphs 19 to 21 of G. O. No. $\frac{1555}{I—310}$, dated the 13th September 1890, (Government Review of the Board's Revenue Administration Report for 1888-89) was reported in Board's No. $\frac{1340N.}{II—140}$, dated 31st July 1891. The following remarks of the Collector of Meerut on the continuous increase under this class of litigation in his district may be quoted as generally applicable :—

Increase.		Decrease.	
Basti ...	689	Azamgarh ...	922
Sháhjahánpur ...	522	Moradabad ...	906
Agra ...	289	Allahabad ...	622
Farukhabad ...	261	Gorakhpur ...	380

Etah ...	114	Cawnpore ...	156
Jalaun ...	105	Bulandshahr ...	137
Benares ...	103	Bijnor ...	124
		Mainpuri ...	111
		Ballia ...	103

" More and more, as rents rise and land becomes more valuable, the battle rages around the acquisition of occupancy rights. The steady increase in this class of work is very remarkable, and every year throws heavier work on the Courts. The addenda to Board's

Circular 4—IX, dated 8th December 1890, have, however, introduced a most important reform, which should much assist the Courts. I would, however, point out the almost physical impossibility of disposing of the vast mass of work in the time required. Notices may be served which have been given into the tahsíl by April 1st. Allowing for delay in service necessary when notices are numerous, objections under section 39 can be filed up to about May 15th. Work may be said to commence on the earlier applications by April 15th. * * As in almost every case there is one adjournment at least, there would be about twelve applications each day before each Court in addition to other work. Considering that, after the notices have been issued and the time has expired there still remains the procedure under section 40, and the actual ejectment of the cultivators from the land by the kurk amín, the whole of June at least is wanted for this, and the contested cases should be completed by the end of May. On the present dates this is impossible, and it is a point well worthy of consideration whether the notices should not be issued between December 1st, and March 1st or a month earlier than now to ensure more satisfactory procedure than is at present possible." This difficulty is a real one. It is scarcely felt in Oudh, where, under the Oudh Rent Act, notice of ejectment must be served upon the tenant on or before the 15th of November. But legislation would be required to alter the dates within which applications for the issue of notices may be filed under the North-Western Provinces Rent Act; and the amendment is one only of several that are called for in that Act. No very clear explanation is forthcoming of the increase in the number of applications for the ejectment of tenants-at-will in Agra, Farukhabad, and Etah. In Etah there has been an increase in the applications in respect to both classes of tenants. The Collector of Farukhabad remarks that the increase in the number of ejectment notices is in no way unsatisfactory, if it can be taken to indicate a greater competition for land which has become more profitable. In reviewing the results of ejectment litigation in the Division generally the Commissioner of Agra writes—"Under the question of ejectment the same fact strikes me as last year, *viz.*, that these suits rise and fall in quantity and in different districts without their variation being attributable to any common cause. Mainpuri is a poor district, so is Etah, and so is Farukhabad in many parts, but their present statistics do not at all correspond as to ejectment. Etáwah is well off and yet (excepting the suits under section 35) it is according to these figures most like Mainpuri: and so in the other cases. It is only by an average of a number of years that any safe conclusion can be arrived at; nor is it, in my opinion, probable that the maximum of litigation in this respect has been nearly reached at present. In the same way we find an increase of enhancement suits in Etáwah and Etah, two very dissimilar districts. Elsewhere there is a decrease, so that it seems impossible to deduce general inferences, such as that there is at any period more or less strain between cultivators and landlords, or that the ejectment clauses have become more or less justifiable. Local causes operate, and beyond the obvious fact that each party is ready to get all the advantage the law can give him, there are no general signs of acquiescence in existing *status*, nor of a general wish to disturb it, exhibited by either party. The distraint clauses also do not, on the whole, to judge from the various Collectors' opinions, prove the existence of any increased pressure. The Collector of Farukhabad, however, desires to abolish this process altogether." In the distressed villages of the Agra Division the difficulty has latterly been, not in getting rid of tenants, but in keeping them. The comparative statistics of notices of relinquishment, however, which will be found in paragraph 55 below, shows that this difficulty is diminishing, and support the view suggested by Mr. Rose that the increase in the number of ejectment notices indicates a greater unwillingness on the part of tenants to give up their holdings. The figures marginally given show the number of notices in Benares during the past nine years. The diminution in the number issued during the last three years as compared with those issued in the three years preceding, is explained by the survey and revision of records which took place in 1882—85. This was naturally followed by an increase of notices. The figures have since returned to the normal average, although they of course vary from

	No. of notices issued under section 36.
1882-83	937
1883-84	563
1884-85	759
1885-86	1715
1886-87	1088
1887-88	1344
1888-89	924
1889-90	860
1890-91	963

year to year. The large increase of applications in class XIX in Basti has not been explained.

Notices were issued on 57,836 applications, and the remainder (39) were struck off for various causes without issue of notices. The area affected by these notices was 282,508 acres. In 1889-90, 59,625 notices were issued, affecting an area of 262,331 acres, so that in the year of report the area affected has increased, although the number of notices has diminished. The statistics for each Division are given below :—

Division.	Number of notices issued in—		Area in acres affected by the notices issued in—		Area in acres affected per notice issued in—	
	1889-90.	1890-91.	1889-90.	1890-91.	1889-90.	1890-91.
Meerut	13,817	13,669	89,691	91,920	6·49	6·72
Agra	8,034	8,645	48,919	52,733	6·09	6·10
Rohilkhand	15,720	14,389	61,620	63,351	3·92	4·40
Allahabad	6,417	6,026	24,338	27,675	3·79	4·59
Benares	6,638	6,721	19,520	25,703	2·94	3·82
Gorakhpur	8,999	8,386	18,243	21,126	2·03	2·52
Total ...	59,625	57,836	262,331	282,508	4·40	4·88

Class XX.—Of the 57,836 notices issued under section 36, the tenants contested under section 39, 16,851 or 29 per cent. as compared with 28 per cent. in the previous year and 27 per cent. in 1888-89. The percentage of contested notices to the total number issued in each Division is compared below :—

Division.	Percentage.	
	1889-90.	1890-91.
Meerut	31	31
Agra	22	22
Rohilkhand	21	24
Allahabad	20	23
Benares	38	37
Gorakhpur	39	42
North-Western Provinces ...	28	29

Of the 16,842 applications disposed of, 12,471, or 74 per cent. as against 73 per cent. in the previous year, were contested. In 7,140, or 57 per cent. against 55 per cent. in 1889-90, the tenants successfully resisted the notice, while they failed in 5,331 or 43 per cent. The percentage of success attained by tenants in each Division in contested cases is given below :—

Division.	Percentage.	
	1889-90.	1890-91.
Meerut	49	46
Agra	50	53
Rohilkhand	58	66
Allahabad	57	59
Benares	55	53
Gorakhpur	62	67
Total ...	55	57

Appendix B.-III shows that the ascertained results of 16,692 notices, affecting an area of 86,017 acres, were as follows :—

	Number of notices.	Area affected in acres.	Percentage on total of notices in which results have been ascertained.	
			1889-90.	1890-91.
Successfully	9,014	45,341	53	54
Unsuccessfully...	7,678	40,676	47	46

The percentage of success or failure in each Division on the total number of notices contested, in which results were ascertained, is compared for the past three years in the following table :—

	Percentage on total of notices in which results have been ascertained.					
	Successfully.			Unsuccessfully.		
	1888-89.	1889-90.	1890-91.	1888-89.	1889-90.	1890-91.
Meerut	50	50	44	50	50	56
Agra	53	45	48	47	55	52
Rohilkhand	54	54	60	46	46	40
Allahabad	54	55	53	46	45	47
Benares	68	55	57	32	45	43
Gorakhpur	60	57	60	40	43	40
North-Western Provinces ...	56	53	54	44	47	46

The number of notices not contested, or in which the results were not ascertained when the year closed, amounted to 41,144, affecting an area of 196,491 acres.

Class XXI.—The number of applications under section 40, which comprise 25 per cent. of the total litigation under section 95 of the Act, has decreased from 36,821 to 36,259, or by 562. The increase and decrease in each Division is shown in the margin. The largest increase occurred in Sháhjahánpur (475), Saháranpur (427), Basti (408), Gházipur (183), Farukhabad (151), Muttra, (149), Muzaffanagar (137), Bulandshahr (125). The increase in Sháhjahánpur, Basti, Gházipur, Farukhabad, and Muzaffarnagar is the natural result of the increase already noted under class XIX. In Muttra, also, there is small increase in the number of applications for the issue of notices of ejectment, and the small increase in class XXI is in no way abnormal. In Saháranpur and Bulandshahr the increase in class XXI accompanies a decrease under class XIX, which is, however, in neither district, considerable. The Collector of Saháranpur attributes the increase in applications under class XXI, for actual ejectment, to the recent settlement; and states that the zamíndárs, who have had the opportunity of inspecting the settlement records, have taken the opportunity of ejecting as many tenants as possible. What, apparently, is intended by this explanation is that applications for the issue of notices were made with a view to actual ejectment in a larger proportion of cases than usual. There were altogether 37,553 of these applications for disposal as against 38,331 in the previous year.

Increase.		Decrease.

Agra ...	385	Allahabad ...	337
Benares ...	113	Gorakhpur ...	464

51 There were altogether 156,328 applications under all classes for disposal, against 158,822 in 1889-90; 143,781, or 91·97 per cent., were decided as compared with 92·73 per cent. in the previous year, leaving 12,547 pending, of which 756, against 488 in 1889-90, were awaiting disposal for more than three months when the year

closed. Of the 143,781 decided cases, 24,399, or 16·97 per cent., were contested and 119,382, or 83·03 per cent., uncontested. Of the former 17,493, or 71·70 per cent., were decided in favour of the plaintiff and 6,906 in favour of the defendant. The uncontested cases were disposed of as follows :—

	Number.	Percentage on total decided without contest.	
		1889-90.	1890-91.
Without trial	81,843	69	69
Compromised..	7,294	6	6
Decreed on confession	957	1	1
„ *ex parte*	24,499	21	21
Dismissed „	3,576	3	3
	118,169		
Add deposit cases disposed of (classes XIII and XVII)	1,213		
	119,382		

The percentage of applications under all classes (excepting those relating to deposits of rent) decided otherwise than on their merits, to the total number disposed of in each Division for the past two years, is compared in the following table :—

Division.	Percentage.	
	1889-90.	1890-91.
Meerut	74	75
Agra	83	83
Rohilkhand	88	88
Allahabad	84	90
Benares	85	85
Gorakhpur	76	75
North-Western Provinces ...	82	82

52. The average duration of contested and uncontested applications has increased slightly, as shown below :—

	Contested.	Uncontested.
	M. d.	M. d.
1889-90	... 2 8	1 6
1890-91	... 2 11	1 8

The districts in which the duration has increased to any appreciable extent were :—

	Contested.		*Uncontested.*	
	1889-90.	1890-91.	1889-90.	1890-91.
	M. d.	M. d.	M. d.	M. d.

Jaunpur	... 2 28	4 4	1 7	1 22
Gházipur,.. ...	... 2 12	3 4	...	...

The high average duration in Saháranpur is due to frequent adjournments having had to be granted owing to census work, and to the Kumbh Mela, which occupied much of the time of the official staff. In Meerut the average duration increased owing, it is stated, to the staff of the district being for some months of the year below its minimum strength. The Collector of Bulandshahr gives the following reasons for the delay in the disposal of applications :—

(1) *Classes VI and IX.*—Cases had to be disposed of on the spot in the cold weather.

(2) *Class XVIII.*—Extra time given to tenants to pay up arrears.

(3) *Chitári* cases pending orders in the settlement appeals to the Board.

In Etáwah, Sháhjahánpur, Allahabad, and Gházipur the duration is raised by enhancement cases which cannot be completed till the cold weather. In Etáwah, out of 241 applications decided with contest, 101 were for enhancement of rent. The Collectors of Budaun, Pilibhít, and Fatehpur, have not explained the high duration in uncontested applications. The duration in contested cases in Jaunpur, 4 months 4 days, is the highest in the province. Explanation has been called for.

53. In paragraph 28 of the Government Review for 1889-90 it was observed that "in Benares the disposal of applications under sections 36 and 40 was extraordinarily slow even in uncontested cases, and practically the whole of the enhancement applications filed during the year were left untouched." There were 186 applications for enhancement filed during 1889-90, while 182 were pending at the close of that year. The remarks were no doubt founded on these figures, which showed that there were nearly as many cases pending at the end of the year as were instituted. The Collector has explained that all the applications were filed in July and August 1890; that four cases were decided within the year ending September 1890, and that the remainder were decided in the following cold weather. Such cases generally require local enquiry by the Courts, and must necessarily, when filed in the hot and rainy seasons, lie over till after the close of the revenue year. The grounds of the adverse criticism of the duration of uncontested cases under sections 36 and 40 in Benares are not apparent, as the duration in these cases was not larger than in many other districts. The average duration has risen slightly in Benares in 1890-91 in contested applications from 3 months 5 days to 3 months 7 days, and in uncontested applications from 1 month 10 days to 1 month 17 days.

54. The Revenue Courts had 247,366 suits and applications for disposal, of which they disposed of 230,021 cases during the year. The pending file has risen from 16,623 to 17,345, and the number of cases awaiting disposal for more than 3 months from 608 to 865. The pending file in the following districts is the heaviest :—

	Pending.
Bulandshahr	2,044
Jaunpur	1,376
Gorakhpur	1,216
Allahabad	1,125

55. This statement of applications other than those under section 95 of the Rent Act has been prepared for the first time. It is submitted in manuscript, an abstract only being printed in the report. The figures for the previous year not being available, no comparison can be made. There were altogether 42,167 applications for disposal, of which 41,811 were disposed of—39,960 without and 1,851 with contest, leaving 656 pending at the close of the year. The classification of cases as "contested" and "uncontested" is not very suitable for some of the applications shown in the statement, as they result in an executive proceeding rather than a judicial trial, and the interest of the statement consists in the extent to which it shows that the different classes of applications are resorted to, rather than the manner in which they were disposed of. Ninety-eight per cent. of the cases for disposal were decided. The largest number of applications was under classes IV (application by tenant for notice of relinquishment to be served on landholder) and VI (application by distrainer for sale of

App. B.-IIA. Other applications and proceedings under Act XII of 1881.

property). These amounted to 18,734 and 21,477 respectively. As the statistics of these two classes of applications are of some importance, the district details are given below:—

District.	Number of applications filed during 1890-91 under—	
	Class IV.	Class VI.

Class IV (application by tenant for notice of relinquishment to be served on land-holder) is of special interest in parts of the Agra Division, as possibly throwing light on the condition of tenants in the deteriorated villages, and the Board have obtained the corresponding figures for the previous year. Every district in the Division shows a diminution in the number of these applications compared with 1889-90, the decrease being largest in Etah, where the number has fallen from 1,365 to 351. For the Division, the total is 3,389 against 4,983 in the previous year, a decrease of nearly one-third. The large reduction in the number of relinquishments is encouraging, indicating, it may be hoped, that the remedial measures employed have begun to take effect in restoring confidence to the tenantry, and in staying the wholesale abandonment of cultivation which has been going on during the past few years.

Applications under class VI are very numerous in Jaunpur. No explanation has been given, and one has been called for. The Collector of Cawnpore points out that in his district the tenants anxious to relinquish their holdings were four times as numerous as those whom the zamíndárs sought to eject under section 36. In reply to inquiries made by the Board, the Collector reports that the largest numbers of relinquishments were in tahsíls Akbarpur, Bhognipur, Narwal, and Ghatampur. These four tahsíls, in fact, account for 1,702 out of the total number. Mr. Bird attributes the

large number of relinquishments to the bad seasons, which have rendered land less valuable and reduced the demand for it, so that even occupancy tenants do not hesitate to relinquish their holdings knowing that they can get land again when they want it. He also states that tenants-at-will agree to give notices of relinquishment in order to save their landlords the trouble and expense of ejecting them. If the explanation is correct, it discloses a somewhat unusual condition of agricultural relations in the Cawnpore district. The Collector will be asked to pay attention to the subject, and to notice it specially in his next year's report. He has arranged to obtain statistics of the number of relinquishments filed by the different classes of cultivators, which will enable him to examine the question more closely during the current year. The number of relinquishments was also large in Moradabad, Fatehpur, Hamírpur, and Allahabad, and inquiry will be made regarding them.

According to the return for the Basti district, the average duration in uncontested cases was 67 days, and in contested cases 157 days. These figures having attracted notice, explanation was called for. The Board are not satisfied with the explanation that has been given, and a closer examination of the facts and further explanation have been required.

SEC. II.—APPEALS. Apps. B.-IV to B.-VII.

56. These statements are as usual submitted in manuscript, abstracts only being printed in the report.

App. B.-IV. Appeals to Collectors from decisions in suits.

The number of appealable suits decided during the year fell from 17,093 to 15,952, a decrease of 6·68 per cent. The number of appeals filed likewise fell from 3,256 to 3,009, or from 19·05 per cent. to 18·86 per cent. of the total number of appealable suits decided. Excluding the appeals summarily rejected, dismissed for default, or otherwise not prosecuted, there were in all 3,190 appeals for disposal, of which 286 were pending at the close of the year. Of the 2,904 appeals decided, the decisions of the Subordinate Courts were confirmed in 1,714 or 59·02 per cent. in 1890-91, against 58·58 per cent. in the previous year; in 710 or 24·45 per cent. they were reversed; in 238 or 8·20 per cent. they were modified, and in the remainder (242) the cases were remanded. The largest number of appeals was contributed by the Gorakhpur Division, though the largest number of appealable suits was decided in the Benares Division.

The following table shows the percentages for each division of appeals filed to appealable decisions passed:—

Division.	Appealable suits decided during—		Increase or decrease.	Appeals filed during—		Increase or decrease.	Percentage of appeals filed to total number of appealable suits decided during—	
	1889-90.	1890-91.		1889-90.	1890-91.		1889-90.	1890-91.
Meerut	2,125	2,131	+6	417	454	+37	19·62	21·30
Agra...	2,580	2,542	−38	540	502	−38	20·93	19·75
Rohilkhand	3,129	2,883	−246	464	364	−100	14·83	12·63
Allahabad	2,105	1,982	−123	265	310	+45	12·59	15·64
Benares	4,019	3,347	−672	745	660	−85	18·54	19·72
Gorakhpur	3,135	3,067	−68	825	719	−106	26·32	23·44
Total ...	17,093	15,952	−1,141	3,256	3,009	−247	19·05	18·86

From the statistics given below (for districts in which the number of appeals was considerable) it will be seen that the appellate work of Collectors was heaviest

in Azamgarh, Gházipur, and Gorakhpur, and that the largest number of appeals was again filed in Azamgarh :—

District.	Number of appeals.	Number of appealable suits decided.	Percentage of appeals filed to total number appealable.
Saháranpur	113	505	22
Bulandshahr	143	726	20
Farukhabad	118	631	19
Etah	147	554	27
Allahabad	121	602	20
Jaunpur	107	871	12
Gházipur	300	1,135	26
Gorakhpur	245	1,263	19
Basti	161	623	26
Azamgarh	313	1,181	27

The percentages of undisturbed decisions in each Division are given in the margin. The provincial percentage is practically the same as in the previous year. These figures include appeals summarily rejected and dismissed *ex parte*. The percentages of confirmations to contested appeals were very low in Muttra and Etah. In the former district the percentage was 39 ; in the latter 36. The Collector of Muttra attributes the poor results of appeals in his district to the work of two probationary Deputy Collectors, one of whom has since resigned and the other has been transferred. The judicial work of two of the tahsíldárs also failed to stand the test of appeal. The appellate statistics of Etah hardly bear out the remark of the Collector that the work of the lower Revenue Courts continues to be of good quality. Low percentages of 43 in Meerut and 32 in Bánda are unexplained. The percentage under each head of disposal for the past two years is compared in the following table for each division :—

	Percentage of undisturbed decisions during—	
	1889-90.	1890-91.
Meerut	63·91	64·00
Agra	71·08	60·00

Gorakhpur ...	3·45	·73	2·70	2·54	52·17	52·79	11·99	8·35	19·19	23·00	10·50	12·59
Total ...	1·13	1·22	3·57	3·26	55·83	56·38	9·20	7·83	22·33	23·35	7·94	7·96

The heavy pending file in Etah (59) is unexplained. In Benares and Azamgarh the number of appeals pending at the end of the year was also large, but a sufficient explanation has been given. In Benares the heavy work which devolved on the Collector in consequence of the riots hindered the disposal of appeals. In Azamgarh the number of appeals to be decided was, as has been already remarked, large, and the Collector was prevented by illness at the close of the year from clearing the file. The average duration rose slightly from 1 month 2 days to 1 month 5 days.

App. B.-V.
Appeals to Collectors from orders on applications.

57. The number of appealable applications decided by Assistant Collectors, 2nd class, declined from 1,517 to 1,195 ; and only 90 appeals, chiefly in the Meerut and Rohilkhand Divisions, were filed.

App. B.-VI.
Appeals to Judges from decisions in suits.

58. The number of appealable suits decided by Collectors and Assistant Collectors, 1st class, appealable to Judges rose from 2,950 in 1889-90 to 3,406 in 1890-91, the increase being in every Division except Agra and Allahabad.

The following table shows the number of appeals filed and the percentage to the total number of appealable suits decided during 1889 and 1890-91 :—

Division.	Appealable suits decided during—		Increase or decrease.	Appeals filed during—		Increase or decrease.	Percentage of appeals filed to total number of appealable suits decided during—	
	1889-90.	1890-91.		1889-90.	1890-91.		1889-90.	1890-91.

Total ...	2,950	3,406	+456	1,008	991	—17	34	29

As usual, the majority of the appeals were from decisions in suits for arrears of rent and suits by co-sharers for share of profits or settlement of accounts. These amounted to 636 and 277 respectively. There were 1,514 appeals in all for disposal by Judges, who decided 912, as shown in the margin; 602 were left pending, 280 of which had been on the file for over three months when the year closed.

		Percentage on total decided during— 1889-90.	1890-91.

The average duration was 7 months against 5 months and 9 days in 1889-90.

Apps. B.-VII(A) and B.-VII(B).
Appeals to Commissioners from orders on applications.

59. The number of applications appealable to Commissioners from decisions by Collectors and Assistant Collectors, 1st class, declined from 23,816 to 22,330, the decrease being chiefly in the Allahabad Division, where 1,188 appealable applications were

decided by the Lower Courts, against 2,380 in the previous year. The following table shows the numbers and percentages under this class of appeals:—

Division.	Appealable applications decided during—		Increase or decrease.	Appeals filed during—		Increase or decrease.	Percentage of appeals filed to total number of appealable applications decided during—	
	1889-90.	1890-91.		1889-90.	1890-91.		1889-90.	1890-91.
Meerut	7,368	7,285	—83	1,002	1,097	+95	13·60	15·06
Agra	2,880	3,035	+155	398	544	+146	13·82	17·92

Total ...	23,816	22,330	—1,486	3,564	3,689	+125	14·96	16·52

In respect to the number of appeals filed, the Meerut Division heads the list, and next comes Benares. The last named Division still shows a large percentage (24·72) of appeals in appealable cases. But in the year of report its percentage was exceeded by that of the Allahabad Division, where 26·68 per cent. of appealable cases were appealed as compared with 13·15 per cent. in the preceding year. The Meerut and Benares Divisions account for nearly half the total appeals for the province. The appellate work of the Gorakhpur Commissioner was also heavy. The Commissioner of Meerut transferred to Collectors for disposal 717 out of a total of 1,290 appeals under section 100(B), Act XII of 1881; he disposed of 267 himself, and 306 were left pending at the close of the year. The number of cases pending seems large, but the Commissioner, in addition to appeals under the Rent Act, disposed of a large number (710) of appeals under Act XIX of 1873. The Commissioner of Benares transferred 129 out of a total of 1,051 appeals to Collectors for disposal. Deducting these and 159 appeals relating to the Jaunpur district, which were decided by the Commissioner of Allahabad (as noted in the foot note to Appendix VIIA), and adding 145 cases decided by the Commissioner of Benares relating to the districts which now constitute the Gorakhpur Division, the Commissioner of Benares decided 770 appeals during the year and had 138 left pending at the close. The Commissioner of Agra out of 749 appeals decided 666; the Rohilkhand Commissioner out of 560 decided 345; the Allahabad Commissioner decided 401 out of 488, as well as the 159 cases relating to the Jaunpur district, which were decided before its transfer to the Benares Division; and the figures for the Gorakhpur Division are as follows:—

Transferred to Collectors by the Commissioner of Benares	154
Decided by the Commissioner of Benares	145
" " Gorakhpur	257
Pending ... "	272
Total ...	828

The heavy pending file in the Rohilkhand Division is accounted for by two long visits which the Commissioner was obliged to make to Rámpur, during which appellate work was in abeyance. The large number of pending cases in the Gorakhpur Division is ascribed to the fact that the Court was closed for 26 days of the year during the Commissioner's absence on privilege leave, when only the current duties of the office were carried on. Altogether the Commissioners had to deal with 3,966 appeals and the Collectors with 1,334 (334 pending from the previous year and 1,000 transferred during the year), making a total of 5,300. Commissioners and Collectors together decided 4,054 appeals, leaving 1,246 pending at the close of the year against 1,611 at the close of 1889-90. Of the appeals pending only 48 were more than three months old at the close of the year. These figures show improvement over those of the previous

year. A larger number of appeals was decided, the pending file was reduced, and the number of appeals pending for more than three months was comparatively small. The number of appeals transferred to Collectors by the Commissioner of Meerut was large; but, as has been remarked above, there was again this year a heavy pending file of appellate work under Act XIX of 1873 (Appendix CXI). In Benares the Commissioner hopes to dispense with the transfer of appeals to Collectors in future. The Board think that, in moderation, transfers are advantageous, as they enable Collectors to acquire a better knowledge of the work done by their assistants. It will be observed that a large proportion of appeals to the Commissioner of Benares was disposed of without hearing the parties under rules 5 and 13, Circular 18—II; 408 were so disposed of out of a total of 1,051 for disposal. In Agra 437 out of a total of 749 were thus struck out. The Commissioner of Benares, Mr. Adams, explains that the number of more or less summary rejections is the consequence of the practice, of the litigious people of the Division, of instituting frivolous and groundless appeals in which the absence of any real ground of appeal is apparent at first sight, and of making allegations in their petitions of appeal which, when the record is examined, are found to be deliberate misstatements of the facts. The Commissioner of Agra, Mr. Neale, reports that the appeals summarily rejected and after a perusal of records were of a simple nature not calling for further investigation.

In the Benares Division, however, it is observed that the proportion of appeals summarily rejected in 1890-91 very considerably exceeded the proportion of the previous year, while authority has under rule 5 of Circular No. 18—II been reserved to the Commissioner to reject appeals summarily, when on the face of the petition it is clear that they cannot be admitted: it has also to be kept in mind that the law in giving the right to appeal to dissatisfied litigants doubtless intended that the appeals should ordinarily be heard in Court before the parties concerned. In the Agra Division the number of appeals summarily rejected was, compared with the Benares Division (including Gorakhpur), comparatively small. But more than half of the appeals otherwise disposed of were rejected under rule B of the Circular No. 18—II on perusal of the records without hearing the parties. This is a proportion very much in excess of that of any previous year. Whether or not there has been any change in the general character of the appellate litigation of the Division in 1890-91 is not explained. But it may be remarked here also that where an appeal is not rejected upon some preliminary point, such as limitation, and the grounds of appeal warrant the record being called for, it ought ordinarily to be decided in open Court in the presence of the parties, or, if the order is for the dismissal of the appeal, in the presence at least of the appellant. In the majority of such appeals disposed of in the Agra Division in 1890-91, this was not the case.

The following statement compares for the past two years the percentages of decisions upheld, modified, reversed, or remanded in appeal in each division :—

Division.	Upheld.		Modified.		Reversed.		Remanded.	
	1889-90.	1890-91.	1889-90.	1890-91.	1889-90.	1890-91.	1889-90.	1890-91.
Meerut	73·64	73·79	4·47	3·64	20·19	19·12	1·70	3·45
Agra	71·43	79·73	4·19	1·95	19·46	14·27	4·92	4·05
Rohilkhand	54·68	61·45	17·54	15 36	18·71	18·55	9·07	4·64
Allahabad	69·33	65·59	7·98	17·70	15·97	15·96	6·72	·75
Benares	77·11	83·40	3·16	2·63	15·66	11·55	4·07	2·42
Gorakhpur	75·79	79·13	4·91	3·56	15·03	10·35	4·27	6·96
Total ...	72·24	75·97	5·82	5·50	17·82	14·85	4·12	3·68

On the whole there is an improvement evidenced by the percentage of decisions upheld. In Allahabad only is there some retrogression in this respect. In Rohilkhand the percentage upheld is low, as it was in the previous year.

Appeals and applications to the Board of Revenue.

60. The judicial work of the Board of Revenue was as follows :—

(*a*) Appeals against orders on applications under section 95, Act XII of 1881—

For disposal	382
Disposed of	338
Pending	44
	M. d.
Duration	2 12

Orders of Lower Courts were disturbed in 77 cases.

(*b*) Revision of orders in applications under section 95, Act XII of 1881—

For disposal	796
Disposed of	754
Pending	42
	M. d.
Duration	1 24

Orders of Lower Courts were disturbed in 114 cases.

(*c*) Revision of orders in suits under section 93, Act XII of 1881—

For disposal	750
Disposed of	664
Pending	86
	M. d.
Duration	1 24

Orders of Lower Courts were disturbed in 114 cases.

(*d*) Appeals against orders under Act XIX of 1873—

For disposal	897
Disposed of	885
Pending	12
	M. d.
Duration	2 25

Orders of Lower Courts were disturbed in 100 cases.

(*e*) Revision of orders under Act XIX of 1873 —

For disposal	623
Disposed of	589
Pending	34
	M. d.
Duration	2 9

Orders of Lower Courts were disturbed in 107 cases.

(*f*) Appeals under Kumaun Regulations and Rules—

For disposal	56
Disposed of	50
Pending	6
	M. d.
Duration	1 1

Orders of Lower Courts were disturbed in 1 case.

(*g*) Appeals under the Regulations of the Family Domains of the Maharaja of Benares—

For disposal	79
Disposed of	71
Pending	8
	M d.
Duration	1 11

Orders of Lower Courts were disturbed in 13 cases.

The total number of cases disposed of by the Board amounted to 3,351 against 2,121 in the previous year. The Board examined records of Lower Courts in 1,515 cases, and in 18 cases parties were heard. The orders of Lower Courts were disturbed in 526 cases, being 15·70 per cent. of the total number of cases disposed of. The pending file at the close of the year was 232 against 605 at the close of 1889-90. The number of cases disposed of during the year shows an increase of 1,230 as compared with the previous year.

App. B.-IX.
Action taken to avert sale of landed property in execution of decrees of Revenue Courts.

61. No applications were made for the sale of a mahál, or of a share of a mahál, in execution of rent decrees, in the Dehra Dún, Pilibhít, Lalitpur, Benares, and Azamgarh districts. Of the remaining districts in which such applications were filed, no sales were held in the districts marginally noted. The number of fresh applications filed amounted to 263 as against 362 in 1889-90, at the end of which year 172 (not 175, as incorrectly stated in the last year's return) were left pending, so that in the year of report 435 applications, as shown in the margin, had to be dealt with by the Collectors, the largest number (35) having again been filed in the Aligarh district. Two hundred and ninety-nine applications were disposed of. Arrangements by which sale was averted were made by the Collector in 87 cases, and 212 cases were reported to the Board for sanction to sale. In three of these execution was barred by limitation. Of the 209 cases in which sale was sanctioned by the Board, it took place in only 76. The following is a detail of the 133 cases in which sale did not take place :—

Muttra, Mainpuri, Bareilly, Sháhjahánpur, Jhánsi, Mirzapur, Gházipur, and Basti.

	Number.
Meerut ...	... 103
Agra ...	... 89
Rohilkhand	... 74
Allahabad	... 133
Benares ..	... 27
Gorakhpur	... 9
	435

(1) Cases in which decree was satisfied and fresh bond executed	36
(2) Sale postponed for want of bidders or at decree-holder's request or at Civil Court's request	45
(3) Struck off at decree-holder's request	21
(4) Cases in which dates for sale after close of year were fixed	31
Total ...	133

The number of pending cases has decreased from 172 to 136.

App. B.-X.
Summary and regular suits.

62. The following statement of suits instituted in 1889-90 and 1890-91 shows that litigation increased in the districts of Kumaun and Garhwal, while it was stationary in the Tarái :—

District.	Summary suits instituted in—		Regular suits instituted in—		Total summary and regular suits instituted in—	
	1889-90.	1890-91.	1889-90.	1890-91.	1889-90.	1890-91.
Kumaun	192	297	749	778	941	1,075
Garhwál	214	301	457	642	671	943
Tarái	44	47	51	48	95	95
Total ...	450	645	1,257	1,468	1,707	2,113

There were altogether 2,506 suits for disposal; 2,106 were disposed of, leaving 400 pending, of which 129 were awaiting disposal for more than three months when the year closed.

The following table shows how the decided cases were disposed of. Of the cases decided with contest, judgment was given in favour of the plaintiff in 65·74 per cent as against 60·81 per cent. in 1889-90 and 62·73 per cent. in 1888-89 :—

	Number.	Percentage on total disposed of.	
		1889-90.	1890-91.
(1) Without contest—			
(*a*) Without trial	573	31·5	27·21
(*b*) Compromised	242	10·6	11·49
(*c*) Decreed on confession	50	2·6	2·37
(*d*) Decreed *ex parte*	32	·8	1 52
(*e*) Dismissed *ex parte*	59	2·3	2·80
(2) With contest, including cases referred to arbitration—			
(*a*) For plaintiff	756	52·2	54·61
(*b*) For defendant	394		
Total ...	2,106		

The 400 pending cases belong to the districts named below :—

	Pending on 30th September 1891.	Pending for more than three months.
Kumaun	182	72
Garhwál	215	57
Tarái	3	...
Total ...	400	129

The duration in the Kumaun district has increased while it has improved in the other districts of the Division, especially in the Tarai, where this year no suits for ouster were instituted.

App. B.-XI, Appeals to Senior Assistant Commissioners from decisions in summary and regular suits.

63. This appendix is blank.

App. B.-XII. Appeals to Commissioner from decisions in summary and regular suits.

64. Three hundred and four appeals against 285 last year were instituted in the Commissioner's Court : adding to these the 80 appeals which were pending from 1889-90, there were 384 altogether for disposal; 308 were decided, leaving 76 pending, of which 33 were pending for more than three months when the year closed. The appeals decided were disposed of in the following manner :—

	Number.	Percentage on total disposed of.	
		1889-90.	1890-91.
Summarily rejected	70	23·9	22·8
Dismissed for default	5	2·1	1·6
Confirmed	140	46·3	45·5
Modified	9	7·1	2·9
Reversed	42	13·5	13·6
Remanded	42	7·1	13·6
Total ...	308		

The average duration of appeals was 5 months as compared with 4 months and 8 days in the previous year.

SEC. III.—DEPOSITS OF RENT. App. B.-VIII.

65. Particulars regarding the adjustment of rent deposits during the year are given in Appendix B.-VIII. All that it appears necessary to explain is that, owing to mistakes in the accounts of the previous year in the Dehra Dún, Allahabad, and Basti districts, the number and value of the items in deposit at the beginning of the year has been corrected from 1,015 deposits, amounting to Rs. 26,058, to 993 deposits, amounting to Rs. 25,679. The decline in the number and value of rent deposits, which has been remarked on in former reports, continues.

Chapter IV.—GENERAL.

SEC. I.—COERCIVE PROCESSES. App. C.-II. (*a*) Minor processes (writs of demand, section 151 ; arrests and detentions, section 152 ; distress and sale of movable property, section 153).

66. The subjoined table gives the comparative figures of the number of processes of each description issued during the years 1889-90 and 1890-91 :—

	1889-90.		1890-91.	
	Number.	Arrears for which issued.	Number.	Arrears for which issued.
Writs	52,897	12,608,306	55,002	14,508,392
Arrests...	6,980	1,045,600	7,188	1,211,925
Attachment of movables	13,967	1,155,508	10,831	1,102,261
Sales of movables	277	71,846	368	80,608
Attachments under section 154	559	269,877	386	173,643
Transfers under section 157	20	2,273	28	2,090
Annulment of settlement under section 158 (farm) ...	4	1,524	30	20,961
" " " (direct management).	9	10,391	1	2,505
Sales	6	6,660	2	4,786
Total ...	74,719	15,171,985	73,836	17,107,171

It will be observed that there is a decrease in the total number of processes, but an increase in the total arrears for the realization of which coercive measures were employed. In the minor processes there was an increase in the number of writs and arrests, while attachments of movables were fewer. The noticeable point in the statistics of the severer measures for the recovery of arrears is the greatly diminished resort to attachments under section 154, accompanied by an increase though by no means a corresponding increase, in the cases of transfer under section 157 and annulment of settlement under section 158. Sale under section 166 is only carried out in exceptional cases, of which there were two during the year. The increase in the minor processes, to some extent and in some districts, indicates greater difficulty in the realization of the land revenue. In a greater measure it is the result of the substitution of legal for irregular methods of collection, and the enforcement of greater punctuality in payment. The large decrease in the number of cases of attachment of movables is evidence that the demand was not collected with undue severity; while, in those districts in which the character of the seasons was most unfavourable, and the resources of the people were seriously tried, coercive processes of all kinds were, on the whole, more sparingly resorted to than usual. The Collectors generally exercised a judicious discrimination, and refrained from pressing for the punctual payment of the land revenue in cases where unpunctuality was due to a real want of money and not to contumacy or improvidence. Of the districts of the Meerut Division, the largest increase in minor processes issued is in Aligarh, where the number of writs rose from 1,571 to 1,995, and there was also an increase compared with the previous year in arrests, detentions, and distress and sale of movable property. The increase here points to some difficulty in the revenue collections in a part of the district. It pertains almost exclusively to the Aligarh, Sikandra Rao, and Khair tahsíls, which suffered from floods in the rains of 1890, and where suspensions of revenue till the rabi of 1891 were granted.

It is satisfactory to notice that the enhanced land revenue assessed at the recent revision of settlement of the Saháranpur and Bulandshahr districts has not been productive of any serious increase in the number of coercive processes. In the former district there was an increase of 135 in the number of writs, and there were more arrests and attachments of movables than in the previous year; but only two arrests were followed by detention, and in no case was the attached property brought to sale. In Bulandshahr the increase in the number of writs was only 37, while other minor processes decreased. In neither district were the severer processes resorted to at all; and in both the enhanced land revenue, which exceeds the former revenue by over Rs. 9,00,000, was collected punctually and without difficulty. The Collector of Saháranpur, where the year of report was the first in which the increased revenue became payable, observes that "in spite of the increase in the coercive processes there can be no doubt that the newly assessed revenue was collected without difficulty. It was collected within the year, and it was not found necessary to sell any distrained property, and only two defaulters were detained for a very few days."

The number of writs increased in every district of the Agra Division, the increase being largest in Mainpuri and Etah. In Muttra and Farukhabad the number of arrests and detentions also rose considerably.

The Collector of Farukhabad reports that he found much irregularity in the procedure connected with the collection of revenue, and that the increase in the number of writs (116) and warrants of arrest (178) is due to his insisting that the tahsíldárs should employ the legal processes instead of resorting to informal notices and irregular detentions at the tahsíl. Mr. Rose explains that the issue of every process has been under his control and subject to his sanction, and that no undue severity has been exercised.

In Mainpuri, where the increase in the issue of writs (389) was largest, the revenue is reported to have been collected with more than usual difficulty. The Collector states that the indifferent harvests "told severely on the petty, and for the

most part impecunious, proprietors, who own the bulk of the district." An enhanced demand for water rate also necessitated the issue of a larger number of coercive processes. The Collector of Etah (where writs increased by 332 and attachments of movables by 335) remarks that he has occasionally during the year had to restrain the excessive zeal of tahsíldárs in recovering arrears from indigent proprietors of deteriorated villages. "At the same time," he continues, "the increase of coercive processes cannot be regarded as a proof of undue severity, and I am emphatically of opinion that firmness in collection of land revenue is necessary for the future in the deteriorated villages where a fair revenue has been fixed: otherwise a tendency to get out of hand will certainly result with consequences harmful both to the Government, and ultimately to the villagers themselves." The Board have expressed, in paragraph 12 above, their agreement with the view thus stated; and, as was there remarked, they have little doubt that, for some time to come, the collection of the revenue in the districts of the Agra Division, in which liberal reductions of revenue have been given on account of deterioration, will be a difficult task, and will require great firmness and discrimination. Under circumstances such as led to the revision of the assessments which is now coming to a close, relief is, almost of necessity, more likely to be given where payment of revenue is sturdily refused, than where the landholder pays as long as he can anyhow find the money. This fact has been grasped by the proprietors of the deteriorated tracts, and it is this fact which will make collection of revenue in those tracts a difficult task for years to come.

In the Rohilkhand Division there are no considerable variations in the statistics of the minor coercive processes compared with those of the previous year, except as regards writs of demand, the number of which rose considerably in Bareilly and Budaun. The increase in Bareilly (548) is mainly due to strict orders issued by the Collector to all tahsíldárs to confine their procedure to the authorized processes, and partly to the increased activity in the collection of arrears of takávi advances. "The general tendency," Mr. Connell remarks, "is still too much in the direction of delayed action, and processes will have to be increased and enforced with sharper pressure before the desirable punctuality of payment is attained." The falling off compared with the previous years in the number of writs issued in Budaun in 1889-90 was remarked on in paragraph 78 of last year's report, and was there attributed to the employment of irregular methods of collection. At the commencement of the year of report the Collector issued stringent orders to tahsíldárs on the subject, with salutary effect, as the following figures for the past three years will show :—

Writs of demand issued in	1888-89	...	...	403
„	1889-90	...	...	215
„	1890-91	...	...	463

In the Allahabad Division, Cawnpore shows an increase in all the minor processes. Writs rose by 406, arrests by 153, and detentions by 64. The causes assigned by the Collector are inferior harvests following on a succession of unfavourable seasons; the injury done to the crops in four parganas by hailstorms; and, as regards writs and arrests, the substitution of legal for illegal methods of collection, Mr. Bird remarks that tahsíldárs appreciate more and more every year that they must not have recourse to irregular processes for realizing the land revenue; and that, instead of sending for a defaulter and "giving him permission to remain at the tahsíl," they issue a warrant for his arrest. The Commissioner states that he had no knowledge, when Collector of Cawnpore, of the prevalence of the illegal method of detention referred to. The character of the seasons doubtless rendered the collection of the revenue in Cawnpore less easy than usual. The cases of attachment of movable property increased from 219 to 469, and, as Mr. Bird truly says, "the increase in the number of attachments must be looked upon with more regret than the increase in the number of warrants for arrest. The increase under the latter head may, in a great measure, be attributed to a change in procedure; but the necessity for the attachment of movable property points to the depressed condition of the zamíndárs; and, though sale only took place in 30 cases, it

is not known in how many cases the defaulters had to borrow money to release their property from attachment." It is not quite clear how the damage caused by hail-storms should have rendered a larger resort to coercive processes necessary; as, in all cases where the damage was serious, substantial remissions of revenue were granted. But the foregoing statements of the Collector, taken in connection with the facts noticed above in paragraph 55, indicate a condition of agricultural affairs in certain portions of the Cawnpore district that is not altogether satisfactory and calls for the Collector's attention.

Another district in the Allahabad Division in which the increase (264) in the number of writs issued was comparatively large is Lalitpur. It was not, however, accompanied by any increase in arrests or sales of movables, and is accounted for by the issue of stringent orders for the discontinuance of informal notices. In one tahsíl the tahsíldár recommenced the issue of *hukmnámas*, but the Collector reports that the practice has been entirely stopped. One of the persons employed to serve these *hukmnámas* admitted to the Collector that he used to receive two annas from the landowner for the service of one of these informal orders, and that on these payments he made his living.

In Jalaun the number of writs issued has fallen from 740 in the previous year to 434. The Collector explains that it was the practice of the tahsíldárs to issue, on the first day the instalment fell due, as many writs as the staff of *mazkuris* employed allowed of. The discontinuance of this practice naturally caused a diminution in the number of writs issued. There is nothing noticeable in the returns for the other districts of the Allahabad Division, except that, again, the number of writs in Jhánsi is almost identical with the number of mahál in default. The Collector refers to the mistaken practice in his district of counting the same mahál twice over when writs have been issued both for the kharíf and rabi instalments; and he has issued orders to secure the more accurate preparation of the return in future. The Board remarked on the matter last year, and the return for the year under report should have been prepared correctly.

In the Benares Division, two districts, Jaunpur and Ballia, show an increase in the number of writs of 129 and 254 respectively, accompanied in Jaunpur by an increase in arrests (87) and detentions (31) and in Ballia by a small increase in all the minor processes. The rise in writs and warrants of arrest in Jaunpur was principally in the Kerakat tahsíl, where the collection of the revenue, owing to the large number of petty proprietors, always gives trouble, and where there was more difficulty than usual during the year of report. There was, however, considerably less resort in this district to attachment of movable property than in the previous year. In Ballia there was exceptional difficulty in realizing the Government demand, as the late and scanty rains of 1891 led the people to apprehend a scarcity, and to expect that remissions and suspensions of revenue would be granted, and many withheld payment till the last moment when all anxiety was removed. The injury done to the kharíf crops by the floods of 1890 doubtless added to the difficulty of collection. The Commissioner reports that the Collector issued orders to his tahsíldárs to treat the people with consideration, and that there is no reason to suppose that any undue severity was employed in the collection of the revenue. In the Benares district the revenue was got in, on the whole, with less difficulty than in the preceding year, and there was, in consequence, a falling off in the number of coercive processes. The large decrease in Gházipur of 741 writs, 81 arrests, and 55 detentions is due to a different cause. In some districts an increase in dastaks and arrests is explained by the exceptional character of the seasons: in Gházipur a different view of the situation was taken, and coercive measures were very sparingly resorted to. It is remarked by the Collector that "after two very indifferent harvests, the failure of the rains brought the district to the brink of famine, and it was impossible to employ coercion to enforce punctual payment from zamíndárs who could get hardly anything out of their tenants."

In the districts of the Gorakhpur Division there was a large decrease in coercive processes compared with the previous year, as the following figures will show :—

	Writs.		Arrests.		Detentions.		Distress.		Sale of movables.	
	1889-90.	1890-91.	1889-90.	1890-91.	1889-90.	1890-91.	1889-90.	1890-91.	1889-90.	1890-91.
Gorakhpur	5,087	3,919	83	46	48	33	305	292	17	25
Basti	1,689	1,167	193	208	46	42	639	748	7	26
Azamgarh	11,496	9,917	5,017	5,069	178	440	7,943	4,549	8	21

All three districts suffered from the floods of 1890, and the harvests were inferior. In Gorakhpur coercive processes were used sparingly and with caution in the case of petty landlords and poor members of the community, especially in the flooded tracts. As the Collector remarks, in a year of distress, when unpunctuality is due to inability to pay, "it is useless and harsh to go on multiplying writs of demand, and so increase the amount due from the defaulter." The Collector of Basti writes—"Owing to the anticipation of a scarcity, I in many instances allowed payments of the revenue to be postponed; but, on the rains breaking in regularly, the arrears were rapidly collected." It is satisfactory to notice that, notwithstanding these postponements and the unfavourable seasons, the whole of the enhanced revenue assessed at the recent revision of settlement of the Basti district was collected within the year, with the smallest number of processes for the smallest sum of arrears in the division. In Gorakhpur a small balance remained uncollected at the close of the year; but the distress caused by the floods there was greater than in Basti, and the Collector wisely refrained from putting undue pressure on the people in order to be able to show a clear balance sheet.

The large number of writs and other processes issued in Azamgarh was remarked on in last year's report. In 1890-91 there was a considerable decrease in writs and attachments of movables, but the number of coercive processes still seems abnormal; and 70 per cent. of the arrests and 42 per cent. of the cases of distress of movable property in the province belong to Azamgarh. The entire statistics of the processes for the recovery of the land revenue in this district show great pressure upon the land-holding population during the year, and indicate want of assets. The district was evidently, as the people complained when the Senior Member visited it, badly off.

In Kumaun the number of writs rose from 912 to 1,904, and in Garhwál from 109 to 1,226. In Kumaun there was also an increase in arrests and attachments of movables, although no actual detentions or sales took place. The large increase in Kumaun is accounted for as follows :—"It was last year explained that pressure was not put on revenue-payers affected by the then prevailing scarcity. During the year under report such leniency was unnecessary, and at the same time the scarcity had left behind it a legacy of indebtedness. Hence a rise both in the number of writs issued and the sum demanded under them." The majority of the number of writs served in Garhwál were for the realization of arrears of loans under the Agriculturists' Loans Act, made last year to people suffering from the prevailing scarcity. In this district a common, if not the usual, arrangement of realizing arrears was not to issue a writ at all, but to send off in an informal way a process server, who returned to the tahsíl with the arrears and his fees. The Senior Assistant Commissioner has been doing his best to put a stop to this irregular procedure. His action in this direction, and the enforcement of punctual payment, as the zamíndárs were in a position to meet the Government dues, owing to the excellent rabi crop, account for the abnormally large increase in the number of writs.

The largest number of writs issued in any single mahál for a single kist was two, as in the preceding year. The longest period of detention on a warrant of arrest was 18 days; while the provincial average was the same as in 1889-90, five days. The detention for 18 days occurred in one case in the Bharthna tahsíl of the Etáwah

district. It is more than the full term allowed by section 152 of Act XIX of 1873, and the tahsíldár has been called on by the Collector for an explanation of his illegal procedure.

It will have been seen from the above remarks that the practice of employing irregular methods of collection instead of the authorized processes has not been entirely stopped, and that constant vigilance on the part of Collectors is required to prevent tahsíldárs from returning to their old habits. Such vigilance has been generally exercised; and attempts to revive the system of informal notices and illegal detention, when detected, have been firmly put down.

Process fees.

67. The increase in the number of writs issued naturally resulted in a corresponding rise in the demand for process fees. Including arrears of the previous year, the demand amounted to Rs. 41,553, compared with Rs. 40,013 in 1889-90. Of this sum Rs. 40,933 were realized, leaving Rs. 620 outstanding. The establishment charges aggregated Rs. 22,171. There was therefore a net surplus of Rs. 18,762. No extra establishment was entertained in the Meerut, Bulandshahr, Bijnor, Budaun, and Tarái districts, where for years the work has been done by the ordinary tahsíli staff, or in Basti, where in the preceding year an extra establishment costing Rs. 601 was entertained.

(b) Attachment of shares and pattis under section 154.

68. The number of cases in which action was taken under section 154 of Act XIX of 1873 declined from 559 in 1889-90 to 386 in the year under report. Agra, as usual, heads the list with 132 cases, but the number is much smaller than in the preceding year, when 238 estates were attached. In Etáwah 80 maháls, shares, or pattis were attached during 1890-91. The bulk of them belong to three large landowners, the Rája of Partapner, the Rája of Bhareh, and the Chaudhri of Bishangarh, all of whom are notorious for their backwardness in paying the Government revenue. In the other districts of the Agra Division there is a large decrease in the number of attachments. The Collectors of Farukhabad and Mainpuri urge the futility of action under section 154 as a means of recovering arrears of revenue. The Collector of Mainpuri states that he has not attached a single estate since he took over charge in March 1890; and the Collector of Farukhabad has avoided recourse to attachment except as a preliminary to severer measures. The latter officer has been able to clear some of the attached estates by obtaining sanction to sale. No sale has taken place; but the arrears have been satisfied and the estates released; and the effect on the proprietors of other estates has been to induce them to discharge the demand against them and obtain the release of their estates from attachment. The Commissioner, referring to this question, writes—"Mr. Rose finds that the mere threat of farm is far more effectual, and I am aware that he has followed this plan himself with signal success. Under the cover of the attachment forced upon him, a reckless zamíndár may easily collect rents in advance or give false receipts for rents really uncollected, and thus leave Government helpless in the face of a large arrear." Mr. Rose's view is supported by the results of attachment in the Agra district, where, as was remarked at page 9 of the report for 1889-90, this measure proved utterly unsuccessful as a means of liquidating arrears. When a landowner can pay, but will not, there is no reason why a Collector should burden himself with the management of his property unless there is an immediate prospect of clearing off the balance due. Where the arrear is due to deficiency of assets, attachment is only useful as a means of ascertaining the true condition of the estate, with a view to the adoption of remedial measures if any are found to be required.

In the Allahabad Division, Cawnpore shows the largest number of attachments. As above remarked, the condition of parts of this district does not appear to be prosperous, though why this is so the reports do not explain. In two of the estates held under attachment the land revenue exceeds the rental, and the liquidation of the arrears is problematical. The condition of these estates has formed the subject of special inquiry. In the newly constituted Benares Division there were 79 cases of attachment, compared with 113 in the previous year. Fifty-four of these were in Jaunpur and 23 in Ghazipur. The 54 maháls in Jaunpur all belong to the Rája of Jaunpur. Attachment was

made preliminary to annulment of settlement and farm, but the arrears were paid up before proposals for these further measures could be submitted. The mismanagement of the former owner was remarked on at page 12 of the last report. Under the present owner endeavours are being made to improve the management. In several cases in Ghazipur the zamíndárs applied to have their estates taken under attachment under section 154 of Act XIX of 1873, and, the Collector states, "were glad to pay 10 per cent. in order to be freed from pressure for their revenue, and to have their rents collected from the tenants." Mr. Wells adds that it was necessary to refuse some of these applications. All such applications should have been refused, as Government cannot be expected to manage estates for the benefit of the proprietors. In many instances reported to the Commissioner for information it was found that the arrears were trifling and release was ordered, the amounts due being recovered by ordinary means. In Kumaun the number of attachments rose from 4 in the preceding year to 72. The reasons for the increase in this and other processes for the realization of the revenue have been given in paragraph 66.

(c) Transfers under section 157.

69. In 28 cases the rights and interests of defaulting co-sharers were transferred for various periods for arrears amounting to Rs. 2,090. Sixteen of the cases belong to two mahál in the Lalitpur district.

(d) Annulment of settlement under section 158.

70. The settlement of 31 mahál, compared with 13 mahál in the previous year, was annulled for various periods: 30 of the mahál have been farmed and one has been taken under direct management: 16 of the farmed mahál—15 in Etáwah and 1 in Mainpuri—belong to the well known defaulter, the Chaudhri of Bishangarh. The Collector of Mainpuri feels confident that the annulment of settlement and farm has taught the Chaudhri a lesson which he will not be slow to profit by.

(e) Sale under section 166.

71. Two estates, as against six in 1889-90, were sold for arrears, amounting to Rs. 4,786; both were in the Hamírpur district. The sale proceeds of one mahál were sufficient to meet the amount outstanding against it, as also the sums due from two other mahál owned by the same proprietor. The other property was put up to sale, and for want of bidders was purchased on behalf of Government for a nominal sum.

App. E.-XI. Estates managed direct under section 159.

72. There were 31 estates under direct management during the year under report, against 29 estates in 1889-90. Including arrears of previous years (Rs. 20,020), the rental demand amounted to Rs. 64,536, of which Rs. 41,695 or 64·6 per cent. were collected, leaving Rs. 22,841 outstanding. Nearly the whole of this sum is due in Bánda (Rs. 3,367), Hamírpur (Rs. 3,310), Jalaun (Rs. 10,129), and Azamgarh (Rs. 4,541). Rs. 1,578 of the arrears in Bánda are due from deceased, absconded, or pauper tenants and will be duly removed from the accounts. The amount shown against Hamírpur includes a sum of Rs. 3,067, which has since been remitted: Rs. 4,434 of the balance in Jalaun have also been remitted since the close of the year. The remainder is in train of liquidation, and efforts will be made to recover as much as possible in 1891-92. The arrears in Azamgarh could not be recovered within the year owing to the miscellaneous kharíf crops being totally destroyed. The Collector hoped to realize a considerable portion of the outstandings after the sugarcane was pressed. The charges of management were—

	Rs.
Establishment	2,406
Contingencies	694
Improvements	577
Total ...	3,677

The percentage of the cost of management to the total rental demand was 3·7 per cent., as in 1889-90. Of the sum of Rs. 577, spent on improvements in Bánda, Rs. 300 were laid out on the construction of 11 small embankments, Rs. 257 on digging a tank, and Rs. 20 on repairs to a well and a house.

73. The total number of recorded transfers in 1890-91 amounted to 116,103 as compared with 117,857 in 1889-90. The figures for the several classes of transfers are given in the following statement :—

Year.	Sale by order of Court.						Private transfers.								
	Revenue-paying lands.			Revenue-free.	Number of other cases.	Total number of cases.	Revenue-paying lands.			Revenue-free.	Number of succession cases.	Number of mortgage cases.	Number of redemption of mortgage cases.	Number of other cases.	Total number of cases, columns 8, 11, 12, 13, 14, and 15.
	Number of cases.	Revenue of property.	Price.	Number of cases.			Number of cases.	Revenue of property.	Price.	Number of cases.					
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
		Rs.	Rs.					Rs.	Rs.						
1889-90 ...	3,116	1,67,716	19,19,716	133	1,164	4,413	15,101	4,35,127	97,52,803	972	79,566	7,796	2,948	7,061	113,444
1890-91 ...	3,010	1,31,584	18,27,803	95	1,170	4,275	16,681	4,97,202	1,03,14,898	925	75,528	8,209	3,266	7,219	111,828
Increase or decrease.	−106	...	...	−38	+6	−138	+1,580	...	...	−47	−4,038	+413	+318	+158	−1,616

The most important variations are a decrease of 4,038 in the number of succession cases, an increase of 1,580 in private transfers of revenue-paying lands, and an increase of 413 in mortgage cases. The price of land sold by order of Court rose from 11 to 14 years' purchase of the revenue assessed or estimated. In cases of private alienation the price remained almost at the same number of years' purchase of the revenue assessed or estimated as last year.

The chief variations in the figures under private transfers are given below :—

District.	Number of sales of revenue-paying and revenue-free lands.		Number of succession cases.		Number of (*a*) mortgage cases, (*b*) redemption of mortgages, and (*c*) other cases.	
	Increase.	Decrease.	Increase.	Decrease.	Increase.	Decrease.

Jaunpur	78	...	212	...	...	...
Gházipur	...	239	...	4,139	...	81
Ballia	...	239	...	520	...	...
Gorakhpur	156	...	443	...	...	115
Basti	114	...	1,051	...	145	...
Azamgarh	140	...	353	...	559	...
Kumaun	343	...	...	744	...	...
Garhwál	...	160	...	1,220	...	...

The following variations only are of sufficient importance to require special notice. A large increase of private sales in Saháranpur is ascribed mainly to the cessation of settlement operations, during which transfers were at once recorded in admitted cases by the Settlement Officer. In other cases, owing to the absence of the patwáris in the settlement offices, the information required to enable the record of transfers to be made was not obtainable until the year of report. The same explanation applies to increases under the other heads. The variations in Kumaun have not been explained. The general decrease in succession cases appears to be mainly due to the healthier character of the year. In Bulandshahr an increase under all heads is probably attributable, as in Saháranpur, to the closing of settlement operations. The large decrease in succession cases in Gházipur is attributed to the fact that the record of transfer is now made mahálwár instead of mauzawár. Last year the list of cases was also swelled by a number of old successions which should have been registered before. The Collector believes that the khewats have now been brought fairly up to date, and that successions are reported more regularly as they occur. In Benares the Director's Circular No. 4P., dated 16th September 1890, by which three months from the date of succession is allowed before the institution or proceedings in cases not reported by the patwáris, is held responsible for a reduction in succession cases. This cause would only operate during the first year of the introduction of the rules of the circular. The question was alluded to in paragraph 89 of the Board's report last year. In Ballia it is reported that the figures are now normal, those of the previous year having been raised by the distress caused by the floods. In Garhwál the cause of decrease is said to be an idea prevailing amongst the people that transfers will be registered at settlement, and that it is therefore unnecessary to report them in advance. In Cawnpore the increase in succession cases is attributed to mortality from fever and the discovery of old unregistered cases. The increase under the same head in Basti is not explained. In Agra, Farukhabad, Mainpuri, and Etah the increase appears to be due generally to more careful reporting, and to investigations in the course of special settlement proceedings.

The amount levied as penalty for the neglect of the provisions of section 97, Act XIX of 1873, was Rs. 50,679 as compared with Rs. 46,029 in the preceding year. The district details are given in the following table:—

Division.	District.	Number of cases.	Amount of penalty.
			Rs. a. p.
Meerut ...	Dehra Dún	9	14 8 0
	Saháranpur	1,274	1,329 8 0

	Total ...	9,687	4,764 8 0
	GRAND TOTAL ...	51,122	50,679 7 9

The difficulty of realizing these penalties, chiefly because of the smallness of the sums to be collected, continues to be a subject of complaint and is specially alluded to by several Collectors, among others by the Collectors of Meerut and Gorakhpur; and the Board are disposed to think that no fees should be levied in cases in which, the mutations having been duly reported by those concerned, the land revenue or "annual value" of the transferred property is less than Rs. 50.

The supplementary statement to Appendix C.-III has been discontinued under the orders conveyed in G. O. No. $\frac{3081}{\text{I—765A.}}$, dated 14th December 1891.

The following statements show the sales of fixed rate tenures by order of (1) Civil Courts and (2) Revenue Courts :—

* Rs. 3,075 is the amount of encumbrances known to exist on seven holdings.

Mr. Crooke, the Collector of Mirzapur, writes—"I took occasion, during the annual tour, to make enquiries as to the alienation of proprietary and cultivating tenures throughout the district. Sale and mortgage prevail largely in the Gangetic valley, and especially in Bhadohi, where the Mirzapur and local mahájans seem to be acquiring increased influence. The mahájan has even penetrated as low south as Dudhi, and I was obliged to report one case there for annulment of settlement." This has been sanctioned by the Board.

During the year 12 cases of sale were sanctioned by the Board for arrears of loan instalments under the Jhánsi Encumbered Estates Act (XVI of 1882). In 9 cases (in 5 of which sale was sanctioned in 1890) sale actually took place; the entire share was sold in 5 cases; half the share in two, one-fourth in one, and fifteen-sixteenths in one; 8 cases were otherwise disposed of, by payment of the instalments in arrears, or by discharge of the entire debt; and none remained pending at the close of the year. The Collector reports that the collection of arrears under Act XVI of 1882 gives an amount of trouble altogether disproportionate to the sums due; and he fears that when the history of the working of the Act comes to be written, it will be found that the ultimate amount of good it has conferred will be small in comparison with the hopes that were entertained when it was passed. He observes—"The cases in which direct and immediate benefit followed to the landlord were the comparatively rare ones in which the money-lender had been in usufructuary possession of the mortgaged property, and in which an equitable settlement resulted in the reinstatement with a clear title of the original proprietor. In few of the other cases has the money-lender been defeated. He has advanced sums on simple bond to the landlord, assisted him to pay off the instalments of the loan, and when the property has been freed, has either induced the landlord to sell it to him, or if the latter demurred, has sued on the bond and taken out execution against the immovable property. The problem of retaining landed property in the hands of the old proprietors, by any means less drastic than by suspending the sale provisions of the Civil Procedure Code, is as far from solution as ever. The Jhánsi landlord cannot live without credit, and as long as debt involves sale of his land, the money-lender must sooner or later oust him, whatever artificial obstructions are interposed." It is to be feared that the conclusion contained

in the last sentence of the Collector's remarks quoted above is correct; but the Board are of opinion that at any rate the Act did this much good, that accounts between zamíndár and money-lender were settled on an equitable basis, which was not always the case when matters were left to the ordinary Civil Courts. Short of confiscating the money-lender's capital, however, it was impossible to give him less than the sum he had actually advanced and fair interest thereon. The real mistake dates from the time when saleable interest was given to the Jhánsi landlords. If the Jhánsi Encumbered Estates Act had taken away the right of sale from all landlords who could only pay their debt by the aid of Government loans, it would have done much more good than it has done. It is also to be regretted that under legal necessity the Government was unable to withhold the right from the landholders of the territory lately incorporated in the Jhánsi district by transfer from Gwalior.

SEC. III.—PARTITION. App. C.-IV. (Renumbered owing to discontinuance of former Appendix C.-IV.)

74. The disposal of partition work continues to receive special attention from the Board, by whom periodical returns of the work done are received and carefully scrutinized. The total number of partitions, perfect and imperfect, for disposal was practically the same as last year. It was distributed and disposed of in the several Divisions as shown in the following table :—

	Number for disposal.	Disposed of.	Number of partitions carried out.	Pending at close of—	
				1890-91.	1889-90.
Meerut	618	291	199	327	273
Agra	398	295	204	103	182
Rohilkhand	849	508	379	341	339
Allahabad	504	294	205	210	230
Benares	226	117	68	109	110
Gorakhpur	861	470	328	391	561
Kumaun	482	337	162	145	127
Total ...	3,938	2,312	1,545	1,626	1,822

The pending file at the close of the year, as compared with that of 1889-90, was thus reduced by 196; and it is satisfactory to observe that the largest reduction was effected in the Gorakhpur Division, where the work was most behindhand. In 1,545 cases, against 1,324 last year, partition was actually carried out, an increase of 221; while the number of cases disposed of altogether increased by 195. In applications for perfect partition there was a decrease of 228. The decrease, as is shown by the following table, was greatest in Allahabad and Gorakhpur, though occurring in all Divisions except Meerut :—

	Filed in 1889-90.	Filed in 1890-91.	Increase.	Decrease.
Meerut	287	301	14	...
Agra	224	203	...	21
Rohilkhand	518	497	...	21
Allahabad	330	239	...	91
Benares	116	115	...	1
Gorakhpur	388	283	...	105
Kumaun	7	4	...	3
Total ...	1,870	1,642	...	228

On the other hand, imperfect partitions, as is shown in the next table, increased by 82 :—

	Filed in 1889-90.	Filed in 1890-91.	Increase.	Decrease.
Meerut	25	44	19	...
Agra	16	13	...	3
Rohilkhand	57	13	...	44
Allahabad	34	35	1	...
Benares	1	1	...	...
Gorakhpur	3	17	14	...
Kumaun	256	351	95	...
Total ...	392	474	82	...

The decrease in Rohilkhand is mainly due to Budaun. As already shown, the amount of work done in the province exhibits a considerable improvement. The increase in the pending file in the Meerut Division is mainly due to Muzaffarnagar (71) and Meerut (121). Partition work was stopped in the greater part of Muzaffarnagar owing to settlement operations; and though the work in Meerut under this head is shown to be particularly heavy, the pending file has only increased by four cases.

In the Agra Division the pending file has fallen from 182 to 103, owing to an improvement in every district. In Rohilkhand the pending file remains practically as before, and it is a very heavy one. The number of cases disposed of, 508, was, however, large. In the Allahabad Division, there has been a marked reduction (from 75 to 45) in the pending file in Cawnpore. In the Benares Division, the file in Jaunpur has been reduced from 59 to 47, but has remained more or less stationary in other districts. In the Gorakhpur Division the pending file is the heaviest in the province. It stands thus :—

Gorakhpur	190
Basti	102
Azamgarh	99
Total ...	391

against 561 in 1889-90. The greatest improvement was in Basti, where pending cases were reduced from 248 to 102. The number of cases completed in Gorakhpur was nearly three times as large as the year before. The progress made in the Gorakhpur Division in the disposal of partition work is thus considerable, though there is still a great deal to be done. The Commissioner (Mr. Ferrar) remarks that much of the difficulty and unprofitableness of partition work arises from the fact that the record of each case is not kept up systematically, and that European officers do not keep up in their own hand a complete running record of every step in the proceedings. Rule 30 of the Partition Circular (No. 27—II) distinctly prescribes a record of the character referred to by the Commissioner, who should, as far as possible, see that the rule is carried out. In the Kumaun Division the pending file shows an increase from 127 to 145. Except in the Tarái, the work in this Division consists of imperfect partitions. The number of cases disposed of in Kumaun and Garhwál was larger than in the preceding year; but, as the Commissioner remarks, there is still much room for improvement in this branch of revenue business. Owing to partitions, the number of mahâls has increased from 112,270 to 115,551.

With the approval of Government the Board are now trying, as an experiment, in Meerut, Cawnpore, and Gorakhpur, the plan of employing amíns paid by a fixed salary instead of by fees. This question, as well as that of the reduction in other districts of the staff of amíns, so as to allow of each man getting a proper share of work and pay, has formed the subject of separate correspondence. Endeavours are also being made to secure a more competent class of amíns by subjecting them to examination. Under the revised rules, it is now permissible to employ on partition work the patwári of the circle, when it is thought advisable.

SEC. IV.—ADVANCES UNDER THE LAND IMPROVEMENT LOANS ACT.

Apps. C.-V and C.-VI.

75. There was a sensible increase in the number and amount of applications for advances bearing interest sanctioned during the year as compared with the previous year, although they were below those granted in 1887-88 and 1888-89. The figures for the last four years are as follows :—

			Rs.
1887-88	505	applications for	92,354
1888-89	534	„	80,993
1889-90	290	„	56,811
1890-91	326	„	73,034

The rise is traceable mainly to the Meerut and Agra Divisions. In the former Division 45 applications for Rs. 11,100 were sanctioned as against 21 for Rs. 3,790 in 1889-90. Rs. 3,550 were granted in Bulandshahr, and the Collector anticipates more applications now that the settlement operations have closed in that district. Rs. 6,750 were also sanctioned in Aligarh. In Muzaffarnagar no applications were again received for loans. The Collector's explanation is the usual one, that this is one of those districts in which it is not the fashion to take such advances. On this the Commissioner comments—" It will continue to be the fashion in Muzaffarnagar not to take advances for land improvement until the District Officer selects the tracts and villages which are most unprotected from drought or most exposed to floods, in which old tanks, embankments, drainage or irrigation channels and wells have fallen into disrepair, concentrates attention on those tracts, and personally persuades the people to restore here and there some such old work or undertake a new one. In a highly irrigated district like Muzaffarnagar there is less scope for land improvement by advances than elsewhere, but it is impossible to suppose that there is no scope for it or that it is right that the Act and rules should remain a dead letter here." The fact that settlement operations have been going on in the Muzaffarnagar district for the last few years has probably had some effect in deterring the people from applying for advances for the purpose of making improvements : but now that those operations are practically concluded, the Collector may usefully take action on the lines indicated by the Commissioner. In the Agra Division, 116 applications for Rs. 22,494 were sanctioned as compared with 87 for Rs. 13,499 in the previous year. Here the districts generally show liberal advances. The largest sums were granted in Agra (Rs. 4,274), Mainpuri (Rs. 4,395), Etáwah (Rs. 5,890), and Etah (Rs. 5,585). The Government directed that advances should be liberally given where they appeared likely to be of benefit in the tracts of this Division in which a revision of assessment has been in progress, and the matter has not been lost sight of by the District and Settlement Officers. The Rohilkhand Division shows even worse results than in the previous year. In Bijnor and Budaun loans amounting to Rs. 2,250 were allowed. In Pilibhít, as was noted in the report for 1889-90, advances are not likely to be applied for, owing to the ease with which irrigation is obtained from earthen wells which are dug at a small cost.

In the reconstituted Allahabad Division 108 applications, aggregating Rs. 29,121, were sanctioned. No advances were made in Jalaun, and in Jhánsi the amount sanctioned, Rs. 1,500, was inconsiderable. Advances are not likely to be numerous in Jhánsi till the settlement is over ; but in Jalaun the tahsíldárs are believed to have

shown a lack of interest and energy in the matter. The Commissioner remarks that the personal interest of the Collector goes a long way to make tahsíldárs active. The remark is one which may be applied equally to not a few other districts where advances are small or are not made at all. In Cawnpore Rs. 5,032 were advanced as against Rs. 10,700 in 1889-90. The Collector, at the time of writing his report, expected that the full budget grant for his district would be utilized by the end of the present financial year. He added, in explanation of the comparatively small sum advanced for improvements, that larger loans were necessary under the Agriculturists' Loans Act. The advances made in Fatehpur amounted to Rs. 5,060 as against Rs. 1,100 in 1889-90, and the Collector has instructed tahsíldárs to afford every facility to applicants seeking loans. In Bánda Rs. 7,731 were given out as compared with Rs. 5,207 in the previous year, but more than half this amount was advanced to a single wealthy zamíndár. The Board concur in the following remarks made by the Commissioner on the subject of such advances :—" It is doubtful whether the Act contemplated advances to men who should be able to help themselves. Encouragement should rather have been given to zamíndárs who, while willing to improve their property, had not the money to do so. It saves trouble no doubt, and reduces risk, to make advances to rich men, but I myself do not consider this was the intention of this liberal measure of legislation." Hamírpur shows a further decrease during the year of report, the amount advanced having been Rs. 3,766 as against Rs. 5,175 in 1889-90. This is a district in which there has been a steady falling off of late years. The personal attention of the Collector is required here as elsewhere to this important subject. No explanation has been offered as to the few and small advances made in the Allahabad district. In the remodelled Benares Division, Rs. 6,325 were advanced in Jaunpur and Rs. 300 in Ballia. In the year before the advances in the former district amounted to Rs. 3,648. The increase during the year under report is evidence of the interest taken in the matter by the Collector. The causes assigned, doubtless correctly, by the Collector of Ballia for the paucity of loans in his district are as follows :—" The northern and southern portions, being liable to inundation by the Ghogra and Ganges, are not suitable for improvements. In the central portion the land is owned chiefly either by great landowners who do not require advances or by coparcenary bodies of independent small co-sharers who, if they act separately on their own shares, can only carry out very petty works. They might combine to carry out larger works common to several shares, but as a matter of fact they will not, and any attempts to do so would probably result in litigation." The Commissioner is of opinion that these causes, described as existing in Ballia, operate, to a considerable extent, in Mirzapur, Benares, and Gházipur, where no advances were made during the year of report. Taking the Collector of Ballia's remarks as a basis, the Commissioner promises during the current year to endeavour to go more systematically into the question in conjunction with the Collectors of his Division.

In none of the three districts composing the new Gorakhpur Division were any advances made in 1889-90. In the year under report Rs. 319 were sanctioned in Basti, and Rs. 970 in Azamgarh. What has been said of the Benares Division is probably equally applicable to much of the Gorakhpur Division.

The sum of Rs. 1,055 shown as having been advanced without interest was made over to the Public Works Department for the carrying out of the excavation of the Karon nadi and the Somna drainage cut in the Aligarh district, referred to in paragraph 95 of the report for the previous year. These works have now been completed, and no further disbursement will be necessary on account of them. It may be noted here that the balance of undisbursed instalments of sanctioned advances brought forward in column 3 of Appendix C.VI is less by Rs. 825 than the sum shown in columns 19 and 23 of Appendix C.VII to the report for 1889-90, and that brought forward in column 5 is Rs. 70 less than the amount exhibited in columns 21 and 25,

This is due to the fact that sanctions to the disbursements of instalments aggregating these amounts were withheld in the Etáwah, Bánda, and Azamgarh districts.

76. Including the arrears of the previous year, which amounted to Rs. 2,83,532, the total outstandings on account of principal were Rs. 3,51,852. Of this amount Rs. 1,05,146 fell due. The collections aggregated Rs. 96,476, or 91·75 per cent., leaving Rs. 8,670 still in balance. Above 64 per cent. of this amount is owing in Muttra (Rs. 1,014), Agra (Rs. 1,000), Etah (Rs. 1,013), and Bánda (Rs. 2,634). The arrears in the first three districts are attributed to poor harvests. The balance due in Muttra is payable by two persons whose movable property has been distrained, and it is expected that the amount will be shortly realized. Of the arrear in Etah Rs. 70 have since been recovered, and Rs. 165 are doubtful. The reason for the balance in Bánda is explained by the Collector to be that the zamíndárs paid what they could towards their land revenue, and allowed their takávi to fall into arrears. The demand for interest was Rs. 28,208. Of this Rs. 15,690 were collected and Rs. 12,518 remained outstanding. About 66 per cent. of this amount is due in Bánda (Rs. 6,344) and Hamírpur (Rs. 1,864). Much of the balance outstanding is on account of advances which have not yet become due. App. C.-VII.

ADVANCES UNDER THE AGRICULTURISTS' LOANS ACT.

77. This appendix has been substituted for Appendices C.IX and C.X of the report for 1889-90. It is in the form of the quarterly statement prescribed in Board's Extant Circular No. 5A—IV, and is according to the revenue year. This change was in 1880 desired by Government (*c.f.* G. O. No. 1583, dated 15th September 1880). App. C.-VIII.

The advances shown in Appendix C.X to the previous year's report were for the financial year ending 31st March 1890, while the amount entered as having been advanced in column 4 of the present appendix is for 18 months, *viz.*, from 1st April 1890 to 30th September 1891. It is impossible therefore to institute any comparison between the two sets of figures. The largest sums were advanced in the Divisions of Agra (Rs. 1,47,553), Kumaun (Rs. 1,12,763), Allahabad (Rs. 91,659), and Gorakhpur (Rs. 68,763). The amount in the first of these Divisions was advanced principally in the tracts comprising the deteriorated villages, to which reference has repeatedly been made in the earlier sections of this report, as one means of aiding their recovery. Of the sum advanced in the Kumaun Division Rs. 1,06,710 were distributed in Garhwál alone, where scarcity prevailed in 1890. In the Rohilkhand Division a sum of Rs. 40,938 was advanced in four districts, no loans having been made in Moradabad and Pilibhít. In these two districts no loans were made in the previous year also, and the Commissioner's remarks on the subject were quoted in paragraph 99 of last year's report. This year the Commissioner remarks that "the exceptional circumstances of the year rendered such advances necessary, and they were freely given for seed and bullocks and for the repairs of ravages caused by the floods." This being so, the fact that no advances were given in Moradabad and Pilibhít, though they reached considerable sums in the adjoining districts of Bareilly (Rs. 14,637) and Sháhjahánpur (Rs. 21,405), required explanation. In the not very prosperous circumstances of the year, the amount advanced in the Benares Division, Rs. 49,681, appears somewhat inadequate. The Commissioner adheres to his former opinion, that such advances are not popular in his Division generally. The poorest record is that of the Meerut Division, where only Rs. 9,179 were given. The Commissioner remarks that this amount is "so insignificant in comparison with the size and populousness of the districts, and the scope which exists for giving help of this kind to the agricultural class, as to show that the District Officers and the Assistant Collectors give practically no time to this branch of revenue work." The Board are not prepared to say that loans to a larger amount could not have been granted with advantage in the Meerut Division, but in considering whether the District Officers have neglected their duties in this respect, the circumstances of the people should not be lost sight of. In some of the Meerut districts, as for instance Bulandshahr,

the condition of the cultivators is one of exceptional prosperity, and they probably need the assistance of loans to a smaller extent than agriculturists in other parts of the province.

Including the balance of previous years (Rs. 2,15,423), the total demand on account of principal amounted to Rs. 7,35,958. Out of this sum Rs. 3,94,180 fell due, of which Rs. 3,32,870, or 84·45 per cent., were collected, leaving Rs. 60,310 in arrears. Of these arrears over 83 per cent. are due in Farukhabad (Rs. 16,641), Cawnpore (Rs. 2,330), Bánda (Rs. 2,562), Jalaun (Rs. 2,680), Gorakhpur (Rs. 18,780), and Azamgarh (Rs. 7,553). The existence of these balances is generally attributed to indifferent harvests; and, in Azamgarh, to the disastrous floods.

Inclusive of the arrears of previous years (Rs. 4,116), the total demand on account of interest was Rs. 34,490, of which Rs. 22,964 or 66·58 per cent. were realized, leaving Rs. 11,526 in balance. Nearly 74 per cent. of this amount is owing in the districts mentioned above and in Basti, and is accounted for by the reasons already stated.

SEC. V.—LAND REVENUE ADMINISTRATION. App. C.IX.

78. The form of this appendix has been modified; and owing to the discontinuance of Appendix C.IV and the substitution of one appendix (C.VIII) for Appendices C.IX and C.X, its number has been altered from C XI to C.IX. The number of maháls has increased from 119,287 in 1889-90 to 121,947 in the year under report. All the divisions have contributed towards this increase, which is mainly the result of partitions. The enhanced land revenue assessed at the recent revision of the regular settlement in Saháranpur raised the gross land revenue demand of that district from Rs. 11,83,504 in 1889-90 to Rs. 14,57,867 in 1890-91, or by Rs. 2,74,363. The increase in the provincial gross land revenue demand is, however, Rs. 1,87,939 only, as shown in this appendix. This is due to the gross land revenue of Gorakhpur having been shown in the district return of 1889-90 as Rs. 24,74,229. In the appendix for 1890-91 it is shown as Rs. 23,73,686, which represents the correct gross demand of the year under report. The difference is under the head "Rental demand of state properties," in which in 1889-90 receipts from reserved forests appear to have been wrongly included. The number of cases instituted during the year has risen to 1,008,011, an increase of 8,295. The most noticeable increases were in Saháranpur and Garhwál, while the largest decrease took place in Gházipur. The variations between the figures of the two years in the several districts have been sufficiently explained in the district reports, and the explanations need not be repeated. Including the undisposed of cases at the close of 1889-90 (71,790, not 71,742 as stated in the last report), the total number of cases for disposal was 1,079,801 against 1,065,342 in 1889-90. There was a corresponding increase in the number of cases disposed of, *viz.*, 1,008,654 compared with 993,600 in the previous year: 71,147 cases were pending on the 30th September 1891. The receipts and issues in the Board's Office amounted to 23,469 and 19,372 respectively. The question of strengthening the district establishments, on account of the steady increase in the work which the English offices have to dispose of, is under special inquiry, and the inadequacy of the staff of the English office of the Allahabad Commissioner is again urged, and with added force since the amalgamation of the Jhánsi Division. Proposals for increasing the establishment of the Allahabad Commissioner's office are under the consideration of Government.

SEC. VI.—ARRANGEMENT, INSPECTION, AND WEEDING OF REVENUE RECORDS. App. C.-X.

79. This statement has been recently revised, Appendices C.XII and C.XIII having been amalgamated under the sanction conveyed by G. O. No. $\frac{3081}{1\text{-}765A.}$, Revenue Department, dated the 14th December 1891.

The number of files which should have been sent into the record room during the year under report was 973,560, or 14,451 less than in the previous year—938,658 files were actually deposited in the record room, and 34,902 files remained to be sent in. The work done was somewhat less than in the previous year; but there

is always a certain proportion of cases which cannot be disposed of immediately, and, in most districts, the arrears are sufficiently explained. The districts which exhibit comparatively large arrears are Saháranpur, Meerut, Aligarh, Muttra, Farukhabad, Etah, Moradabad, Sháhjahánpur, Pilibhít, Benares, Jaunpur, and Gházipur. The balance of files shown against Saháranpur is principally due to the applications for copies which were filed in large numbers on the breaking up of the settlement office: a very large portion of the arrears is reported to have been cleared off since the close of the year. In Meerut and Aligarh the balances fell short of those of the previous year by 612 and 165 respectively. Of the 2,153 files shown in hand at the close of the year in Meerut, nearly half have since been sent into the record room, and the remainder consist chiefly of cases under section 40, Act XII of 1881, which await receipt of "dákhalnámas" from tahsíldárs. In Farukhabad, Sháhjahánpur, Benares, and Jaunpur the balance has increased as compared with last year. Almost all the files remaining in Ghazipur have been deposited in the record room since the close of the year. Of the 3,068 files shown against Moradabad, 2,060 have been sent into the record room since the year closed, and the remaining 1,008 are chiefly records of income tax and ejectment cases decided only in September last. These cannot be sent into the record room till orders for ejectment, refund, and so on have been reported as carried out. In the other districts mentioned as showing large balances there has been either a reduction of the previous year's balances or the balances have remained practically stationary. The arrears largely consisted, as in past years, of ejectment and mutation cases, which, as already explained, cannot be sent to the record room until receipt of reports of actual execution of orders.

Of the 938,658 files actually sent into the record room, all but 7,388 were duly registered and arranged, and many of those remaining are reported to have been registered and arranged since the close of the year.

Turning to the inspection and weeding of records, it will be noticed that there were 130,672 bastas in the vernacular record rooms of Collectors' offices. Of these, 117,849 or 90 per cent., were inspected and weeded in accordance with the rules, and 12,823 remained when the year closed. The records of 23 districts, consisting of 72,836 bastas, were completely inspected and weeded during the period under report. The districts showing a comparatively large number of bastas still unweeded are Muzaffarnagar, Muttra, Bareilly, Budaun, Cawnpore, Bánda, Jalaun, Gházipur, and Gorakhpur. As reported last year, the *old* records dating from 1857 are being weeded at Muzaffarnagar according to the rules contained in the Board's revised Circular No. 1—IX. The work of the Burhana and Muzaffarnagar tahsíls, of one pargana of the Kairana tahsíl, and of the sadr kulliat has been finished. The weeding of records of the remaining parganas of the Kairana tahsíl is being pushed on, and that of the Jansath tahsíl will be taken up as soon as Kairana is completed. In Muttra the weeding work has again been retarded owing to the receipt of mauzawár and patwáris' records from three tahsíls, but the Collector has taken measures for expediting the clearance of arrears. The heavy arrears in Bareilly are reported to be due to the fact that after about 900 bastas had been weeded from 1st October 1890 to 30th April 1891, it was found necessary, owing to an incorrect order passed by the officer in charge of the record room, to weed them over again. It is hoped that the weeding of the 3,817 bastas remaining will be completed by May next. The state of the record room at Budaun has engaged the special attention both of the Commissioner and the Board. Its condition was by no means satisfactory, but it is now being gradually got into good order. The weeding work in Cawnpore and Lalitpur was much behindhand, and the arrears have not been explained by the Collectors. The results of the weeding work done in Bánda during the year of report compare favourably with those of the preceding year. The balance in Gházipur, it is observed with regret, is attributed to bad work in former years. Extra weeders have been sanctioned, and the Collector is personally attending to this matter. In Gorakhpur the balance this year is attributed to an increase in the number of bastas to be weeded.

SEC. VII.—APPEALS UNDER ACT XIX OF 1873.

App. C.-XI.

80. This appendix corresponds to Appendix C.-XIV of the last year's report. The total number of appeals filed during the year was 5,044 as compared with 5,986 in the previous year. The divisional details are shown in the margin. The total number for disposal, including 891 appeals of the previous year, was 5,935, of which 5,194 were disposed of, leaving 741 pending at the close of the year. The heaviest file was in the Meerut Division, where the total for disposal was 1,712, of which 745 appeals were disposed of by Collectors and 710 by the Commissioner. Of the appeals remaining at the end of the year, 85 were pending for more than three months.

	Instituted during—	
	1889-90.	1890-91.
Meerut	2,485	1,428

Gorakhpur	305	548
Kumaun	285	304
Total ...	5,986	5,044

The details of the cases pending in the Collectors' and Commissioners' Courts are given in the margin. The oldest cases pending were in the Gorakhpur Commissioner's Court (19th July 1886), Kumaun Commissioner's Court (28th October 1889), Bulandshahr Collector's Court (10th November 1890), Agra Commissioner's Court (19th November 1890), and Rohilkhand Commissioner's Court (29th November 1890). The cases in the Gorakhpur Commissioner's Court and Bulandshahr Collector's Court have since been disposed of.

SEC. VIII.—CERTIFICATES OF ADMINISTRATION IN BEHALF OF MINORS SUCCEEDING TO LARGE LANDED ESTATES.

81. No expenditure was incurred by Collectors in respect of obtaining certificates of administration on behalf of minors under section 4, Act XL of 1858.

SEC. IX.—MISCELLANEOUS.

82. It is generally reported that the record fund rules have worked satisfactorily during the year under report.

Territorial changes.

The only territorial changes during the year are those consequent on the re-arrangement of divisions, which have been noticed in paragraph 3 of this report.

Property made over to the Collector under section 504 of the Civil Procedure Code.

83. No estates were made over to the Collector, under section 504 of the Civil Procedure Code.

Boundary pillars.

The Superintendent of Dehra Dún reports that one of the pillars on the Taroch border has been injured by the people of Taroch. The matter is the subject of correspondence between the Superintendent and the Deputy Commissioner of Simla, who is the Political Agent for Taroch. The boundary pillars on the Rámpur border in the Bareilly and Moradabad districts are in good condition. The boundary pillars in Pilibhít, which were washed away, have not been restored, and the Government, in G. O. No. $\frac{150}{IV-29}$, dated 1st March 1892, have decided to allow the matter to drop in view of the difficulty of getting a competent surveyor. In Etáwah, with the exception of a few in pargana Auraiya which are liable to injury from floods, all the pillars are reported to be in good condition. The Collector of Benares reports that four or five boundary stones set up in the old bed of the Karamnasa, which is under water in the rains, had been washed out and were lying in the ground. As there was no dispute as to their proper position, they have been replaced. The Collector of Mirzapur states that although repairs had recently been effected, some 39 pillars had been damaged by heavy rains. He promised to take early steps to put these in order. The necessary repairs to the pillars on the Nepal border in Gorakhpur were carried out during the

year; and one pillar in the Basti district, which had fallen down, was rebuilt. Some of the pillars in Garhwál need repair, and 26 pillars in the Tarái were washed away during the rains. The former are being repaired and the latter rebuilt.

84. The service and character books were duly maintained, and the Board's instructions regarding securities are complied with. Service and character books.

SEC. X.—MAPS.

85. Of the thirteen district maps, the further preparation of which, at the time of the conference of 11th November 1887, was transferred to the Survey Office at Calcutta, five had already been prepared by the Survey Department. In the past year the district map of Gházipur was prepared and photozincographed at the Survey Office, Calcutta, after the proof had been examined and returned by the Board, and two hundred copies of the map were received and issued. The proof map of district Benares was examined and returned to the Survey Office to be photozincographed. Tahsíli maps of six tahsíls for the North-Western Provinces and four for Oudh were prepared and published during the year ending December 1891, making in all 65 for the North-Western Provinces and four for Oudh up to date; whilst maps for eight tahsíls of Oudh were compiled in rough and forwarded to the District Officers for revision, after which they will be faired for publication. Although no first copies of tahsíli maps for the North-Western Provinces are shown as completed during the year, considerable progress was made in the preparation of the tahsíli maps for Gorakhpur, which contain an exceptionally large number of villages, and of the maps of the Garhwál and Almora districts, which, owing to the hilly nature of the country, are difficult to reproduce. The miscellaneous work consisted as usual in the preparation of maps for the Board's Revenue Administration and Excise Reports, and in colouring the required number of these and the tahsíli maps prior to issue.

The Calcutta Survey Office has now sent to the Board all the revenue sheets of the Gorakhpur and of the Mirzapur district, but the revenue sheets of the Tarái tracts recently resurveyed are still required for the reproduction of the tahsíli maps. The newly published survey sheets of the Oudh districts which the Survey Department are now issuing, are also required. The progress of work in the preparation of tahsíli maps for the North-Western Provinces and Oudh up to the end of December 1891 is shown in the following tabulated statement:—

SEC. XI.—ECONOMIC HISTORY OF THE PROVINCES.

86. All the reports on the economic history of the districts received by the Board are submitted in original. A summary of the points of importance and interest is given below:—

Dehra Dún.—The material condition of the people remains unchanged. The demand for labour counteracts the high price of food grains. The relations between landlord and tenant are generally good. The silk crop has again failed. This was due to a change of management at Lister Grant, and consequent misunderstanding and eventual strike on the part of the coolies. Tea planters complain that low prices, caused by excessive cultivation, have greatly reduced the value of the

excellent crop of the year. The prospects of the scheme for connecting Hardwár with Rájpur, and eventually with Mussooree, by railway are reported to be brighter than they have been.

Saháranpur.—The new settlement demand, showing an increase of 2¾ lakhs for land revenue and Rs. 33,622 for local cesses, has been collected without any difficulty or pressure. The Saháranpur annual horse show was abandoned on account of the extensive arrangements necessitated by the great fair at Hardwár.

Muzaffarnagar.—The smallness of the increase of population at the last census (14,430) is attributed mainly to the effects of malaria. Drainage schemes progress in design and execution. Shamli has greatly benefited by sanitary improvements, and is no longer abnormally unhealthy; there is little prospect, however, of a revival of its languishing trade. Sugarcane cultivation tends to encroach on that of other crops. Kerosine oil is generally superseding mustard and other vegetable oils for burning. The means of communication have been somewhat improved. Wages tend to rise. In Muzaffarnagar itself the supply of labour does not always come up to the demand for it. The high prices press hard on native officials, especially on those drawing small salaries. Rents in many villages, though high, tend to rise. Enhancement cases are numerous; but the rate of enhancement granted has not been high. Local grain stocks are not large, and are derived chiefly from the last harvest.

Meerut.—In spite of an inferior kharif the agricultural classes have prospered, having fully benefited by the extraordinarily high level of prices in wheat and sugar. The exports of wheat have been unprecedentedly large. This prosperity has been indirectly shared by the zamíndárs, but the dwellers in towns have suffered from the high prices. The Collector remarks—"In this district I have been much struck by the fact that the village bania is not what he used to be; he no longer exclusively collects agricultural produce and brings it to market; it is the agriculturist himself who loads his own cart or hires mules and donkeys and brings in his produce to sell in open market. The change which this means is a very large one, and it explains the value of land, and the fierce struggle which wages around any question of occupancy rights here." There has been much controversy regarding the establishment of the bonded warehouse (Kaisarganj) in the city. Importers highly appreciate the opportunity which it affords of bringing their goods direct, without duty, finding the prevailing rates at once, and returning by midday, their business having been transacted. To the District Officer it is a valuable indicator of commercial movements.

Bulandshahr.—The area under wheat was larger by 38,000 acres than in 1889-90. For two months after the harvest the railway could hardly take off the wheat fast enough. Though the bulk of the profits went to the dealers, the agriculturists shared in them, as, before the corn was fairly in the threshing floors, its price began to rise. The cultivation of sugar increased 31 per cent.: that of cotton and indigo declined. The unpopularity of indigo, which is likely to continue, is said to be due to the precarious nature of the crop and prevalent low prices. The friction between landlord and tenant is abating. Increased road communication is urgently needed.

Aligarh.—It has not been a good year. Excessive rains flooded the kharíf in lowlying lands; while high prices, due to the export of grain to Europe, counteracted among the poorer classes the benefits of a good rabi. Drainage works are progressing; but the need of improved road communication is greatly felt.

The comments of the Commissioner, Mr. Harington, are interesting. He calls attention to the fact that in six tahsíls the population has decreased; and he attributes this, and the comparatively slow increase of population in the division as a whole (3·5 per cent.), to extensive waterlogging and consequent malarious fever (with its well known direct injury to reproductive energy). The waterlogging, he states, is due to the drawing of lines of obstruction to drainage all over the face of the country in the shape of railroads, raised roads metalled and unmetalled, canals,

rájbahas, and minor channels, sufficient waterway not being allowed. He adds that, though much has been done, much remains crying for present action. He also endorses the opinions of his District Officers that the means of communication are inadequate.

Muttra.—The harvests were normal. Lateness of rains and increased export of grain raised the price of food, not, however, until the revenue for both the harvests of the year under report had been collected. Though still considerably less than it was 19 years ago, the population has increased substantially since 1881; and the distressed portions of the district seem to be recovering. The barbed wire fence and ditch along the Bhartpur boundary successfully keep off wild cattle. For complete efficiency a prolongation of it is required. Six of the seven miles of road between Mat and Raya have been made. The road from Muttra railway bridge to Mahaban, part of which was swept away some years ago by the Jumna, has been re-aligned and put in order.

Farukhabad.—Small proprietors and tenants in some portions of what are known as the deteriorated tracts have had hard times to contend with; but the remedy has been applied, and, with favourable seasons, many of the villages may be expected to recover their lost position. The producers have profited, but the consumers whose resources are not derived from the land have suffered greatly from the high prices for some time prevalent. The trade of Farukhabad city has declined. The railway has taken away its position as a trade centre; but there has been no corresponding decrease in the population; and there is much chronic distress and difficulty of finding the ways and means of living among some classes of the inhabitants. The cultivation of potatoes and tobacco is extensive in the environs of the city and in other portions of the district. The quality of the produce might be improved by careful seed selection. The Aligarh tahsíl has suffered so much from floods again this year that the recovery of large advances for seed has had to be postponed. The district is, on the whole, well provided with communications; but a metalled road from Tirwa to the railway station at Kanauj would open up a large portion of the district, which is at present deprived of ready access to the railway.

Etáwah.—The district has stood the strain of poor harvests well; and, though 30 villages have been recommended for reduction of revenue on account of flooding, káns, or reh, it prospers under its fair assessment. The rise of the water level in parts of Etáwah, Bidhuna, and Phaphund may prove serious; but, so far, the injury is not considerable, and in Phaphund the Irrigation Department have done much in the last three years to improve the drainage.

Etah.—Measures have been taken by the Revenue and Canal Departments to alleviate the agricultural depression in the Aliganj and Kasganj tahsíls. In 336 villages jamas have been reduced to the extent of Rs. 49,590, and proposals for the remission of Rs. 1,34,743 arrears have been submitted. Heavy rains since 1292 fasli and insufficient natural drainage appear to have done more harm than the canal. The Irrigation Department have made several cuts, including a channel down the whole length of the Burhganga stream, where there had been extensive swamping. Agricultural depression in the Aliganj tahsíl is said to be likely to cause the Thakurs, naturally turbulent, to resort to serious crime.

Bareilly.—Again agriculture has suffered from the floods of the numerous rivers whose channels are not large enough to carry off the volume of water they receive in the higher part of their course. The floods are said to cause greater damage than formerly owing to drainage operations carried out, some years ago, in the Tarái. The people also complain of obstruction to drainage caused by the Pilibhít State Railway. Several landlords are believed to use ejectment notices as a means of compelling canecrop cultivators to take advances from them, with an agreement to sell them all the cane juice at rates so fixed as to absorb part of the tenant's legitimate profit. Ill-feeling between

landlord and tenant has occasionally resulted. But the vicinity of Rámpur and the Tarái, with the low grain rents on which holdings can be obtained in the Tarái, offer a refuge to tenants against oppression. On the whole, the peasantry are fairly prosperous. Grain is now leaving Bareilly city for several small stations on the new metre gauge railway. The high prices, especially in August, gave grain dealers enormous profits. In March a ring of these dealers nearly caused a crisis in the city. The sugarcane was good. An increase in income tax is expected. Much public spirit has been shown by the citizens of Bareilly in support of schemes of improvement.

Bijnor.—Large imports of grain from the Panjáb at the close of last year secured this district from all fear of famine. The railway has largely increased traffic, and a larger expenditure in feeder roads has become necessary. Much public spirit was shown by the subscription, in the district, of Rs. 8,000 to convert the zila into a high school. Buildings for a first class dispensary, with a female hospital attached, are being erected.

Budaun.—Steps have been taken to move Government to have a branch line of railway opened from Aonla to Budaun.

Moradabad.—The kharíf was poor; the rabi fair. Prices have been easy, and no distress has been felt. The relations between landlord and tenant continue good. There has been no difficulty in realizing the Government demand.

Sháhjahánpur.—Except for floods in tahsíl Jalalabad, the year has been normal. Prices rose till July, but fell with the rain. The Powayan steam tramway is now open for traffic as far as Khotar. The new hospital and Dufferin ward are approaching completion, as is, also, the Lucknow-Pilibhít Railway.

Pilibhít.—The condition of the people was good. Labour commands a high wage. Rice and sugarcane suffered from the drought: otherwise the year was fairly prosperous. The Lucknow-Pilibhít Railway opened for traffic in April, but closed when the rains began. Of many complaints as to damage from accumulation of water on account of the railway embankment, two proved, on enquiry, genuine, and remedial measures were taken. The enlargement of the waterway at Deohra bridge is necessary and urgent. The relations between landlord and tenant continue satisfactory. Lala Jagan Nath, a large landowner, has built at his own expense several wells in his different villages and a row of buildings at a cost of Rs. 2,500 in the temple of Gauri Shankar for the use of travellers.

The Commissioner is much impressed by the extreme badness of the roads, even where they connect important centres. Local tramways would probably open up the northern parts of the division. At all events it would seem to be certain that improved communications are the great want of Rohilkhand, and that Budaun and Moradabad are the most necessitous districts of this, in this respect, neglected Division.

Cawnpore.—High prices failed to compensate cultivators for bad crops. Floods in August caused great loss to the villages on the Ganges and two muhallas of the city. Hailstorms in March damaged crops in three parganas. Rice cultivation by means of canal water has been most successful. The feeder road from Pokraen railway station to Gauron-Mogal Road has been completed. Three other roads are under construction. A scheme of water works, involving an annual expenditure of Rs. 1,30,000, has been adopted by the Municipality. The Dufferin Hospital is being constructed at a cost of Rs. 37,000, the greater part of which was contributed by residents of the district.

Fatehpur.—On the whole, the year was uneventful and prosperous. The population of the district has risen only 1·96 per cent. since last census: that of Fatehpur city has declined. The trade of Bindki is diminishing; and that of the new market of Fatehpur shows a great decline. The late rains somewhat curtailed the kharíf

area, but the juár crop was excellent. The relations between landlord and tenant are good.

Hamírpur.—The condition of labourers and cultivators was good. The year was a fairly prosperous one, as a very good rabi made up for a poor kharíf. The revenue collections have been more satisfactory than in previous years, and the revenue administration may now be considered to be on a fairly satisfactory footing. Fever and cholera have kept the death rate high. The benefits of irrigation from the Betwa Canal and the Hamírpur Lakes are beginning to be appreciated. The Indian Midland Railway is beginning to have some effect on the trade of the district; but it wants support in improved road communications. The cotton trade at Rath and Kulpahar is hopeful, and is capable of large development.

Jalaun.—The recent census shows a decrease of about 20,000 in the population. This is attributed by the Collector to the pressure felt by the agricultural classes, arising from a long series of adverse agricultural seasons. The same pressure is being felt in a less degree by the landowners, whose assets in some cases are becoming insufficient to meet the land revenue. The increase of trade in Kunch, at present the only commercial centre of the district, has been sufficient to warrant the establishment of a railway agency.

Allahabad.—The year's harvests were not good. The kharíf suffered from intermittent heavy rain. Hail destroyed the promise of good rabi. No great difficulty, however, was experienced in collecting the revenue. In May cholera raged in the district and cantonments. The Collector thinks that the comparative immunity enjoyed by the city may have been due to the new water supply, but considers it premature to offer a definite opinion at present.

Lalitpur.—Special measures for the repression of dacoity proved successful; but not before the district had been greatly unsettled. The Thákur landowners who secretly co-operated with the dacoits have, in the Collector's opinion, learned a useful lesson. The railway, and the feeder roads now under construction, promise to do much for the trade of the district, but, the Collector believes, will not tend to promote agriculture. The large export by rail of ghí to Bombay has raised its price and made cattle farming and grazing more remunerative. The unhealthy climate and bad landowners keep much rich land out of cultivation.

Benares.—The year, the fifth of bad harvests and high prices, was one of grave anxiety. The high prices of wheat and other grains were severely felt and led to much discontent and importunate demands for the prohibition of exports. There were serious riots on the 15th of April. The delay in the rains caused apprehensions of scarcity; but the rains, fortunately, came in time to save the necessity for opening relief works, and there was full employment for agricultural labourers throughout the season.

Mirzapur.—The harvests were not good; the kharíf being injured by heavy rain; the rabi by hail. Prices ranged unusually high. The agricultural classes passed through a year of comparative distress, though there is no reason to believe that the suffering has been excessive. Local trades and industries did rather better than in the previous year. The price of lac rose, and the demand for brass vessels improved. Indigo planters suffered from the fall in price consequent on the enormous outturn of the Behar and Bengal factories.

Jaunpur.—Trade in the three chief commercial centres of the district was fairly flourishing, and the exports of refined sugar increased. It was a good year for sugar refineries all over the district. The metalling of the Khutabhan Kheta Sarái Road has been commenced, as also of a mile of the road from the city station to Chaukia. The relations between landlord and tenant were less strained. The pressure on the poorer classes led to increased emigration to the colonies and Calcutta.

Gházipur.—Indifferent harvests, added to the failure of the mango crop, caused some distress among the people. For a few days in August before the rain fell, a small relief work was started in the Municipality of Gházipur; and, after the rains fell, a good many of the poor, who had come to the relief work, were kept for a short time in an extemporized poorhouse. People flocked in from Azamgarh, and the people of the district were getting restless and beginning to leave their homes, when rain fell and danger of scarcity was averted. Emigration increased. The indigo crop was fair, but the planters do not prosper. The sugar manufacturing industry is declining.

Ballia.—The struggle between landlords and tenants, with its attendant litigation, continues. Symptoms of a combination among the tenants to resist the attempts of the landlords to raise the rent rate are observable.

Gorakhpur.—The district is now as densely populated as most in the province, there is the same pressure on the soil as elsewhere, and the conditions which rendered life easier to the majority of the people have passed away. There was some difficulty in collecting the enhanced land revenue owing to a series of three bad harvests. The good kharíf of 1891 saved the district; but the impoverishment and indebtedness caused by the bad years which followed the introduction of the new assessment are widely spread.

Basti.—There was some distress, especially in the tracts bordering on the Ghogra. Emigration increased. In a few places it was necessary to find work for the poorer classes in the district roads; but all anxiety ceased when the rains broke. The revenue was collected, and the people have recovered. The need of increased road communication is greatly felt.

Kumaun.—There has been a poor outturn of potatoes, and the cultivation of this crop has received a check from over-production and the falling off in the demand from Calcutta. The demand of the Calcutta market is now largely satisfied by the potato cultivation in the north-east hills of Bengal. There has been a very satisfactory extension of communications during the year.

Garhwál.—The land is becoming more and more sub-divided as population increases, and the struggle for existence is becoming harder. Pilgrims to Kedarnath and Badrinath have brought some money into this very poor district. The improvement to the Joshinath and Niti road has been completed. The suspension bridges at Nandkeshri and Giroli and the Sason-Jaripáni road are being constructed.

Tarái.—There was a fair kharíf and a good rabi; and, as prices ruled high, the tenantry profited. Many, however, suffered by being flooded out of their homes. There is an increasing demand for land in the Tarái on the part of people from Rámpur and Pilibhít.

Chapter V.—SETTLEMENT.

Revision of settlement in temporarily settled districts.

87. *Gorakhpur and Basti.*—Settlement operations were formally closed in both districts before the end of 1890. The Survey Department have completed the supply of printed maps for Basti, and have furnished those of 828 more villages in Gorakhpur, leaving 2,255 villages in the latter district for which maps have still to be furnished. The settlement reports of both districts have been printed, and the Basti report with the Board's review has been submitted to Government. The Gorakhpur report is now under review. No further expenditure was incurred in Basti during the year under report. The charges in Gorakhpur were Rs. 13,730-10-0, bringing the total cost of the settlement up to Rs. 11,10,111-8-8.

88. *Saháranpur.*—In this district also settlement operations were practically closed last year, and the fairing of the remaining maps was completed during the first quarter of the year under report. A large amount of case work, original and appellate,

however, remained over, which has been disposed of by the Collector, who was placed in charge of the settlement in January 1891, with the assistance of a Settlement Deputy Collector. The work thus thrown on the Collector, Mr. Holmes, was a heavy addition to his ordinary duties, and his success in dealing with it is highly creditable to him. The year closed with no pending original cases and only 72 appeals, the majority of which were decided before the 15th October 1891. The expenditure during the year amounted to Rs. 32,591-15-1, bringing the total cost of the settlement up to Rs. 2,75,450-12-2. The settlement of the entire district was formally closed by the issue of Notification No. $\frac{894}{1-47A.}$, dated 1st May 1891.

89. *Muzaffarnagar.*—Only a few maps and records remained to be faired at the close of last year, and these have been finished during the year under report. The area remaining for inspection was 353 square miles, and that for assessment about 1,000 square miles. The Settlement Officer completed the inspection of this area, and also re-inspected the whole of the Ganges khádir with the exception of a few villages. The area assessed included the two tahsíls of Muzaffarnagar and Kairana, and the Ganges khádir tracts of tahsíls Muzaffarnagar and Jansath. The assessments of three tahsíls, Jansath, Budhana, and Muzaffarnagar, were sanctioned by the Board during the year, and that of tahsíl Kairana shortly after its close, in time for the revised revenue to be collected from the first kharíf instalment falling due after the expiration of the former term of settlement. The Board postponed passing orders on the assessment of the Ganges khádir until the Member in charge had had an opportunity of visiting the tract. The Junior Member has since sanctioned the assessments after going over the khádir with the Settlement Officer, and the new demand will take effect from the rabi of the current year. The Government revenue has not suffered by the postponement, as the revision of settlement in the Ganges khádir has resulted in a small net reduction in the total demand.

Case work has proved heavier than the Settlement Officer anticipated. Including the 2,601 cases pending at the close of last year, and excluding 18 cases transferred to the Collector's Court, the number for disposal during the year was 11,666, of which 8,671 cases were disposed of—1,712 or 20 per cent. on their merits, and 6,959 or 80 per cent. otherwise. The majority of the cases pending are applications for enhancement and commutation of rent, and cases of this description still continue to be filed. The Settlement Officer disposed of 119 out of the 225 appeals which came before him, confirming the decision of the lower Court in 73 cases, reversing it in 33, and remanding 13 cases for further enquiry. The Commissioner had 91 appeals to dispose of and decided 74, the lower Court's decisions being confirmed in all but one case. The expenditure during the year amounted to Rs. 53,751-2-2, bringing the total cost to the end of the year to Rs. 2,35,470-14-6.

90. *Jhánsi.*—The remaining records—336 maps, 338 khasras, 353 jamabandis, and an equal number of khewats—were received from the Survey Department during the year. The work of verification was pushed on vigorously, and, with the help of a third Deputy Collector, Pandit Jawahir Lal, was completed. The fairing work was all but finished in Mau and Moth by the end of the year: in only a few villages in each tahsíl were the faired papers not entirely completed. As the Mau and Moth patwáris were discharged from the fairing office, the Jhánsi and Garotha patwáris were called in and work was pushed on in those tahsíls. The Settlement Officer explains that there was neither accommodation enough, nor a sufficiently large and competent supervising staff, to allow of the patwáris of all four tahsíls being called in to the office at headquarters at the same time. For reasons which were explained in last year's report, it was found impossible to complete the assessments before the expiry of the term of the current settlement. The matter was reported to Government, and with the sanction of the Government of India the current settlement was prolonged till the 30th June 1892. The assessment reports for Mau and Moth were completed towards the close of the year, and those for Garotha and Jhánsi have since been finished. The Mau and Moth reports are now under the consideration of the Board.

Excluding 7 cases transferred to the district courts, there were 5,687 original cases, of which 5,370 were disposed of—1,913 or 36 per cent. on their merits, and 3,457 or 64 per cent. otherwise. The number pending at the close of the year was 317. Of the 37 appeals preferred to the Settlement Officer all but one were disposed of, the Lower Court's decision being confirmed in 21 cases and reversed in six. Nine cases were remanded for retrial. The Commissioner disposed of 10 out of the 13 appeals preferred to him. The Lower Court's decision was upheld in eight cases and reversed in one case, and one case was remanded. The expenditure during the year was Rs. 58,438-9-5, bringing the total cost up to Rs. 1,48,584-7-11.

91. *Kumaun Bhábar.*—For 326 villages—41 settled and 285 khám—the new survey papers were available in 1889-90, and these villages were accordingly inspected and a rent-rate report submitted regarding them. The proposed rates were sanctioned by the Commissioner with effect from 1890-91, and a report on the subject was submitted to Government with this office No. $\frac{2341N.}{IV-25}$, dated 22nd September 1891. In that report it was noted that the assessing officer anticipated an increase of Rs. 30,000 in the rental demand by the resettlement of the whole of the Kumaun Bhábar villages. During the year under report an increase of Rs. 20,000, due to enhanced rents, was secured, and it is now estimated that the completion of the assessment will result in an enhancement of Rs. 38,000, or of Rs. 8,000 more than the former estimate. Twenty-two settled and 142 khám villages remained to be dealt with. No villages were inspected during 1890-91 owing to the fact that Mr. C. H. Roberts' connection with the Kumaun Bhábar was temporarily severed, and it was considered advisable to wait for his return rather than to entrust the work to the officer temporarily in charge. Mr. Roberts is now going on with the work and is expected to complete it during the current year. The expenditure during the year amounted to Rs. 2,438, which, added to that incurred in 1888-89 and 1889-90 (Rs. 8,776), brings the total to Rs. 11,214.

92. *Garhwál.*—The Garhwál survey has continued to give rise to considerable discussion and correspondence. The opposition of the people has been overcome, but the Survey Department have had to contend with other difficulties inherent in the nature of the country. These, with the minute size of the cultivated fields, the difficulty of obtaining amíns, and the want of skill among the patwáris, have retarded progress and increased the cost of operations; while, in addition, there is reason to believe that the assessable area to be surveyed will prove to be far larger than was originally estimated. As was promised in paragraph 118 of the Revenue Administration Report for 1889-90, a report was obtained from the Deputy Superintendent of Survey at the close of the field season, showing the work that had actually been done and its cost, and furnishing an estimate in respect to the work remaining. On the receipt of this report, and after further discussion with the local authorities, the Board reported to Government that the cost of completing the survey was estimated at Rs. 3,80,472, and that, including the amount already spent, the total expenditure would not fall short of Rs. 5,00,000. It was recommended that the survey should be proceeded with on a programme which would admit of its completion in four seasons. The Government of India, however, in view of the large expenditure and the comparatively small return expected in the shape of enhancement of revenue, suggested that the cadastral survey should be confined to the less mountainous and more advanced tracts, and that the settlement of the wilder and more remote tracts should be effected by a rougher and less expensive agency. The Board's recommendations on this proposal were submitted to the Government, after the close of the year, with their letter No. $\frac{7}{I-15}$, dated 6th January 1892, and final orders on the subject are awaited: meanwhile the survey is proceeding in the southern parganas of Garhwál. Up to the end of the year the Survey Department had completed the survey of 1,050 villages, with an area of 189 square miles, but had only prepared the maps of nine villages. They also compiled 149 rough khasras, and prepared 1,711 jamabandi slips, 111 khewat slips, and 134 statistical forms.

The present settlement of some of the parganas in Garhwál expires in the current year (1892), before the regular settlement can be completed. In order to prevent loss of revenue, the Board recommended that summary settlements should be made to hold good until the regular settlement was effected. Government have decided against the expediency of the summary settlement proposed, and have determined that the current assessment should continue until a regular settlement can be effected (G. O. No. $\frac{1}{\text{I—556A.}}$, dated 4th January 1892). During the year the Board submitted draft settlement rules for the preliminary procedure of settlement and for the verification of records prior to assessment. These rules received the approval of the Government in G. O. No. $\frac{741}{\text{I—556A.}}$, dated 15th April 1891. Draft assessment rules have been submitted since the close of the year, and are under the consideration of Government. Case work in Garhwál has been light. Of the 276 cases instituted, 274 were boundary disputes, of which all but four were decided. The Settlement Officer decided 27 appeals out of 30 institutions. Of these, in 23 cases the order of the Lower Court was confirmed, in one reversed, and three cases were remanded. The total expenditure incurred up to the close of the year under report was Rs. 1,11,809-7-8.

The usual abstract of work done during the year is appended.

Abstract statement of settlement work.

* Includes Rs. 81,177 on account of cadastral and traverse surveys.

The figures against Garhwál are for three parganas only. In columns 3, 4, 5, and 6 the figures include second and third copies, where required.

PART II.

PATWARIS AND KANUNGOS.

Revision of patwáris' circles.

93. A full account of the working of the Department is given in the report of the Director of Land Records and Agriculture, which is appended; and the remarks which follow will be confined to those matters which appear to call for special notice.

Further progress has been made in the revision of patwáris' circles and pay schedules. Complete schemes for Fatehpur, Aligarh, Bulandshahr, and Hamírpur were sanctioned during the year, and a revised scheme for Dehra Dún shortly after its close.

As was stated in the last report, the changes in Aligarh and Fatehpur, when fully introduced, will effect an annual saving of Rs. 17,430. The financial result of the revision in Bulandshahr and Hamírpur will eventually be a saving of Rs. 2,538 per annum. The revision in Dehra Dún is not yet complete, as pargana Jaunsár Báwar remains to be dealt with. So far it results in an increased expenditure of Rs. 524 per annum.

A re-arrangement of circles, both of patwáris and kanúngos, in Azamgarh has been sanctioned since the close of the year. The total cost of the patwári establishment will remain unaltered; but, by a reduction in the number of patwáris and assistants, it has been found possible to raise the scale of pay, and no patwári will in future receive less than Rs. 7 per mensem. In the last year's report the Director stated that revised circles and pay arrangements had been sanctioned for all districts of the Agra Division. In his present report he states that complete schemes for Etah and Etáwah have been sanctioned during the year, and that a revised scheme for the Agra district was under consideration. Neither of these statements is quite correct. The revisional schemes for Etah and Etáwah were sanctioned previously, and all that was done during the year was to sanction proposals as to the dates from which the final scales should come into effect. A revision of the circles in the Agra district was formerly sanctioned; but it was merely a provisional one pending the submission of a complete and final scheme. The complete scheme, which has been sanctioned since the close of the year, will eventually result in an annual saving of Rs. 22,308. Of the other proposals referred to by the Director in paragraph 3 of his report as under consideration, those for Bánda have not yet reached the Board; those for Saháranpur have been returned for verification by the Accountant-General, and those for Muzaffarnagar are being drawn up by the Settlement Officer. The Director again remarks on the disturbing effect of changes in the allocation and salaries of patwáris. Alterations have only been made where it was clearly shown that the existing arrangements were defective. A certain amount of disturbance is unavoidable; and, as was remarked in the last report, endeavours have been made to minimize the inconvenience by providing for the gradual introduction of the revised schemes.

Education of patwáris and training of kanúngos.

94. The number of unqualified patwáris in the province was considerably reduced during the year; but in some districts there are still considerable numbers of untrained men, especially in Basti, where there are 542 patwáris who have still to pass the examination. The results of examination in this district, however, were much more satisfactory than in the previous year. The percentage of men passed to those examined varies from 95 per cent. in Gházipur to under 10 per cent. in Bijnor. The bad result in Bijnor was due to the inefficiency of the school teacher. In Farukhabad the Collector has been obliged to send some of the passed patwáris back to school. He remarks that there are many who passed the examination in previous years, but know nothing whatever of their work, or of the subjects in which they are supposed to have qualified. The Collector of Cawnpore, on the other hand, considers that the examinations in his district have been somewhat strict, and reports that none but the good workers came out successfully. These remarks, with the variations in the percentages of successful candidates, show that there is much difference in the character of the teaching given in different districts as well as in the examination standard. In some districts special

classes for the instruction of patwáris have been opened in the tahsíli schools, and the Director is in favour of adopting this plan in every district in which the Educational Department is prepared to start a class. The instruction in tahsíli schools is likely to be more uniform and systematic than in the patwári schools and would probably result in an improvement in the training of patwáris. The Collector of Bánda suggests that a few scholarships should be given to induce patwáris to attend school regularly; but this seems unnecessary. If the Bánda patwáris fail to attend and qualify within the prescribed term, the Collector should put in force the rule which allows of their dismissal.

The training school for kanúngos, which was experimentally started at Cawnpore during the year, has so far proved a success. An institution for the systematic training of kanúngos and kanúngo candidates appears to have been really needed; and the effect of the regular and practical instruction given was, the Director reports, very marked in the examinations. The advantages offered by the school have been appreciated by District Officers, and it has received their cordial support.

Residence of patwáris.

95. The number of resident patwáris is larger than in the previous year; but the increase is less in proportion than that in the total number, so that the percentage has fallen. The decrease in the percentage is generally accounted for by the revision of circles. It is greatest in the Gorakhpur district, where the actual number of resident patwáris has diminished by 250, and the percentage has gone down from 79 to 60. There is also considerable retrogression in Bulandshahr. Re-allocation of circles, difficulty of finding new quarters, and so on are no doubt some excuse for non-residence, an excuse of which patwáris are only too ready to take advantage. As was remarked in paragraph 121 of last year's report, the Gorakhpur patwáris are now adequately paid, and there should be no hesitation in insisting on their residence in their circles. The matter requires the special attention of the Collectors of the districts concerned. Gházipur, where the percentage of residence was formerly very low, shows steady progress. If the figures given in paragraph 9 of the Director's report are correct, the improvement in Muzaffarnagar is remarkable.

Filing and testing of patwáris' papers.

96. Considering the heavy demands made by the census on the time of patwáris and kanúngos, the Board agree with Mr. Holderness that the village papers were filed with creditable punctuality. Compared with the previous year there is a decided improvement on the dates within which the jamabandis were filed (due probably to the patwáris having become more familiar with the khatauni) and some improvement as regards the comparative area statements. The crop statements were more behindhand; but census work was heaviest when these statements were under preparation. A large proportion of the arrears belong to Basti and Gorakhpur. It is believed that in these districts the work thrown upon patwáris and kanúngos by the census was specially heavy, and Gorakhpur shows an improvement over the previous year. The census interfered with the testing as well as the preparation of patwáris' papers, and the percentage of fields tested by kanúngos fell from 8·69 to 7·87 per cent. In two districts, Gorakhpur and Basti, the percentages fell considerably below the minimum prescribed by the rules, only 3·52 of the total number of fields having been tested in Gorakhpur, and 5·47 per cent. in Basti. The number of fields in both these districts is enormous, and the Director remarks that, so far, the kanúngo staff appears to have found it impossible to test 7 per cent. of them; but, after every allowance has been made for this, and for the extra work entailed by the census, the result is disappointing. The kanúngo staff in Gorakhpur has been strengthened, and the number of fields is somewhat smaller than in Basti. The reason why the Gorakhpur kanúngos are not able to work up to even the low Basti percentage is not apparent. More fields were retested by superior officers than in the preceding year. The least work of this kind was done in Benares (2 per cent.), Ballia (3·8 per cent.), Etáwah (5·4 per cent.), and Bánda (5 per cent.). The small amount of retesting done in Benares and Etáwah is attributed to census work. The Collector of Bánda explains the poor result in his district by the illness of one of his Assistants. Ballia shows better than in the previous

year, when the percentage of retested fields was only 1·4; but, as the Director remarks, there is still room for much improvement. The percentages of incorrect entries are given in Appendix II and referred to in paragraphs 18 and 20 of the Director's report. The large percentage of error in Azamgarh, 17·17, will attract notice. The work of the Azamgarh patwáris for some time past has been notoriously defective; and, as the Government are aware, special measures had to be undertaken for the correction of the rent-rolls. As has been said above, the circles of the patwáris and kanúngos have now been re-arranged. This has been done with care and judgment by Pandit Rama Shankar, the officer employed in the revision of the jamabandis. The circles will now be equalized, and the incompetent men will be got rid of, and it is to be hoped that greater accuracy in the village records will in future be secured.

The untrustworthiness of the patwáris' papers in some parts of the province, as regards the record of rental demands and collections, was specially referred to in paragraph 43 of the Government review of the last year's report, where it was remarked that while in some districts, such as Azamgarh, it was clear that the defects were due to deliberate fraud, in the deteriorated tracts of the Central Doáb it was equally certain that the inaccuracies in the records were not fraudulent. The latter description of inaccuracy is due to the retention of abandoned land, in the rent-paying area shown in the jamabandi, and to the continuance in the record of the old rents, which were paid in more prosperous times, but of recent years have never been demanded or collected. The revision of the rent-rolls of the distressed tracts in the Agra Division is now nearly complete; and, with the sanction of Government, special rules have been incorporated in the Rules for patwáris for removing from the rent-roll lands which the tenant has actually abandoned. This source of inaccuracy may, therefore, be expected to disappear. The other case, where the inaccuracy is the result of deliberate fraud, presents greater difficulties and has formed the subject of much inquiry and discussion during the year. The Board submitted a report to Government, showing, as far as could be ascertained from specific and trustworthy information given in settlement reports or supplied by District Officers, to what extent fraudulent concealment of rents prevailed in the province. The conclusions to which the information in the possession of the Board led were (1) that the rent-rolls *generally* are sufficiently accurate for practical purposes, and (2) that serious and fraudulent under-statements of rent probably occur only in particular estates and tracts, of which it should be possible for the local officers to become aware in the course of the cold weather examination of the patwáris' papers. With the approval of the Government, instructions have been issued to District Officers to take action under section 19 of the Kanúngos and Patwáris' Act; and, where clear proof is forthcoming that the information furnished in response to a notice issued under that section is false, to prosecute the offender, with the previous sanction of the Board. Since the close of the year, in accordance with the orders of Government, District Officers have been instructed to specially notice the subject in their annual reports. So far, no application has been received for sanction to the institution of criminal proceedings. In the Benares and Gorakhpur Divisions special difficulty has been found in securing a correct record of rental collections in the patwáris' day books and ledgers; and, with a view to secure greater accuracy, the experiment referred to in paragraph 20 of the Director's report is being tried in one tahsíl of each of the Benares and Gorakhpur districts. The Collectors who have tried it, as will be seen from their opinions quoted by Mr. Holderness, are not generally in favour of the experiment; but it requires longer trial before its results can be ascertained, and the Director recommends that it be continued for another year.

Tahsíl registers.

97. In paragraph 124 of the last year's report, reference was made to the instructions, which had been issued, directing a more systematic examination of the pargana book by officers of the district staff, and it was stated that the results should be apparent in the course of the year under report. On the whole, fair progress has been made; but much has still to be done in the way of fully utilizing and systematically and

intelligently checking the pargana books, and the continued attention of District Officers is required to the matter, which is one of importance. The Director reports that in many districts the volumes show signs of more frequent use. It is satisfactory to find that, in districts like Bánda, where individual villages require to be closely watched, the books are constantly referred to and their value is becoming more clearly recognised. In Jaunpur, in some cases, the books do not appear to have been intelligently used. In some districts, owing to various causes, no progress has been made in examining the entries in the pargana books.

Inspection of districts.

98. The Director himself inspected five districts besides scattered tahsíls, and altogether he and his Inspectors examined 17 districts and parts of districts. Mr. Holderness also examined the district of Budaun preliminary to revision of the present settlement of the land revenue, and submitted a report to the Board, which was forwarded to Government.

Alteration in the patwári and kanúngo rules.

99. A revised edition of the Patwári and Kanúngo Rules was issued during the year with the sanction of Government. The old edition had become very inconvenient to use, owing to the numerous alterations and additions that had been made since it was originally issued. The opportunity was taken to make various verbal emendations, and to introduce alterations embodying existing rules of practice. The chief addition made was the rules already referred to, regarding the removal from the rent-roll of fields abandoned by tenants.

Supply of forms.

A saving of Rs. 16,000 on the budget grant was effected in printing charges.

Apps. III—VIII.

100. These returns have been noticed in detail by the Director, and further comment from the Board is not required.

Apps. IX—XI.

101. The current demand on account of the patwári rate amounted to Rs. 19,11,587, of which Rs. 19,00,997 were collected, leaving a balance of Rs. 10,590, classed as (1) recoverable Rs. 3,699, (2) doubtful Rs. 3,799, and (3) irrecoverable Rs. 3,092. Of the recoverable balance, Rs. 2,038 were realized after the close of the year, Rs. 414 are due from estates held under attachment under section 154 of the Land Revenue Act, and the remainder is in train of liquidation. Almost the entire doubtful balance is due from the deteriorated villages in Farukhalad, Mainpuri, and Etah. Further details of the balances are given in Appendix XI.

The total outstandings at the end of 1889-90 were Rs. 10,115. Of this sum Rs. 5,378 were realized during the year under report, and Rs. 2,095 were remitted, leaving a balance of Rs. 2,642, of which Rs. 294 are nominal. The outstanding balance, of which the district details are given in Appendix XI, is wholly in Farukhabad and Etah.

I have the honor to be,

SIR,

Your most obedient servant,

JOHN HOOPER,

Secretary.

DIRECTOR'S REPORT.

1. *Strength of establishment.*—The following figures show the establishment under the control of this department during the year under report as compared with that of the preceding year :—

	North-Western Provinces.	
	1889-90.	1890-91.
Inspectors ...	4	4
Sadr kanúngos	34	34
Naib sadr kanúngos	34	34
Apprentices	29	29
Patwári fund muharrirs	33	33
Supervisor kanúngos	481	484
Registrar kanúngos	174	175
Naib registrar kanúngos	172	187
School teachers	50	50
Patwáris and assistants	21,614	21,553
Chainmen	469	472
Sadr kanúngo's peon	34	34

As mentioned last year, the insufficiency of the kanúngo staff in some of the districts of the Benares Division had attracted notice, and in communication with the Collectors of the districts concerned the following additions were proposed to the existing staff and have been sanctioned by Government, *viz.*, one registrar kanúngo and two assistant registrars for Azamgarh, one assistant registrar for Benares, three assistant registrars for Gházipur, three supervisors, three chainmen, and six assistant registrar kanúngos for Gorakhpur, making a total addition of 12 assistant registrar kanúngos, one registrar kanúngo, three supervisor kanúngos, and three chainmen. The number of patwáris was decreased during the year from 21,614 to 21,553, owing to revision of circle arrangements in several districts, whereby unnecessarily small circles were absorbed.

2. *Revision of patwáris' circles and pay in North-Western Provinces.*—Complete schemes for the revision of patwáris' circles and pay in the districts of Bulandshahr, Etah, Etáwah, Hamírpur, Fatehpur, and Aligarh were sanctioned during the year under report and are being brought into effect as quickly as circumstances admit. A revised scheme for Dehra Dún was also sanctioned at the close of the year. Schemes for Bánda, Agra, Azamgarh, Saháranpur, and Muzaffarnagar are under consideration. Changes in the allocation of patwáris and in the salaries of individuals have a disturbing effect on district administration, and should not be undertaken except on clear evidence that the existing circle arrangements are defective, or that the pay and grading is not properly apportioned to work. The revisions which have been in progress during the last ten years in many districts have been necessitated by the existence of these defects. Under the old system the pay of the patwári depended on the amount of the cess realized from his circle under the provisions of the law. It thus frequently happened that in rich villages the patwári received high pay for doing little, while in poor villages the pay was low and the work heavy. In carrying out revisions the object has been to secure that no patwári shall receive less than Rs. 7 or more than Rs. 12 a month; that within these limits the salary shall be proportioned to the work, and that in no circle shall the work be excessively light or more than the patwári can properly perform. The grades of salaries adopted usually give an average all round pay of Rs. 8 per mensem per man. But in the western districts the standard of living is distinctly higher than elsewhere in the province, the emoluments enjoyed in the past by the patwáris have been larger, and their position in the village economy is more respected and more responsible. In these districts a more liberal scale than that considered sufficient elsewhere is desirable.

3. *Patwári School.*—The total number of patwáris and assistants in the province, excluding the districts of Garhwál and Almora, was 21,406 at the end of 1889-90, of whom 13,423 had passed through the school course and 4,548 had been exempted from examination. The numbers attending patwári schools during the year were 1,483, of whom 877 passed the examination; 13 patwáris are reported to have been exempted during the year.

The patwáris and assistants who have still to receive instruction number 2,545, or 11·88 per cent. of the total staff. In Etáwah and Fatehpur the patwáris and assistants have either all passed or have been exempted from examination, and in Dehra Dún, Saháranpur, Meerut, Bulandshahr, Etah, Bareilly, Bijnor, Budaun, Pilibhít, Hamírpur, Jalaun, and Lalitpur very few have still to pass. The districts shown in the margin contain the largest number of untrained men. In addition to patwáris and assistants, 1,609 candidates were educated in the patwári schools, of whom 904 or 50 per cent. passed. Thus the total number of pupils educated in the schools within the year was 3,283 as compared with 3,937 in 1889-90 at a cost of Rs. 14,143-6-0 or Rs. 4-4-11 per pupil.

Basti	542
Allahabad	379
Azamgarh	385
Gházipur	207
Mirzapur	135
Agra	124
Jhánsi	121

The following table compares divisionally the number of pupils who attended the schools, the number passed, and the financial results of 1890-91 with those of 1889-90 :—

Division.	Number who attended the schools.		Number passed.		Receipts for 1890-91.	Expenditure for 1890-91.	Surplus or deficit.
	1890-91.	1889-90.	1890-91.	1889-90.			
					Rs. a. p.	Rs. a. p.	Rs. a. p.
Meerut	486	707	292	379	2,329 8 0	2,319 14 3	+9 9 9
Agra	442	536	224	384	1,943 14 0	1,815 2 6	+128 11 6
Rohilkhand ...	470	450	229	264	2,423 7 5	2,124 15 7	+298 7 10
Allahabad ...	491	526	235	210	3,301 7 1	2,995 8 1	+305 15 0
Benares	574	741	306	315	3,339 11 3	2,294 11 8	+1,044 15 7
Gorakhpur ...	810	953	508	634	5,757 14 3	2,233 1 11	+3,524 12 4
Tarái	10	24	...	13	...	360 0 0	−360 0 0
Total ...	3,283	3,937	1,794	2,199	19,095 14 0	14,143 6 0	+4,952 8 0

The results of the examination were most satisfactory in the following districts :—

Gházipur	95 per cent. passed.
Budaun	93 „
Bulandshahr	89 „
Etáwah	86 „
Cawnpore	79 „
Sháhjahánpur	74 „
Gorakhpur	73 „
Bástí	73 „

The schools in Agra, Hamírpur, Allahabad, Lalitpur, Jaunpur, Ballia, and Azamgarh show very poor results, the percentage of passes being below 40. But the Bijnor school is the worst, as of 105 pupils only 11 passed. The Collector explains that the bad result was due to the inefficiency of the school teacher, who has been dismissed.

In Etáwah the patwári school was closed in May 1891, and the education of candidates and patwáris' heirs entrusted to the Education Department. A special class has been opened in the tahsíli school for the purpose. If this experiment succeeds, I am in favour of adopting the same plan in every district in which the Education Department is prepared to start a class. In Mainpuri, where it was proposed also to try it, no accommodation could be found in the tahsíli school. At the close of the year under report, proposals were submitted to the Board to abolish the schools of

Muzaffarnagar and Pilibhít and to open special classes in the tahsíli schools: also to abolish the Bulandshahr patwári school, and, as no room is available in the tahsíli school for a special class, to allow patwári candidates from the Bulandshahr district to find admission to the patwári school of the Aligarh district. In Jaunpur the number of pupils increased from 14 to 60, and an assistant teacher on Rs. 15 was appointed in July 1891. The Collector reports that as his district contains a good number of passed candidates some have been sent to Mirzapur where passed men are wanted. In Etah, Sháhjahánpur, and Pilibhít a number of patwáris exempted from examination were required to attend the school for three months for instruction in accordance with rule 6, *note*, of the Patwári School Rules. In Farukhabad patwáris reported incompetent were required again to attend the school. The Collector writes that "there are many patwáris who nominally passed in previous years, but know nothing whatever of the work or of the subjects in which they are supposed to have passed." In Fatehpur the Collector made the patwáris clearly understand that their heirs would lose their claims unless they pass through the schools. In Gorakhpur the staff of the school has now been reduced. There are only 40 patwáris remaining to be taught. The Collector proposes to admit candidates up to the number of one hundred into the school, as they will prove useful substitutes for incapacitated patwáris and those on leave. The Collector of Ballia similarly finds it desirable to keep up a good supply of passed candidates. The Collector of Bareilly thinks that the pupils in his school are deficient in arithmetic and survey. The Collector of Cawnpore remarks that the examinations in his districts have been rather strict and none but the good workers came out successfully. The attendance of the Azamgarh school has materially improved under the careful management of Pandit Rama Shankar Misr. He states that he cannot at present express an opinion decidedly if the education imparted in the school is thorough, but he can say so far that it is sufficient to enable the patwáris to do their work. The Collector of Bánda writes that "the school is now in a much better position and has much improved. Every endeavour has been made to compel regular attendance of patwáris, but they are a poor set of men who cannot afford to bear a continued expenditure on tuition in a backward district like Bánda. If a few scholarships, say of Rs. 2 per mensem, were given from some funds to such of the patwáris who attend regularly, the investment will be amply repaid by increase in the number of better qualified patwáris that will then be available." I do not think this proposal can be accepted. The Collector of Jalaun writes that the majority of the candidates are the heirs of the patwáris of the district, and this shows that the education in the school is appreciated by them and that they take an interest in educating their heirs. The total receipts were Rs. 19,095-14-0, as compared with Rs. 18,747-9-11 in 1889-90, and the expenditure Rs. 14,143-6-0 against Rs. 14,231-2-9 in the preceding year. This shows a profit of Rs. 4,952-8-11 to the patwári rate fund.

At the close of the year a proposal was submitted to and sanction obtained from Government to reduce the monthly fee payable by patwáris and candidates from Re. 1 to annas eight only. The fee was undoubtedly high and has kept many candidates away.

4. *Annual examination of kanúngos.*—These examinations were held during the rainy season with the following results:—

	North-Western Provinces.			
	Number appeared.	Passed in full.	Passed in part.	Failed.
Kanúngos	9	5	2	2
Assistant kanúngos	22	15	5	2
Patwári teachers	2	1	1	...
Candidates	97	51	32	14
Apprentice kanúngos	3	3	...	...
Patwáris and assistants	27	11	12	4
Total ...	160	86	52	22

Of the candidates 27 were selected patwáris. A training school for kanúngos was experimentally opened in May 1891 at my Cawnpore office, and Collectors of the adjoining districts were asked to send nominees to it. One of my kanúngo Inspectors undertook the work of instruction, and a good course of survey was laid down. About 40 persons attended the school. After a three months' course they were examined in the subjects prescribed for the kanúngo examination, and 36 succeeded in passing. As the effect of this systematic training previous to examination was very marked, sanction was applied for to entertain a special staff. This has been given, and as District Officers have cordially supported the school, it will probably receive most of the district nominees for kanúngoships in future. There will be two terms of four months each, each followed by the prescribed kanúngo examination.

5. *Residence of patwáris.*—The divisional totals for the past three years are compared in the following table :—

Divisions.	Total number of patwáris.			Number resident of patwáris.			Number non-resident of patwáris.			Percentage of number resident to total number.		
	1888-89.	1889-90.	1890-91.	1888-89.	1889-90.	1890-91.	1888-89.	1889-90.	1890-91.	1888-89.	1889-90.	1890-91.
Meerut ...	2,331	2,261	3,165	2,074	1,880	2,674	257	381	491	89	83	84
Agra	3,436	3,318	3,306	3,213	3,071	3,026	223	247	280	94	93	91

Total ...	20,870	20,620	21,481*	18,119	17,725	18,227	2,751	2,895	3,254	87	86	85

* Excludes Garhwal and Almora and includes certain estate patwáris.

The increase in the number of patwáris in 1890-91 over the previous year is due to the reversion of patwáris from settlement work. Out of 18,227 patwáris shown as resident in the North-Western Provinces, 3,024 are reported to have been exempted from residence, leaving 15,203 as actual resident. The percentage of actual resident patwáris to total number of patwáris is therefore 71.

6. As compared with 1889-90 the provincial total shows improvement. In Agra, Allahabad, and Gorakhpur Divisions the percentage decreases and is due to revision of circles. The non-resident patwáris are mostly either newly appointed or men whose circles may possibly be revised. Considerable improvement in the number of resident patwáris is noticeable in the following districts :—

Muzaffarnagar	51 to 96 per cent.
Moradabad	87 to 92 „
Mirzapur	68 to 75 „
Gházipur	53 to 68 „

7. The following districts show retrogression :—

Bulandshahr	from 67 to 55.
Fatehpur	„ 97 „ 87.
Lalitpur	„ 96 „ 89
Jaunpur	„ 92 „ 87.
Ballia	„ 93 „ 84
Gorakhpur	„ 79 „ 60.

The Collectors of Jaunpur and Lalitpur explain that the increase in the non-resident patwáris is due to deaths, dismissals, and transfer of some of the patwáris to other circles. The Collector of Gorakhpur states that suitable quarters cannot be had on hire for the patwáris, and new ones cannot be built for want of means. But endeavours are being made to induce the zamíndárs of the circles to lend their hand to the needy patwáris. The remaining Collectors explain that the falling off is due to revision of circles and to the appointment of new men.

8. *Filing of patwáris' papers.*—Appendix I herewith attached shows in district detail the dates on which the several papers were filed by patwáris. This return has been received from all districts except Jhánsi, where the revision of settlement is in progress. The figures for the Muzaffarnagar district represent the work of three tahsíls only, the remaining tahsíl, Kairana, having been under settlement.

Below is appended a comparative statement showing the punctuality or otherwise in filing the papers for 1889-90 and for 1890-91 :—

	Comparative area statement.		Kharíf crop statement.		Rabi crop statement.		Jamabandi.	
	1889-90.	1890-91.	1889-90.	1890-91.	1889-90.	1890-91.	1889-90.	1890-91.
Total number due	74,295	79,379	74,530	79,614	74,530	79,614	1,08,912	1,17,039
Filed on or before date due... ...	48,029	51,999	48,898	52,184	52,840	48,917	44,103	62,200
Percentage	64·64	65·51	65·60	65·54	70·89	61·44	40·49	53·14
Filed within one month after date ...	22,804	23,067	22,108	21,980	19,719	25,332	42,420	43,435
Percentage	30·69	29·06	29·66	27·60	26·46	31·82	38·95	37·11
Filed after one month	3,462	4,313	3,524	5,450	1,971	5,365	22,389	10,157
Percentage	4·66	5·43	4·73	6·84	2·64	6·74	20·56	8·68

Thus it will be seen that of a total number of 79,379 comparative area statements 51,999 or 65·51 per cent. were filed within time, against 64·64 per cent. in the preceding year, and 23,067 or 29·06 per cent. within one month after date due, leaving a balance of 4,313 or 5·43 per cent. against 4·66 per cent. in the preceding year. Of these 1,348 belong to Gorakhpur, 2,513 to Basti, and 452 to six other districts.

Of 79,614 kharíf statements 52,184, or 65·54 per cent. as against 65·60 in 1889-90, were filed in time, 21,980 or 27·60 per cent. filed within one month after date, leaving a balance of 5,450 or 6·84 per cent. against 4·73 in the preceding year. Of these Gorakhpur accounts for 2,217, Basti for 1,578, Saháranpur 581, Mirzapur 574, Azamgarh 313, and seven other districts for 187.

Of 79,614 rabi crop statements 48,917 or 61·44 per cent. were filed in time against 70·89 in the previous year, 25,332 or 31·82 per cent. within one month after date due, and 5,365 or 6·74 as against 2·64 in 1889-90 were unfiled after one month. Of these Gorakhpur alone contributes 2,409, Basti 2,138, Saháranpur 390, and 5 other districts 428.

Of a total of 117,039 jamabandis 62,200, or 53·14 per cent. as against 40·49 in 1889-90, were filed in time, 43,435 or 37·11 per cent. filed within one month after date, leaving a balance of 10,157 or 8·68 against 20·56 in the preceding year. Here again Gorakhpur accounts for 2,582, Basti for 1,558, Muzaffarnagar 1,708, Farukhabad for 906, Muttra 505, Sháhjahánpur 459, Mirzapur 423, Mainpuri 251, Budaun 264, Bijnor 247, Etah 352, Bánda 279, and 13 other districts for 623. The

figures for Muttra, Mainpuri, Etah, and Muzaffarnagar are the worst of all, since they had 10,397, 335, and 712 papers respectively unfiled even to the close of the year under report.

The punctuality with which all papers were filed in the districts of Etáwah, Jalaun, Lalitpur, and Benares speaks well of the patwári and kanúngo staff.

In Dehra Dún, Bulandshahr, Aligarh, Muttra, Agra, Farukhabad, Mainpuri, Etáwah, Etah, Bareilly, Bijnor, Moradabad, Cawnpore, Fatehpur, Allahabad, Jaunpur, and Ballia the whole of the area and crop statements were filed within one month of the prescribed dates. But such was not the case with jamabandis. In accounting for the delay the Collectors give different reasons. The Collectors of Dehra Dún, Saháranpur, Muttra, Bareilly, Bijnor, Budaun, Moradabad, Shábjahánpur, Basti, and Azamgarh all attribute the cause to census work. The Collector of Muzaffarnagar says that the delay was due to the patwáris having been employed on settlement work in connection with distribution of jama, &c. The Collector of Farukhabad explains that the jamabandis were withheld by those villages only in which the settlement was under revision, and jamabandis could not be written up pending completion of the rental revision. The Collector of Mainpuri attributes the cause to the dilatory and indolent habits of the patwáris as a class; but in Mainpuri revision of settlement has been proceeding in a good many deteriorated villages, and the calls of the census on the time of the patwáris was last year undoubtedly heavy throughout the province. The Collector of Etah gives the same cause as the Collector of Farukhabad. The Collector of Gorakhpur explains that, though much of the patwáris' time was appropriated by the census work, yet there is marked improvement over the previous year. For the province as a whole there was a distinct improvement in the dates within which the comparative area statements were filed. The jamabandis were also filed with greater punctuality. The kharíf and rabi crop returns were interrupted by the demands of the Census Department, and it speaks a good deal for the condition of the patwári and kanúngo staff that their regular duties were so well performed in a peculiarly harassing year.

9. *Result of testing papers.*—Appendix II shows in district detail the testing done during the year under report. The statement, excluding Jhánsi, which is under settlement, deals with 79,698 villages comprising 55,434,228 fields as compared with 74,800 villages comprising 51,215,390 fields in 1889-90. The increase in the number of villages is due to the completion of settlement operations and resumption of regular work in Gorakhpur, Saháranpur, and Muzaffarnagar. The divisional percentages under each head for the past three years are compared in the following table :—

	Percentage of fields tested by kanúngos.			Percentage of fields tested by kanúngos, retested by superior officers.			Percentage of entries in field-books found incorrect.			Percentage of entries in rent-roll found incorrect.		
	1888-89.	1889-90.	1890-91.	1888-89.	1889-90.	1890-91.	1888-89.	1889-90.	1890-91.	1888-89.	1889-90.	1890-91.
Meerut ...	11·07	9·96	9·87	11·90	18·98	15·98	5·20	6·48	5·43	30·93	3·30	8·59
Agra ...	8·95	8·82	7·92	18·08	15·78	15·30	5·75	5·09	6·34	5·98	6·27	11·40
Rohilkhand ...	11·37	10·28	8·80	13·89	18·68	19·72	3·79	4·33	3·08	2·21	2·90	1·30
Allahabad ...	9·46	9·57	8·83	12·71	13·67	13·91	6·58	6·70	4·34	6·54	6·48	4·74
Benares ...	8·09	8·34	8·03	9·80	5·70	8·15	6·35	6·99	5·73	1·75	1·89	2·03
Gorakhpur ...	7·12	6·50	5·48	8·14	6·07	11·11	6·22	7·04	8·19	38·83	17·42	10·23
Kumaun ...	17·90	12·15	11·92	17·90	17·10	14·51	13·20	7·63	3·36	2·43	6·97	5·61
North-Western Provinces.	9·11	8·69	7·87	14·43	12·76	13·87	5·58	5·80	5·18	28·19	5·05	5·18

The percentage of fields tested in the province as a whole was less than in the preceding year, though it exceeded the minimum of seven per cent. prescribed by the rules. The only districts in which this minimum was markedly in excess of the

amount of testing actually done are Gorakhpur and Basti. In Gorakhpur only 3·52 per cent. of the total number of fields were tested, and in Basti 5·47 per cent. In each of these two districts the number of fields according to the recent survey exceeds five millions, and so far the kanúngo staff appear to have found it impossible to test 7 per cent.

10. With regard to the number of entries found to be incorrect, the worst results are recorded in the Azamgarh district, as 17 per cent. of the tested fields were incorrect. The work of the Azamgarh patwáris is known to be indifferent, and of late increased attention has been paid to them.

11. Of the total number of fields tested by kanúngos 605,448 or 13·87 per cent. were retested by superior officers against 567,950 or 12·76 per cent. in the preceding year. The increase is chiefly noticeable in Muzaffarnagar, Meerut, Agra, Farukhabad, Bareilly, Pilibhít, Jalaun, and Lalitpur. In these districts the percentage of retested fields exceeded 20. In the districts marginally noted the percentage of retested fields was small.

Bulandshahr	...	...	7·3
Saháranpur	...	...	8·04
Etáwah ...	...	...	5·38
Fatehpur	...	...	7·82
Bánda ...	...	...	5·04
Allahabad	...	...	7·15
Benares ...	...	...	2·03
Gházipur	...	...	8·51
Ballia ...	...	...	3·78
Azamgarh	...	...	8·11

12. Out of the entries in field-books retested by superior officers 574,095, or 94·82 per cent. as compared with 94·20 per cent. in the preceding year, were found correct. The percentage of error was nearly the same as in the previous year. Of the entries in rent-rolls 101,122, or 94·82 against 94·95 in 1889-90, were found correct. In the Gorakhpur and Basti districts the percentage results of retesting are not given.

13. The Superintendent of Dehra Dún again notices, with reference to the large percentage of mistakes in the patwáris' papers, that the patwári circles in his district are much too large and the pay too small. This matter has been separately disposed of. The Collector of Gorakhpur says that the census work left very little time to kanúngos for testing work: that superior officers tested as many fields as they did in the previous year, though, owing to the increased area, the percentage was smaller: and that arrangements have now been made for the systematic testing of patwáris' circles by sub-divisional officers, each officer having been provided with a map of the circles under him and a note book for recording the result of his testing. The Collector of Gházipur says that less testing work than usual was done by his staff owing to census work, the death of the tahsíldár of the sadr tahsíl, and the heavy judicial work of Korantadih and Gházipur tahsíls. Most of the Collectors refer to the extraneous duties imposed upon the kanúngo staff by the census, and this has no doubt prejudicially affected the amount of testing work done during the year.

The Collector of Ballia writes—"The check exercised by superior officers over "kanúngos in the testing of fields was greater in the year under report than in the pre- "ceding year. From the result of testing by kanúngos and superior officers it would "appear that 96·65 per cent. of the khasra entries and 99·51 of the jamabandi entries "were found correct." * * * "The work of testing performed during "the year under report was far greater than that in the year preceding, but there is "still room for improvement." The Collector of Aligarh writes that in last cold season the patwáris' and kanúngos' work in the district underwent a thorough and searching examination by the Director; generally speaking, the results, except in Koel and Sikandra Rao, were satisfactory.

Testing done by sadr kanúngos is also shown in the statement.

The sadr kanúngo of Farukhabad was on tour for 174 days, of Cawnpore 155 days, of Mirzapur 153, of Naini Tal 144 days, of Allahabad 140, and of Saháranpur 131 days. The sadr kanungos of Dehra Dún, Bijnor, Jalaun, Lalitpur, Muzaffarnagar, and Azamgarh were on tour from 100 to 123 days. The sadr kanúngos of the remaining districts spent less than 100 days on tour.

The largest amount of testing done was in Muzaffarnagar (18,022), Allahabad (16,083), Meerut (13,174), Farukhabad (12,487), Bijnor (11,495), Mirzapur (12,814), and Saháranpur (10,580).

14. In the following districts testing ranges from 5,000 to 10,000 :—

Gorakhpur	9,347
Jalaun	7,479
Moradabad	6,110
Dehra Dún	5,310
Basti	9,044
Bulandshahr	5,082
Bareilly	5,330
Cawnpore	5,540

In the other districts in the province the sadr kanúngos tested less than 5,000 entries.

15. *Tahsíl registers.*—The orders issued by Government in September 1890 for the systematic examination of the pargana books by officers of the district staff have not been without result, as in many districts the volumes now show signs of more frequent use. The frequency or paucity of notes is not an absolute test of the extent to which the pargana books of a district have been examined. I know that they are constantly referred to in districts like Bánda, where individual villages require to be closely watched, and that their value is becoming more clearly recognised. The following is a summary of the notices on the subject in the district reports.

In Mirzapur the pargana books were examined by three Deputy Collectors and the results reported to the Collector, who issued orders to the tahsíldárs to note variations discovered and to rectify the errors brought to light. The pargana officers have also been directed to examine the books again this cold season and act according to rules. The officers in Jaunpur took the pargana books with them on tour and examined them. Mr. Bartlett remarks that in some cases the officers, instead of making enquiries themselves, were satisfied with the patwáris' explanations: but orders have been issued to guard against the recurrence of this. The Collector of Ballia, Mr. Rustamji, scrutinized the register of pargana Doaba and made necessary notes. Kuar Bharat Singh, the Officiating Collector, writes—"I doubt if much will be found worth notice in this respect here, where land is practically the property of tenants rather than that of zamíndárs." The Collector of Benares writes that he had no opportunity to examine the pargana books, but had ascertained that the annual entries were up to date. The Collector of Muzaffarnagar says that the pargana books, having been sent to the Settlement Officer, could not be inspected by the district staff.

In Mainpuri no progress is reported to have been made in examining the entries in the pargana books. The Assistant Collector explains that the special enquiries carried on last year with regard to irrigation rates, coupled with the continuous supervision of census work, rendered proper attention to this subject impossible. The Collector of Bijnor writes that special attention was paid to pargana books, but few notes were recorded.

16. *Inspection of districts.*—I inspected the districts of Aligarh, Farukhabad, Mainpuri, Etah, and Budaun, besides scattered tahsíls in other districts which I had occasion to visit. The districts of Saháranpur, Cawnpore (3 tahsíls), Fatehpur, Bánda, Farukhabad, Hamírpur, Jalaun, Lalitpur, Benares, Jaunpur, Gházipur, Ballia, and Basti (3 tahsíls) were inspected by Inspectors. Their inspection notes were forwarded to the Collectors for information and action.

17. *Amendments to rules.*—A new edition of Kanúngo and Patwári Rules was issued at the end of the year. Among the amendments sanctioned during the year may be mentioned the rules regarding the striking out from the village papers of

fields abandoned by tenants, which now form Appendix II of the Patwári Rules. The patwári school rules and the pargana book rules were also revised and re-issued.

18. *Preparation of districts for settlement.*—I examined the district of Budaun preliminary to revision of the present land settlement, and submitted a report on the same to the Board of Revenue. The defects found to be existing in the map and records are now receiving especial attention from the district staff.

19. *Supply of forms.*—The total expenditure on patwári forms during the year was Rs. 44,992-8-5, including last year's stock, against a budget grant of Rs. 61,000. This shows a saving of Rs. 16,000. Complaints have been received as to the quality of the paper, and probably a small increase on expenditure to secure stouter material is desirable. The subject is under consideration.

20. *Measures taken to secure greater accuracy in the record by patwáris of rental collections.*—The difficulty of securing a correct record by patwáris of rent collections in the districts of the Benares Division came under consideration during the year, and the Government sanctioned the experimental introduction into one tahsíl of each district of an expedient suggested in the course of the discussion. Zamíndárs in the tahsíls in question have been requested to file at the tahsíl, from time to time, lists of collections made by them, and the lists are made over to the patwáris, who, after checking them by enquiring from the rent payees, will copy the entries into their ledgers. It is optional to the zamíndárs not to file lists, but the permission to do so does away with the frequent excuse made by landlords that the patwári will not come to them for their accounts. The experiment has not been sufficiently tried to decide definitely whether it will succeed, and I recommend that it be continued for another year. The reports so far are not encouraging. The Commissioner of the Benares Division thus summarizes them :—

"The scheme as it is, I fear, will not succeed. It has already been condemned "by several Collectors. In my opinion, even if punitive measures are adopted, the resul- "tant evils will counterbalance any good that is expected. The worry and expense "to the zamíndárs, most of whom are illiterate, will be great, and ill-feeling between "the zamíndárs and their tenants leading to increased litigation will be its natural out- "come, supplying the scheming patwári with an additional source of perquisite."

"In Mirzapur Mr. Crooke has not as yet been able to give the experiment a "trial for reasons noted in paragraph 60 of his report."

"No lists were filed in Benares, and Mr. Macleod writes—'In my opinion, it is "absolutely useless to expect that zamíndárs will furnish any such information on mere "invitation to do so. If it is decided that they ought to be required to furnish it they "must be compelled to do so by law. Anything short of this, any attempt to "persuade them to do it, if they are not legally obliged to, can only end in waste of "time and produce no result.'"

The Collector of Jaunpur reports that only 22 lists were filed, but these were found on being tested on the spot to be correct. He, however, adds—"The tahsíldár "(of Mariahu) reports that most of the zamíndárs raised objections on the ground "of their being unable to write and not being able to afford the pay of a muharrir."

"In Gházipur no lists were filed, and Mr. Wells regrets to say that the experi- "ment has been a failure."

"The Collector of Ballia has furnished no report as to the subject, but will be "asked to do so."

"So far, however, as I can judge from the reports received, the scheme is, as I "expected it would be, a failure."

"As I have stated on other occasions, I contend that it is useless to attempt to "maintain the old village system of Northern India in districts where the people simply "will not have it. In this division landholders and tenant and the patwáris no longer "occupy that position with regard to each other which is contemplated in the Patwári "Rules, and the result of work done on the assumption that the patwári regularly "keeps the accounts of rent must be thoroughly unsatisfactory."

"The patwári in new permanently settled districts should be entirely an official of "the State, and if he is to record the accounts of tenants and landlords, these should "be compelled by law to furnish them."

* * * * * * *

21. *Crop and cultivation returns, North-Western Provinces.*—These returns have been received from all districts except Jhánsi and certain portions of Muzaffarnagar where patwáris could not file them on account of settlement work. To complete the provincial statement, figures for these have been taken from past years' returns.

The area actually under cultivation in the North-Western Provinces in 1890-91 is returned at 24,894,637 acres against 24,751,571 acres in 1889-90, and the total crop area of the three harvests is returned at 29,982,038 acres against 29,379,115 acres in 1889-90. The areas of the three harvests were as follows:—

	1890-91. Acres.	1889-90. Acres.
Kharíf	... 14,638,326	15,232,809
Rabi	... 15,179,096	13,998,801
Zaid	... 170,616	147,505
Total	... 29,988,038	29,379,115

It need scarcely be explained that the difference between the area "actually under cultivation" and the "total crop" area is due to the practice of double-cropping and of resowing winter crops on lands in which the rain crop has failed to come to maturity. In the above figures the decrease in the kharíf area of 1890 is due to the heavy rains in June and July, which greatly decreased the area under juár, maize, and arhar. The increase in the rabi area is due to the favourable character of the season in October for cold weather sowings, and to the fact that much of the kharíf sowings were lost by excessive rains. The increase occurred principally under wheat, barley, linseed, and rapeseed.

	Acres.		Acres.
Total decrease in the kharíf area of 1890...	594,483	Total increase in the rabi area of 1890-91...	1,180,295
Decrease under juar, pure and mixed ...	341,868	Increase under wheat, pure	473,514
„ maize	157,522	„ „ mixed	294,934
„ arhar	88,508	„ barley, pure and mixed ...	204,808
		„ linseed and rapeseed ...	138,192

The total irrigated area of the province has this year been returned at 7,204,363 acres against 6,604,500 acres returned last year. The increase is partly due to the larger area under wheat and partly to the great resort made to the canals during the long break in the rains in August and September 1890. The increase was equally shared by well and canal, each of which contributed 32 per cent. of the total increase.

	Acres.
Total increase in the irrigated area of 1890-91	599,863
Increase in the area irrigated from wells	190,342
„ „ canals	190,498
„ „ tanks and other sources	219,023

During the year under report 4,678 new masonry wells were constructed, while 2,342 old ones fell out of use, giving a net increase of 2,336 in the total number of wells and raising the area irrigable from wells by about 20,400 acres.

22. *Area in holdings* (*Statement II, Classification of Holdings*).—The area included in holdings of proprietors and tenants is shown in Statement II. The figures are for 1889-90 (1297 fasli), whereas the figures of cultivation given above are for 1890-91. Correct figures for holdings for 1890-91 are not obtainable till a date later than that fixed for the submission of this report. It may, however, be remarked that the area included in holdings does not materially vary in any two consecutive years, and also that it necessarily differs from the total cultivated area and from the total crop area of the year. For the "holdings area" always includes a good deal of land which, though forming part of the holdings of proprietors and tenants, was for some reason or other not under the plough during the year. Thus the total holdings area in 1889-90 was 26,853,650 acres, while the area actually cultivated in that year was 24,751,571 acres. Thus about 8 per cent. of the area included in holdings, for which in the case of tenants rent has to be paid, lay fallow or was used for grazing purposes. In Bánda and Hamírpur the percentages exceeded 17 and 15 per cent. respectively. In these districts cattle-breeding is an important industry, and tenants frequently hold large areas at lump rents, part of which they reserve for pasturage. The lump rent is usually so low that the tenant feels under no obligation to cultivate his entire holding in any one year. In other districts a high percentage of uncultivated land is to be regarded partly with suspicion and partly with apprehension—with suspicion because, as close enquiry in the deteriorated villages of Mainpuri, Etah, and Farukhabad showed, the patwáris often fail to strike out of the holdings area fields once held by proprietors or occupancy tenants, but now definitely abandoned by the occupants; with apprehension because, if the figures are genuine, the strain on the tenantry to meet the rent of so much waste land is necessarily great. The subject of securing greater accuracy in the record of the "holdings area" has been under consideration by the Board and Government, and rules have now issued for the guidance of the patwári staff.

The holdings area for 1889-90 (1297 fasli) was about the same as in the previous year. The following table shows the extent of each class of holding in each division of the North-Western Provinces in 1888-89 and 1889-90 :—

Division.		Land held—																	
		As *sír* and khúd-kásht.		By privileged tenants with respect to which they have privileged rights.		By privileged and occupancy tenants.						By tenants-at-will.				Rent-free.		Total area.	
						With respect to which they have occupancy rights.		With respect to which they have not occupancy rights.

The increase of occupancy area shown in the Meerut and Gorakhpur Divisions is due to the revised settlements, figures of which are for the first time given for Basti and portions of Muzaffarnagar, Bulandshahr, and Gorakhpur. Dividing the recorded rent by the area held by each class of tenant, the following rental averages per acre of land result :—

Division.	Average rent per acre paid—				
	By privileged and occupancy tenants with respect to which they have occupancy rights.	By privileged tenants for land for which they have not occupancy rights, but which they have held for 12 years or more.	By privileged tenants for land which they have held for less than 12 years.	By tenants-at-will—	
				For land which they have held for 12 years or more.	For land which they have held for less than 12 years.
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
Meerut	4 3 11	4 2 1	4 5 9	4 9 0	5 6 4
Agra	4 3 6	3 15 5	3 13 3	4 7 2	4 10 8
Rohilkhand	3 4 7	3 10 8	3 11 2	3 12 4	3 10 0
Allahabad	3 14 2	3 1 6	2 10 1	3 6 3	3 2 4
Benares	3 15 3	3 12 3	3 9 4	3 1 4	2 14 3
Gorakhpur	3 12 5	3 7 8	3 3 10	3 10 11	3 0 5
Naini Tal district	3 7 6	2 11 11	3 5 9	1 14 7	1 13 2

The only comment which need be made on these figures is that they fail to represent accurately the real difference existing between the rents paid by occupancy tenants and by tenants-at-will. The occupancy tenant, as a rule, holds much better land than the non-occupancy tenant, and therefore the comparison is misleading. Soil for soil, the occupancy tenant in every district in the province holds at less than the full competitive rent.

23. *Rental, demand, and collections.*—These are shown in Statement I, the figures of which are for 1889-90 (1297 fasli). The area for which rental statistics are here given has hitherto been the holdings area of Statement II less rent-free lands. But it has lately been decided that lands cultivated by proprietors themselves, known as *sír* and *khúdkásht*, should also be excluded from Statement I, as its object is to show the actual rental demand and the actual collections. The rents frequently found entered against *sír* and *khúdkásht* in the village papers have a real value in the inter-proprietary accounts : but they are not collected in the same way as are the rents of tenants. To include them in the demand and to enter them as collected in full, as has been the practice in the past, is apt to exhibit the total rent collections in too favourable a light. The decision to exclude them is therefore obvioulsy correct. The orders unfortunately were not fully observed in all districts in 1889-90, and a good deal of *sír* and *khúdkásht* land, with its nominal rent demand and full collections, has been returned in in Statement I. According to Statement II, the *sír*, *khúdkásht*, and rent-free holdings aggregated 6,470,730 acres. Deducting this from the total holdings area, the true rent-paying area to be dealt with in Statement I should be 20,382,920 acres. The area returned by the districts, however, in Statement I exceeds this by 2,030,481 acres, and to this extent have proprietary holdings with their nominal rents been included. The rental demand on the area given in this statement was Rs. 84,093,098, and the total collections were Rs. 77,339,901.

The collections were thus distributed :—

	Rs.
On account of current demand	68,733,336
„ previous years	86,06,565

The percentage of collections on account of the current demand according to these figures was 82.

Minute accuracy cannot be claimed for the record of rent collections in our village papers. It is the one matter regarding which the patwáris' returns are most unreliable.

In the eastern districts the zamíndárs and tenants have long been accustomed to adjust their rent accounts without the intervention or presence of the patwári, and as yet no satisfactory means have been found to ensure that he is fully informed of all payments. In districts where the patwári retains his original position as the village accountant, his record of rent collections is more complete, but is seldom exhaustive. If, as often happens, the zamíndár also acts as the tenants' money-lender, first payments are credited by him with the tenants' acquiescence, against such debts. In such villages rents are always in arrears, and considerable sums at the end of the third year disappear from the patwári's ledger as being barred by limitation. For all that they are often eventually realized, and any loss the landlord may sustain in respect of short rental collections he more than makes up by the profits of his money lending.

q Including 11 pending applications of 1889-90 there were 87 for issue of notice. In 76 instances notices were issued during 1890-91 and the remaining 11 applications were disposed of without issue of notice.

r Fourteen of these notices pertain to applications filed in 1889-90.

s One of these notices pertains to an application filed in 1889-90.

t Five applications were struck off owing to default or formal defects.

u Eighteen of these notices pertain to applications filed in 1889-90. Out of 887 applications filed under Class XVIII during 1890-91 notices were issued in 878 instances and in 9 cases notices remained to be issued when the year closed.

* Two hundred and seventy-seven applications are entered in column 5 of Appendix B.-II, against Class XX, but two are old applications again brought on the file on remand, consequently the number of fresh applications is 275 of which the results of 263 disposed of have been shown in columns 9 and 10 of this appendix and 12 remained pending when the year closed.

v Of these 844 notices 116 pertain to applications filed in 1889-90 and 728 to applications filed in 1890-91. Notices remained to be issued in 208 instances when the year closed, and in the remaining 14 applications notices were not issued owing to incorrect numbers having been given.

w This excludes 25 notices which could not be served owing to the tenants having died or left the village without leaving any trace as to their whereabouts.

x Nine hundred and twenty-eight applications are entered in column 5 of Appendix B.-II, against Class XX, but 12 are old applications again brought on the file on remand, consequently the number of fresh applications is 916 which have been disposed of and their results entered in columns 9 and 10 of this appendix.

y Three hundred and thirty-four applications are entered in column 5 of Appendix B.-II., against Class XX, but two are old applications again brought on the file on remand, consequently the number of fresh applications is 332 of which the results of 331 disposed of have been shown in columns 9 and 10 of this appendix and one remained pending when the year closed.

z Eighteen of these notices pertain to applications filed in 1889-90. Out of 639 applications for issue of notices under section 35 notices were issued in 590 cases during the year, 17 applications were struck off without issue of notices and in 32 cases notices remained to be issued when the year closed.

A In two cases decree-money was paid without the notices being issued.

B One thousand and eighty-five applications are entered in column 5 of Appendix B.-II, against Class XX, but three are old applications again brought on the file on remand, consequently the number of fresh applications is 1,082 of which the results of 1,080 disposed of have been shown in columns 9 and 10 of this appendix and two remained pending when the year closed.

APPENDIX IX.

Statement showing action taken under sections 173 *and* 174 *of Act XII of* 1881, *to avert sale in execution of decrees in rent suits for the year* 1890-91.

Division.	District.	Number of cases in which execution was taken against a mahál or a share in a mahál during the year and those pending at the close of last year.	Number of cases in which arrangements were made by the Collector to avert sale or which were otherwise disposed of.	Number of cases reported to the Board for sanction.	Number of cases sanctioned by the Board.	Number of cases in which sale took place.	Explanation of cases sanctioned in which sale did not take place.					Number of cases otherwise disposed of under Board's orders.	Explanation of cases otherwise disposed of.		Total number of cases disposed of, *i.e.*, total of columns 4, 7, 12 and 13.	Cases pending, *i.e.*, in which no action was taken to avert sales during the year.
							Number of cases in which decree was satisfied or fresh bond executed.	Number of cases in which sale was postponed either for want of bidders or at the decree-holder's request or suspended at the request of civil court.	Number of cases struck off at decree-holder's request.	Number of cases in which sale did not take place during the year owing to sanction not having been received before the end of the year.	Total.		Number of cases in which transfer of judgment debtor's property was ordered by the Board.	Number of cases in which execution of decree was barred by limitation.

C.—GENERAL SERIES.

APPENDIX II.

Statement of coercive processes for recovery of arrears of revenue, during the revenue year 1890-91—(concluded).

Process.		Kumaun Division.				Grand Total.
		Kumaun.	Garhwál.	Tarái.	Total.	
Writs of demand.	Number of mahálsin district ...	5,162	3,288	884	9,334	1,21,715
	Number of mahálsconcerning which writs of demand issued	1,899	1,226	...	3,125	41,749
	Number of writs	1,904	1,226	...	3,130	55,002
	Number per mahál	1	1	...	1	1
	Arrears on account of which writs issued Rs.	57,719	23,385	...	81,104	1,45,08,392
	Largest number of writs issued on any single mahál in a single kist ...	2	1	...	2	2
	Process servers' fees. Amount of fees leviable—Arrears Rs.	43	11	...	54	302
	Current Rs.	1,428	919	...	2,347	41,251
	Realized Rs.	1,416	912	...	2,328	40,933
	Disbursed Rs.	538	205	...	743	22,171
	Surplus Rs.	878	707	...	1,585	18,762
	Deficit Rs.	...	...	...	...	...
Arrest and detention.	Number of mahálsin which this process was used	20	97	20	137	5,357
	Number of persons arrested	27	1	21	49	7,188
	Arrears on account of which this process issued Rs.	342	1,361	2,924	4,627	12,11,925
	Number of defaulters actually detained.	...	1	...	1	1,159
	Average term of detention Days.	...	2	...	2	5
	Longest term any single defaulter was detained Days.	...	2	...	2	18
Distress and sale of movable property.	Number of mahálsin which this process was used	90	...	...	90	6,024
	Number of defaulters	103	...	...	103	10,831
	Arrears on account of which this process issued Rs.	1,120	...	...	1,120	11,02,261
	Number of cases in which sale actually took place	...	...	...	...	368
	Arrears due in these cases Rs.	...	...	...	...	80,608
	Amount recovered by sale of distrained property Rs.	...	...	...	...	25,189
Attachment of shares, pattis or mahálsunder section 154.	Number of mahals, shares or pattis attached	72	...	...	72	386
	Revenue of such mahals, shares or pattis Rs.	3,674	...	...	3,674	3,21,127
	Arrears on account of which process issued Rs.	684	...	...	684	1,73,643
Transfer under section 157.	Number of mahálsin which shares or pattis were transferred	...	...	...	...	12
	Number of shares or pattis transferred ...	...	...	...	...	28
	Revenue of such shares or pattis Rs.	...	...	...	...	3,870
	Arrears on account of which process issued Rs.	...	...	...	...	2,090
Annulment of settlement under section 158.	Farm ... Number of mahálsor pattis farmed ...	...	...	...	...	30
	Revenue of such mahálsor pattis Rs.	...	...	...	...	28,972
	Arrears for which farmed Rs	...	...	...	...	20,961
	Direct management. Number of mahálsor pattis held under direct management ...	...	...	...	...	1
	Revenue of such mahálsor pattis Rs.	...	...	...	...	1,340
	Arrears of revenue for which taken under direct management Rs.	...	...	...	...	2,505
Sale ...	Of mahálsor pattis. Number of mahálsor pattis sold	...	...	...	...	2
	Revenue of such mahálsor pattis Rs.	...	...	...	...	2,035
	Arrears of revenue for which sold Rs.	...	...	...	...	4,786
	Amount realized by sale Rs.	...	...	...	...	4,100
	Of other immovable property. Number of mahálsor pattis on account of which this process issued ...	...	...	...	...	...
	Revenue of such mahálsor pattis Rs.	...	...	...	...	...
	Arrears for which sold Rs.	...	...	...	...	...
	Amount realized by sale Rs.	...	...	...	...	...

APPENDIX III.

Comparative statement of proprietary mutations registered under orders of Civil and Revenue Courts, or by private transfer, consequent on sale or mortgage, &c., during the agricultural year 1890-91.

Division.	District.	Under orders of Court.										By private transfer.								Number of succession cases.	Number of mortgage cases.	Number of redemption of mortgage cases.	Number of other cases.	Total number of cases.
		Sale of revenue paying lands.				Sale of revenue-free lands.				Number of other cases.	Total number of cases.	Sale of revenue paying lands.				Sale of revenue-free lands.								
		Number of cases.	Aggregate land revenue of property transferred.	Price.	Number of years' purchase of the revenue.	Number of cases.	Estimated land revenue of property transferred.	Price.	Number of years' purchase of the revenue (assumed).			Number of cases.	Aggregate land revenue of property transferred.	Price.	Number of years' purchase of the revenue.	Number of cases. „ to reductions in settlement	145	
„ to diluvion	2,192	
„ to exemption to grove lands	23	
Remissions to loyalists	20	
Reductions in the summary settlement assessments	178	
Remitted by G. O. No. $\frac{448}{I.-213}$, dated 26th August 1890	30	
Ditto „ $\frac{616}{I-859}$, dated 6th April 1891	2,459	
Ditto „ $\frac{1142}{I-779}$, dated 29th May 1891	6	
Ditto „ $\frac{1252}{I-18}$, dated 5th June 1891	2,651	
Ditto „ $\frac{1262}{I-428}$, ditto	137	
Ditto „ 2430, dated 29th September 1891	1,892	9,781
Total ...		36,124
OUTSTANDING BALANCE OF 12 PER CENT. LOCAL RATE.		
Recoverable—		
Due from estates under attachment	895	
„ to suspension in Agra	65	
Realized since close of the year	100	
Under recovery	135	1,195
Doubtful—		
Due to deterioration and recommended for remission	214	
„ from distressed villages in Farukhabad, Mainpuri and Etah	8,763	8,977
Irrecoverable—		
Due to diluvion and to jama of estates having been struck off the roll	490	490
Total ...		10,662
ACREAGE RATE BALANCE.		
Due to acquisition of land for railway purposes	2	
Relinquished land assessed to revenue but not sold	3	
Due to annual reduction on account of diluvion, &c.	410	
Since realized	18	433
COMMUTED JAGÍR CESS BALANCE.		
Realized since close of the year	2	
Due to annual reduction on account of diluvion	11	13
ROAD CESS BALANCE.		
Relinquished land assessed to revenue but not sold	2	
Due to annual reduction on account of diluvion, &c.	257	259
GRAND TOTAL ...		47,491

E.—MISCELLANEOUS SERIES.

APPENDIX VIII.

Statement showing the alterations in the demand of occupiers' rate for the revenue year 1890-91.

District.	Demand of—		Increase.	Decrease.	Remarks.
	1889-90.	1890-91.			
	Rs.	Rs.	Rs.	Rs.	
Dehra Dún ...	33,660	32,404	...	1,256	No explanation furnished.
Saháranpur ...	3,58,436	3,72,831	14,395	...	
Muzaffarnagar,	6,53,630	6,40,708	...	12,922	No explanation furnished.
Meerut ...	8,75,176	9,01,481	26,305	...	Due to irregularities of the rainfall.
Bulandshahr ...	4,63,402	5,35,432	72,030	...	Prolonged break in the rainfall in 1890-91 and deficient winter rains.
Aligarh ...	3,24,384	3,76,661	52,277	...	
Muttra ...	2,23,922	1,85,955	...	37,967	The rainfall of September 1890 was sufficient to allow of the spring sowings being effected without canal irrigation.
Agra ...	91,550	78,613	...	12,937	Decrease is due to rains being plentiful.
Farukhabad ...	1,04,409	1,57,300	52,891	...	Due to break in the rains in August and September 1890.
Mainpuri ...	2,65,505	3,15,811	50,306	...	Ditto ditto ditto ditto.
Etáwah ...	3,85,760	4,74,926	89,166	...	Due to the re-opening of the Bewar Branch of the Lower Ganges Canal.
Etah ...	1,79,799	2,14,149	34,350	...	No explanation furnished.
Bijnor ...	14,615	15,451	836	...	Due to break in the rains and the increased cultivation of sugarcane.
Bareilly ...	55,088	60,880	5,792	...	Due to larger demand for canal water.
Pilibhít ...	9,986	10,442	456	...	No explanation furnished.
Cawnpore ...	3,51,220	4,94,674	1,43,454	...	Due to extensive cultivation of rice before the rains began and to extensive rabi cultivation.
Hamírpur ...	3,572	4,506	934	...	Increasing appreciation by the people of the advantage of the canal.
Jhánsi ...	968	1,254	286	...	
Jalaun ...	68,356	98,534	30,178	...	No explanation furnished.
Tarái ...	5,659	4,438	...	1,221	Due to favorable winter rains.
Total ...	44,69,097	49,76,450	5,73,656	66,303	

E.—MISCELLANEOUS SERIES.

APPENDIX IX.

Explanatory memo. of balances of the occupiers' and owners' rates for the revenue year 1890-91.

Name of District.	Current balance.	Outstanding balance.	Explanation of balance.
Occupiers' rate.	Rs.	Rs.	
Aligarh ...	3,750	...	Rs. 1,791 realized since the close of the year, Rs. 450 under attachment and Rs. 1,509 under recovery for which proper measures have been taken.
Do. ...	...	179	Realizable by instalments.
Muttra ...	997	...	Rs. 308 since realized, and the balance due from attached estates and from non-resident lambardár.

* Figures of 1296 fasli have been repeated: figures for 1297 fasli not being available owing to settlement work.

† Figures for a portion of the district only are for 1297 fasli; figures for the remaining portions have been given from previous returns.

APPENDIX VIII.

Statement showing classification of holdings and corrected rental for 1297 *fasli*—(concluded).

District.		Total area.	Land held—									Rate paid by 6, 7*a* and 8*a*.	Rate paid by 7*b* and 8*b*.	Corrected rental by applying to total area of land in column 2.		Land held by sub-tenants.
			As sír.	By zamíndárs as tenants other than sír.	By privileged tenants with respect to which they have privileged rights.	By privileged and occupancy tenants. With respect to which they have occupancy rights.	By privileged and occupancy tenants. With respect to which they have not occupancy rights. For 12 years or more.	By privileged and occupancy tenants. With respect to which they have not occupancy rights. For less than 12 years.	By tenants-at-will. For 12 years or more.	By tenants-at-will. For less than 12 years.	Rent free. As grant from landlord.	Rent free. In lieu of wages.			Rate of columns 6, 7*a* and 8*a*.	Rate of columns 7*b* and 8*b*.

APPENDIX XI.

Explanatory of the patwári rate balances for the revenue year 1890-91.

Description.	Amount.	Total.
CURRENT BALANCE.	Rs.	Rs.
Recoverable—		
Attachment and other processes in issue for recovery of arrears	414	
Realized since close of the year	2,038	
Under recovery	1,247	3,699
Doubtful—		
Due from deteriorated villages in Farukhabad, Mainpuri, and Etah	3,790	
Ditto certain villages in Bulandshahr and Bareilly, the revenue of which has been proposed for remission.	9	3,799
Irrecoverable—		
Due to remissions in the deteriorated villages of Muttra and Agra	1,392	
Ditto ditto of Saháranpur, Hamírpur, and Jalaun	128	
Due to summary settlement of alluvial mahál	674	
Do. reductions at regular revision of settlement	36	
Do. assessment of grove lands	5	
Remissions for loyal services	6	
Do. for losses by hail	829	
Do. for acquisition of land	14	
Railway land in Benares assessed but not sold	8	3,092
		10,590
OUTSTANDING BALANCE.		
Due from deteriorated villages in Farukhabad, Mainpuri, and Etah	1,735	
Do. do. in Hamírpur and Jhánsi	191	
Due to revision of settlement	103	
Suspended on account of land taken for railway purposes	2	
Due from estates under attachment	52	
Realized since close of the year	295	
Under recovery	264	2,642
GRAND TOTAL ...	...	31,232

ORDERS OF GOVERNMENT.

No. $\frac{1848}{I-310}$ OF 1892.

FROM

THE CHIEF SECRETARY TO GOVERNMENT,
N.-W. PROVINCES AND OUDH,

TO

THE SECRETARY TO THE BOARD OF REVENUE,
N.-W. PROVINCES AND OUDH.

DATED NAINI TAL, THE 18TH JULY 1892.

SIR,

REVENUE DEPT.

I AM directed to acknowledge the receipt of your letter No. $\frac{821}{XII-210}$, dated 13th April 1892 (received on 4th June), with which you submit the Board's report on the Revenue Administration of the North-Western Provinces for the year 1890-91. The revenue administration of Oudh, which is now under the jurisdiction of the Board, has been dealt with in a separate report. It was found impossible to assimilate sufficiently the forms of annual returns in use in the two Provinces so as to allow of an amalgamated report being prepared. It is understood however that the Board's report for 1891-92 will embrace both the North-Western Provinces and Oudh.

Administrative changes. Paragraph 3.

2. On 1st April 1891 effect was given to the administrative changes (having mainly for their object the assimilation of Oudh to the North-Western Provinces, but in part also re-adjusting existing arrangements in the North-Western Provinces) which had been determined on after consideration of the report of the Committee appointed to examine the question by Resolution No. 9, dated 2nd February 1889. The final conclusions of this Government were embodied in its Resolution (Revenue Department No. $\frac{1259}{I-549A}$, dated 26th July 1890). In the North-Western Provinces there was a redistribution of the charges of Commissioners. The Jhánsi Division was abolished, and a new division, consisting of the Gorakhpur, Basti and Azamgarh Districts, was created. The districts of the Jhánsi Division were transferred to the Allahabad Commissionership and the district of Jaunpur was transferred from Allahabad to Benares. These changes have made necessary a fresh tabulation of divisional statistics of previous years, so that they should correspond with the statistics of the divisions as now constituted. The reorganisation has produced the good results anticipated from it, and has done much to equalise the revenue case work of the divisions.

Rainfall and harvests. Paragraphs 5 to 7.

3. The harvests of the year under report depended on the rains of 1890 and the winter rains of 1890-91. The monsoon of 1890 was much heavier than its pre-

decessor and gave an average of 51·7 inches against a Provincial average for the previous five years of 44·6 inches. But the rainfall was very unevenly distributed, and varied by as much as 20 inches between subdivisions of the same district. It was also exceptionally ill-distributed over the rainy season. Heavy and incessant falls in June and July were followed by a long break, the anxiety caused by which was relieved by timely rains in the middle of September. Owing to floods and excessive rainfall the autumn sowings were lost over a large area, and they everywhere suffered from the drought of August and from the impossibility of weeding the crops in June and July. The average outturn of the autumn harvest was worse than that of 1889-90, but an unusually large area was put under spring crops; the winter rains, though light, were generally sufficient; the spring harvest in the western districts was an excellent one, and its outturn was better for almost all crops than that of the previous year. The kharíf harvest of 1891, though the rainy season last year did not begin till the latter half of July, was, with the exception of the cotton crop, exceptionally good. The crops of the calendar year 1891 were therefore decidedly above the average.

Hailstorms and floods. Paragraph 8.

4. Hailstorms in February and March 1891 marred the promise of the ripening crop in a certain number of villages. The districts of Allahabad, Cawnpore and Jalaun suffered considerably, and it was found necessary to grant remissions of revenue to the extent of Rs. 90,823. Some remissions were also granted in Etawah and Pilibhít, where however the injury caused by hail was much less extensive. In Basti the poppy crop sustained some damage, but neither there nor in other districts where hail fell was the loss so serious as to require relief in the form of suspension or remission of revenue.

In the canal-irrigated districts of Muzaffarnagar, Bulandshahr and Aligarh there were serious and extensive inundations arising from the soil having become water-logged, and being unable to absorb even a moderate rainfall. In all these districts drainage schemes have been sanctioned and are being carried out by the Irrigation Department. The Board urge them upon the attention of the Government. The subject has been kept prominently by the Government before the Sanitary Board who will again be addressed. The largest work is that which will utilise the depression of the Patwaya nála as a drainage line, and will discharge directly into the Jumna the water which now finds its way into the Karon nadi and causes inundations in Bulandshahr and Aligarh. March 1893 is the date fixed for final completion of this work.

Floods occurred along the banks of the Ganges, Rámganga and Gogra, and in Ballia especially many houses and much property were destroyed. All the districts of the Gorakhpur Division suffered from floods and special grants of takávi were found necessary. In Azamgarh temporary poor-houses were started to relieve the wants of the destitute, and in Ballia private charity intervened to alleviate the distress

caused by the floods. Happily all these districts escaped inundation in 1891 and the distress has disappeared.

Public health: prices of food grains and condition of agricultural stock. Paragraphs 9 to 11.

5. In the western divisions—Meerut, Rohilkhand, Agra and Kumaun—the public health was fairly good, but in the central and eastern divisions—Allahabad, Benares and Gorakhpur—the year was decidedly unhealthy. In these divisions cholera prevailed in an epidemic form throughout the hot weather and rains, while in the Gorakhpur Division fevers and enteric disease were unusually fatal. It was remarked that while cholera raged in the interior of the Allahabad District the city itself enjoyed a comparative immunity. In Agra also the health statistics have much improved, and these results are attributed by the local authorities in great measure to the new water-supply which has been provided for the two cities of Agra and Allahabad. The very general acceptance of the Vaccination Act by municipalities which has taken place within the last two years will also not have been without effect. The condition of cattle was on the whole good. There was little epidemic disease, though in some districts, especially in Mirzapur, Jaunpur and the districts of the Kumaun Division, mortality among cattle was heavy. The deaths appear to be mainly due to the scarcity of good and wholesome fodder and to have occurred among the least valuable animals. The Commissioner of Kumaun deplores the apathy of the people in the adoption of preventive measures, but has noticed some tendency on their part to appreciate the advantage of segregating infected herds; a tendency which should be in every way supported and encouraged.

Food grains were exceptionally dear throughout the year, and in all districts the poorer classes felt the pinch of the high prices of food. The kharíf harvest of 1890 was not such as to compensate the small outturn of the previous year. Prices were considerably higher in January 1891 than they were a year before: the high prices were maintained, and in the case of the coarser grains the rates for August 1891 were considerably in excess of those for January. Towards the close of the year the rates for wheat, barley and gram fell; and this fall was continued so that in April 1892 prices were much easier than in April 1891.

The effect of the high cost of food grains was most marked in the eastern districts and in portions of the Agra Division, which have suffered from a period of agricultural depression. In June, July and August prices rose to such a height as to cause grave apprehensions of scarcity in the Gorakhpur Division. The Bengal and North-Western Railway, while protecting those districts from famine, has raised the level of prices to which in normal years the people were accustomed.

State of arrears of previous years. Paragraphs 14, 16, 17, 21, 23, 26, 28, 30 and 101.

6. The demand and collection of arrears from previous years under the principal heads of revenue were as follows:—

STATEMENT I.—*Arrears of previous years.*

Heads of receipt.	Demand.	Collections.	Remissions.	Total.	Balance.
	Rs.	Rs.	Rs.	Rs.	Rs.
Land revenue on the roll	6,49,556	2,03,906	1,91,577	3,95,483	2,54,073
Land revenue not on the roll	12,941	12,161	...	12,161	780
Málikána	846	846	...	846	...
Twelve per cent. cess	30,521	10,323	9,536	19,859	10,662
Acreage cess	1,435	1,162	273	1,435	...
Miscellaneous land revenue, Imperial and Provincial.	119	119	...	119	...
Occupier's rate	76,327	50,656	3,464	54,120	22,207
Owner's rate	8,043	5,456	175	5,631	2,412
Patwáris' rate	10.115	5,378	2,095	7,473	2,642
Total ...	7,89,903	2,90,007	2,07,120	4,97,127	2,92,776

The balance of land revenue borne on the roll was large, amounting to Rs. 6,49,556 as compared with Rs. 4,50,683 in the previous year. Rs. 2,03,906 were collected during the year and Rs. 2,359 shortly after the close of the year: Rs. 1,91,577 were remitted and Rs. 5,782 are nominal. The outstanding balance is therefore, as shown in paragraph 14 of your report, Rs. 2,51,714. Of this, however, Rs. 1,70,886 are mainly due from deteriorated villages in the Agra Division, the assessments of which have been under revision. In accordance with the rules for the revision of settlement all outstanding arrears of revenue will be remitted whenever the revenue of a village is reduced. In the Etah District alone, which shows a balance of Rs. 1,55,927, the Settlement Officer has recommended the remission of Rs. 1,36,414. Settlement operations have now been concluded, and the greater portion of these balances will be removed from the accounts during the current year. Of the remaining outstanding sum, Rs. 35,590 are due from estates under attachment in the Agra Division and in Bundelkhand. Nearly all are deteriorated estates and a large part of the arrears may have to be remitted.

Of the arrears of occupier's rates, Rs. 22,207, no less than Rs. 19,032 are due from attached and distressed villages in Etah as explained in paragraph 28 of the Report. Since the close of the year the Commissioner, under the authority of G. O. No. $\frac{313}{1-604A}$, dated 22nd February 1890, has remitted as irrecoverable, owing to want of assets, a sum of Rs. 4,902 due from some of the distressed villages. The condition of the other villages should be examined and these arrears should be either collected or remitted.

Current demand and collections.

Paragraphs 13, 16, 17, 19, 20, 22, 26, 27, 29, 31 to 34, 67, 72, 75 to 77, and 101.

7. The current demand rose from Rs. 582,22,102 to Rs. 593,65,982 and the total receipts from Rs. 575,66,170 to 583,67,373. The principal heads of increase in the demand are:—land revenue Rs. 2,48,413; occupier's rate Rs. 5,07,353; and advances under the Agricultural Loans Act 3,82,357. The receipts for the year are shown in paragraph 12 of the Board's report as amounting to Rs. 586,57,380. This figure includes collections on account of previous years, but the sum of the collections shown in Statement I, Rs. 2,90,007, and in Statement II,

Rs. 583,67,373, of this review agrees with the total shown in the financial statement of the Board's report. In future years it will be convenient if the Board will compile statements showing separately under each head of revenue the current and arrears demand, collections and remissions, together with a classification of the balance into nominal, real and total.

The current demands, with collections, remissions and closing balances, are shown in Statement II attached:—

STATEMENT II.—*Current demands, with collections, remissions and closing balances.*

8. The demand on account of land revenue borne on the roll has risen from Rs. 427,89,447 to Rs. 449,75,872, being a net increase of Rs. 21,86,425. This increase is mainly due to the regular revision of settlement in the districts of Saháranpur, Bulandshahr, Gorakhpur, Basti and Jalaun: the revised demand which had previously been shown as land revenue not on the roll having been brought on the roll from 1st October 1890.

Excluding nominal items, the collections averaged 98·98 per cent. of the demand against a percentage in the previous year of 99·12. There are fourteen districts with a clean balance sheet, and among them are three—Saháranpur, Bulandshahr and Basti—in which the land revenue has been largely enhanced at the recent revision of settlement. Fifty-seven per cent. of the total balance and 73·5 per cent. of the recoverable balance belong to the Agra Division. The Etah District is responsible for no less than 36 per cent. of the recoverable balance, or Rs. 1,04,643. The Settlement Officer has finished the inspection and assessment of the deteriorated villages in Etah, and his last report is said to be under the consideration of the Commissioner. No delay should be allowed to occur in bringing the settlement operations in the Agra

Division to a close. The Commissioner remarks that the existence of a revision of settlement in these districts has encouraged malingering and recusancy on the part of the well-to-do. The Board observe that default has become chronic, and that the zamindárs have discovered that the best way to ensure attention to their claims for relief is to refuse to pay their revenue. As each revision is concluded the question of outstanding balances should receive careful attention. Sums which are really irrecoverable should be remitted or proposed for remission, and the punctual payment of the revised land revenue must be insisted on. The same remarks apply to the proposals framed by the Collector of Bánda for the reduction of revenue in villages which have suffered seriously from the spread of káns grass. Relief should be given when necessary; it should be given speedily and liberally; but when once it has been given default must be treated with a firm hand.

The Board reported on 15th July 1892 the conclusions arrived at by the Committee which met at Agra last cold weather to discuss the scheme for preventing floods from the Utangan river in the Fatehpur-Sikri tahsíl.

9. The Lieutenant-Governor concurs in the view taken by the Board regarding the rule (No. 7 of the rules for the revision of assessment in the Mainpuri, Etah and Farukhabad Districts) which has been criticised by the Commissioner of Agra. The rule provides that in large estates with some deteriorated villages the necessity for relief should be determined with reference to the estimated loss in the entire estate. The State having entered into an engagement for a long period, is not equitably bound to revise the assessment of a portion only of an estate so long as the proprietor obtains from his estate as a whole a rental not materially less than what was assumed to be his rental when the settlement was made. The revenue of deteriorated portions is not revised, not because the proprietor is wealthy and can pay, but because his income has not been reduced below what it was at the time when he accepted the settlement.

10. It is satisfactory to find that the barbed wire fence put up in 1891 at the instance of the local authorities to protect Agra and Muttra villages from the wild cattle of the Bhartpur State promises to be successful. Instructions have since been given to extend the fence.

11. The case of the Bánda villages and of the Jalaun villages referred to in paragraph 13 (pages 16 and 17 of the report), of which the condition since last settlement is said to call for inquiry, should be placed with as little delay as possible before the Government; and the necessary intermediate relief should be afforded them under the Board's orders.

12. The area taken under the Land Acquisition Act was less than in the previous year, and was required mainly for canals and railways. The average rate of compensation per acre paid for the land permanently acquired was Rs. 32-11-1 as compared with Rs. 58-0-8 and Rs. 81-6-2 of the two

Acquisition of land. Paragraph 24.

preceding years. The number of pending cases has risen from 151 to 269, and for this increase Bánda, Bareilly and Etah are chiefly responsible. The Lieutenant-Governor is glad to see that necessary measures have been taken by the Board to ensure the clearance of the pending files, some of which date back as far as 1888 and call for immediate disposal.

Canal occupier's and owner's rates. Paragraphs 27 to 30.

13. The peculiarities of the season, the prolonged dry weather in August and in the beginning of September 1890, and the lightness of the winter rains were the cause of extensive canal irrigation. The demand for occupier's rate rose by Rs. 5,07,353, or 11·35 per cent. The most noticeable increase occurred in the Cawnpore District, where the practice of growing rice sown with the aid of canal water before the rains begin has been found profitable. An extension of rice cultivation is anticipated in the current year, and the Lieutenant-Governor will be glad to receive some further information as to the conditions of the cultivation, whether it is of rice sown broadcast or of transplanted rice, and how many waterings as a rule are required for the crop. The progress made in the Hamírpur and Jalaun Districts in irrigation from the Betwa Canal is not unhopeful.

Owner's rates in Bulandshahr and Saháranpur have become merged in the land revenue, and from 1st October 1891 the owner's rate levied on revenue-paying estates in the Muzaffarnagar District has also been abolished. There has however been an increase in the demand owing to the same causes which led to an increase in the occupier's rate. The collections of canal rates were on the whole satisfactory and balances have been sufficiently explained.

State properties. Paragraphs 31 to 34.

14. In State properties the collections have been good, but it is unsatisfactory that there is again a considerable arrear in Bánda, and from the same villages of Jaspura and Jauharpur. These are reported to be prosperous villages and beyond the range of káns. It is said that an efficient manager has been now appointed and the Collector proposed to carry out schemes of improvement. But even in a favourable year the current demand is not realised, and from the information at present before Government it would seem that the difficulties of manangement have not been overcome. The case calls for supervision and direction from the Board. If the Board are satisfied that the rental demand is fair, firmness in its realisation is essential.

The stud lands of Gházipur, referred to in paragraph 31, have been now leased for a term of years.

Payment of land revenue by money orders. Paragraphs 36 and 37.

15. The Board note the steady growth in popularity of the system of remitting land and miscellaneous revenue by money orders. There is an increase in the number and value of land revenue money orders in all divisions except Benares and Gorakhpur. In the other Divisions all districts, except Agra, Bareilly and Sháhjahánpur, show an increase. The decrease

is most marked in Azamgarh and is attributed to a general scarcity of money owing to bad harvests. When money is scarce the revenue-payers wait till a demand is made on them and voluntary payments become less frequent. Any practice of paying revenue into the hands of peons such as is said to exist in Azamgarh must be put an end to.

Litigation under the Rent Act. Paragraphs 38 to 65.

16. The statistics show that the Rent Law litigation, though less in both suits and applications than in 1889-90, is still heavier than in any other year since the passing of Act XVIII of 1873.

Taking suits and applications together, the number has fallen by 3,217, *viz.*, from 234,029 to 230,812. The decrease took place in Rohilkhand and the eastern divisions. Meerut and Agra show an increase in both suits and applications.

17. Suits for arrears of rent formed 89·77 per cent. of the total number filed under all classes, the percentage in the two previous years having been 90·88 and 90·09. The special causes to which this large amount of litigation may be due were discussed in the review of last year's report. The decay of the powers and influence of the lambardár; the number of partitions which have been effected in recent years involving smaller properties, and an increase in the number of rent collectors are no doubt active causes. The fact that every year villages pass into the hands of the money-lending classes is not without its influence on litigation. The traditions and training of the monied classes make them disinclined to let arrears run on.

18. The total value of rent money orders issued during the year is practically the same as in 1889-90, but some districts exhibit remarkable variations. In Meerut there is an increase in value from Rs. 29,000 to Rs. 45,000; in Bulandshahr the amount of rent thus remitted fell from 1,79,000 to 1 lakh. Concurrently with the increased number of money orders in Meerut there was a decrease in suits for arrears from 2,896 to 2,316. In Bulandshahr there was a heavy rise in suits for arrears from 3,120 to 4,103. The Collector of Bulandshahr ascribes the decrease in the number of money orders to more happy relations between landlords and tenants, while attributing the increase in the number of suits to ill-feeling and disputes between the same classes. The effect, if any, on litigation of payment of rent by money orders may, as the Board indicate, with advantage be further examined. The more general use of printed forms of receipt in payment of rents is very satisfactory and should be in every useful way promoted.

19. Instructions have now been issued by the Board defining the classes of cases which should be shown in the returns as compromised and disposed of without trial. The discrepancies noted in last year's review reappear in the present statistics. For the current year the returns will be based on one and the same principle.

20. The average duration of contested cases was high in the following districts: Jaunpur, 2 months 6 days; Gházipur, 2 months 4 days;

Ballia, 3 months 13 days; Azamgarh, 2 months 5 days. Ballia is considerably worse than last year, when it was noted that the average duration of 2 months 16 days in that district was high. The Board are requested to make the reasons of this long duration in each instance, and especially in that of Ballia, the subject of special inquiry.

21. Applications show a net decrease of 2,479, *viz.*, from 147,324 to 144,845, which is spread over all divisions except Meerut and Agra. There was an increase of 884 applications under class VI, enhancement of rent. In Bulandshahr, where in some important properties the relations between landlords and tenants have been, and still are, very strained, on the close of settlement operations, applications for enhancement of rent rose from 464 to 1,640. It is satisfactory that in Gorakhpur and Basti the readjustment of rent has generally been effected without recourse to the Courts.

22. The returns of ejectments for the last two years are compared in the annexed table:—

Applications under—	*Number.*			Percentage of increase and decrease.	Remarks.
	1889-90.	1890-91.	Increase and decrease.		
Section 35, class XVIII ...	17,340	17,862	+ 522	3·0	To eject tenants with rights.
Section 36, do. XIX ...	59,809	57,875	— 1,934	3·2	To eject tenants-at-will.
Section 39, do. XX ...	16,630	16,851	+ 221	1·3	To contest liability to ejectment.
Section 40, do. XXI ...	36,821	36,259	— 562	1·5	By landlord for assistance to eject.
Total ...	1,30,600	1,28,847	— 1,753	1·3	

The total area in acres which was affected by notices to eject was—

	Total areas which were effected by notices to eject.		Percentage of—
	1889-90.	1890-91.	
Section 35	122,791	122,897	·08 increase.
Section 36	262,331	282,508	7·6 increase.

23. Applications to eject tenants with rights increased by 3 per cent., though the area affected was practically the same as last year. Applications were most numerous in Benares (1,532), Ghazipur (1,498), Allahabad (1,268), Budaun (1,094), Bulandshahr (873), the same districts as were prominent in this respect last year. Ejectment actually took place in 38·68 per cent. of the cases concerning which notices were issued as compared with 36·0 per cent. in 1889-90 and 32·84 of the previous year. The law on this subject is thoroughly understood by the tenants, and it may be safely assumed that none would allow themselves to be ejected if they were able to raise sufficient money to discharge the decree. A continuous rise in the percentage of actual ejectments

points to increasing difficulty on the part of the best class of tenants in meeting their engagements. The area from which ejectment actually took place was 43,553 acres, but notwithstanding the large number of ejectments which are made every year, the area held by tenants with rights continues to increase, and, as shown in the figures at page 40 of your report, has risen in one year by 128,686 acres from 9,938,301 to 10,006,987 acres. The increase is most conspicuous in the Meerut and Gorakhpur Divisions, and is there chiefly due to the revision of the settlement record, as has been remarked by the Director of Land Records and Agriculture.

24. There was a decrease of 3·2 per cent. in the number of applications for the ejectment of tenants-at-will, though the area affected by the notices was 7·6 per cent. greater than in 1889-90. The Board draw atention to the remarks of the Collector of Meerut on the great difficulty of disposing of all contested cases before the end of May. Under the present law the latest date for handing in the application to the Tahsíldár is the 31st March in each year. The landholders have it in their power to apply at any date after 1st January, but they appear to delay their applications until the last few days of March. A return showing the number of applications filed in the tahsíls for each fortnight between 1st January and 31st March would be useful. Such a return should show whether there is any real necessity for an amendment of the law and for fixing the latest date for application a month earlier than at present.

25. The duration of contested and uncontested applications, shown at page 44, is in some cases excessive. In Etáwah, Mirzapur, Jaunpur and Gházipur measures should be taken to expedite the disposal of contested cases.

26. The figures in paragraph 54 of the Board's report show that the Revenue Courts had 247,366 suits and applications for disposal, of which they disposed of 230,021 cases during the year. The pending file has risen from 16,623 to 17,345, or almost the figure at which it stood in 1888-89. In Bulandshahr the pending file has increased from 806 to 2,044. Of these cases 1,561 are applications for enhancement of rent, and special measures are required to ensure that these cases are disposed of in the coming cold weather. The duration of contested applications in this district is also somewhat prolonged.

27. The Lieutenant-Governor has noticed with interest the statements (now prepared for the first time) of applications by tenants to serve notice of relinquishment on the landholder, and of applications by a distrainer for sale of property. The large number of relinquishments in the districts of the Allahabad Division and in Moradabad demand further inquiry. These statistics will gain enhanced value when the statistics of previous years are available for comparison, and in the course of inquiry additional light will be thrown on the state of agriculture and the condition of tenants.

28. The appellate work of Collectors was heaviest in Azamgarh, Gházipur and Gorakhpur. Etah is the only district which shows a

very large pending file (59 cases); a matter which needs inquiry, the results of which should be reported to the Government. The average duration of appeals rose from 1 month 2 days to 1 month 5 days. The duration was longest in Azamgarh, Etah and Benares.

29. There were 1,514 appeals for disposal by Judges, of which 602 were pending at the end of the year, and of these 280 had been on the file for over 3 months. The average duration of appeals disposed of by Judges was abnormally high: being 7 months as compared with 5 months and 9 days in 1889-90. The duration was highest in Saháranpur—16 months and 4 days; Muzaffarnagar 17 months and 23 days; Bulandshahr and Meerut over 12 months; Mainpuri and Etawah over 15 months; Benares 20 months. These figures without explanation are very far from satisfactory, and will be brought to the notice of the High Court.

30. In the Courts of Commissioners 3,689 appeals were filed as compared with 3,564 in the previous year. Of these 1,000 were transferred to Collectors, and at the close of the year 1,246 cases were pending against 1,611 pending at the close of 1889-90. Forty-eight cases only were pending more than 3 months. The Lieutenant-Governor has noted with satisfaction that the Commissioner of Benares hopes in future to dispense with the necessity of transferring appeals to Collectors.

A perusal of Appendix B VII A, Abstract A, would seem to show that the procedure of Commissioners in disposing of appeals varies in different divisions. A Commissioner is authorised to reject an appeal either summarily or on perusal of the record. If the appeal be not rejected, a date for the hearing, of which notice is given to the parties, is fixed. While the Commissioner of Allahabad rejected 8 appeals and the Commissioner of Rohilkhand 25 only, in Meerut 216 appeals were rejected, in Agra 437, in Benares 408, in Gorakhpur 253; and in the last two divisions 503 appeals were summarily rejected without perusal of the record. These figures should be brought to the notice of Commissioners. It cannot be supposed that the character of this appellate litigation varies much from district to district, or that the grounds of appeal differ much, if at all, from year to year. There seems no sufficient reason for the varying procedure. Cases no doubt occur in which a Commissioner after perusal of the record will deem it unjust to allow the respondent to be troubled further in the suit; but the Lieutenant-Governor agrees with the Board that when an appeal is not rejected on some preliminary point, such as limitation, and when the grounds of appeal warrant the calling for the record, the appeal should ordinarily be decided in open Court in presence of the parties.

31. The total number of cases disposed of by the Board increased from 2,121 to 3,351: while the pending file at the close of the year was 232 cases against 605 at the close of 1889-90. The thanks of Government are due to the Board for the attention given to their judicial duties.

32. There is a decrease in the total number of processes, but an increase in the total arrears for the realisation of which coercive measures were employed. The increase in writs and arrests is mainly attributable to the substitution of legal for illegal and irregular methods of collection. In the districts of Gorakhpur, Basti and Gházipur the Collectors exercised a wise discretion, under the circumstances of the season, in not enforcing absolute punctuality of payment. In Basti especially, notwithstanding the unfavourable season, the postponment of the demand and the comparative absence of coercion, the whole of the enhanced revenue assessed at the recent revision of settlement was collected within the year. Exclusive of the Agra Division, the conditions of which are abnormal, the statistics of processes show pressure of the revenue in the Azamgarh, Cawnpore and Aligarh Districts. Seventy per cent. of the arrests and 42 per cent. of the cases of distress of moveable property in the Province belong to Azamgarh. In Cawnpore cases of attachment of moveables increased from 219 to 469, and although in only 30 cases sale took place, yet the number of attachments points to want of assets. In the tahsils of Aligarh, which suffered from floods, it was necessary to grant large suspensions of revenue and the arrears were collected with difficulty. These three districts especially demand the attention of their Collectors. The enhanced land revenue of the late settlements in Basti, Saháranpur and Bulandshahr was collected, it is noticed, without difficulty.

Coercive processes. Paragraphs 66 to 72.

33. The Board note the diminished use made of the power of attachment of the land of a defaulter under section 154, Act XIX of 1873. In many districts, and among them Gorakhpur and Basti, this process was not employed at all. The large number (54) which occurred in Jaunpur were attachments of mahâls belonging to the Rájá of Jaunpur made as a preliminary to the annulment of settlement. It is only in exceptional cases that the process is of value as a means of recovering arrears of revenue. Its utility mainly consists in the opportunity which it gives to a Collector of ascertaining the real condition of an estate with a view to the adoption of ulterior measures, either remedial or of severer coercion.

34. Not much comment is called for by the statistics of transfers. Settlement operations disturb the district returns, cases of transfer being brought at once by the Settlement Officer into the revised record. In Gházipur the large decrease in succession cases is due to the record being made for the mahál instead of for the mauza. The incidence of penalties levied under section 100, Act XIX of 1873, seems to vary from district to district in greater proportion than the amount of the fees payable under section 96 of the Act. The law permits a penalty not exceeding five times the amount of the proper fee. In some districts, as in Aligarh, the full penalty appears to be generally imposed, but in the majority of districts less than the full penalty is taken. The difficulty of realising these penalties is referred to, and the Board are disposed to think that no fees should be levied in cases in which the mutations having been duly reported by those concerned, the land revenue or annual

Transfers. Paragraph 73.

value of the transferred property is less than Rs. 50. No remedy has been suggested for the difficulty of realising penalties; and the Government will be prepared to consider further any proposal which the Board have to make in this regard.

Partitions. Paragraph 74.

35. Partition work has improved since last year, and 221 more partitions were actually carried out. There has been a decrease of 146 in the number of applications filed. The Basti District shows a marked advance, but the pending file of the Gorakhpur Division is still very heavy. In the Meerut and Muzaffarnagar Districts; in Cawnpore, Fatehpur and Allahabad of the Allahabad Division, and in all districts of the Rohilkhand Division the Commissioners' personal attention to this branch of the work is much needed.

The employment of competent amíns at fixed salaries in partition work is engaging the Board's attention, and the Government will be glad to receive at the proper time further information on the progress of this experiment.

Advances under the Land Improvement Loans Act. Paragraphs 75 and 76.

36. The number and amount of applications for advances under the Land Improvement Act, though larger than in 1889-90, are yet considerably below the figures of preceding years. The existence of settlement operations undoubtedly disinclines landholders from applying for advances. The Lieutenant-Governor agrees in the opinion of the Commissioner of Allahabad, which is quoted by the Board, that the benefit of the Act is mainly intended for the smaller landholders who, while willing to improve their property, possess little or no capital. Such men must perhaps be sought out and encouraged, but if the Collector is known to take a personal interest in extending improvements, his Tahsíldárs will follow his example, and applicants will no doubt come forward. As remarked by the Commissioner of Benares, coparcenary bodies of independent small co-sharers will not agree to carry out in combination works of benefit common to all. This cause hinders applications in the Benares and Gorakhpur Divisions. The Board may have observed what can be done in this regard by the active interest of the District Officer in the case of the district of Hardoi in Oudh under the administration of Colonel Horsford.

Economic history of the Provinces. Paragraph 86.

37. The need of improved road communication is the chief point brought forward in the reports on the economic history of the districts. The construction of railways has created a want for new feeder roads. During the past year Rs. 75,000 have been granted for roads in Lalitpur, but mainly in order to combat future outbreaks of dakáiti. Roads are required in Hamírpur, and in the Rohilkhand and Gorakhpur Divisions improved communications are, as they have always been, much needed. In Aligarh a number of bridges remain to be constructed or rebuilt. Now that the Province has been largely provided with railroads, and that schemes for water-supply and drainage in the principal

towns have received due assistance from Provincial revenues, larger grants will be available for communications; which, with works of drainage and reclamation of agricultural tracts, must be regarded as having the strongest claim at present on the Provincial balances, and which are essential to the proper working of the many lines of rail with which the Province is furnished.

Settlement operations. Paragraphs 87 to 92.

38. In Saháranpur settlement operations proper were concluded last year, and Mr. Holmes, the Collector, who was placed in charge in January 1891, has, with the assistance of a Deputy Collector, successfully disposed of the large amount of case work, original and appellate, which remained to be dealt with after the departure of the Settlement Officer, and deserves the acknowledgment which the Board record of his success in dealing with this matter.

In Muzaffarnagar settlement operations have also been completed. The inspection and assessment of the area which remained was finished by Mr. Miller, and the assessment of the Ganges khádir, which resulted in a small net reduction, has now been passed by the Board.

From Jhánsi assessment reports for the whole district have been received and are under the consideration of the Board. The final operations will be carried out under the supervision of Mr. Meston, to whom Mr. Impey after the close of the year made over charge.

In the Kumaun Bhábar it is expected that Mr. C. H. Roberts will complete the work of revision during the current year. Twenty-two settled and 142 khám villages remain to be dealt with. The revision will, it is anticipated, give an increased rent-roll of Rs. 38,000.

In Garhwál it has been decided that the cadastral survey shall be limited to the southern pargánas. The orders of the Government of India on the assessment rules, referred to in paragraph 92 of your report, have been received and communicated to the Board. The present scarcity in Garhwál may probably interfere with settlement work: Mr. Partridge, the Deputy Commissioner, being fully occupied in administrative duties.

Patwáris and kánúngos. Paragraphs 93 to 101, and report of the Director of Land Records and Agriculture.

39. Further progress has been made in carrying out the scheme for the rearrangement of patwáris' circles and the revision of patwáris' pay schedules. There remain three districts, Bánda Saháranpur and Muzaffarnagar, in which schemes are under consideration. In Bijnor the rearrangement of circles has been sanctioned, but the scheme will not be introduced till the present settlement of the district expires. The Director notes that in the western districts the emoluments enjoyed in the past by the patwáris are larger than elsewhere in the Province, that their position in the village economy is more respected and responsible, and that a higher standard of living prevails. In the revision of the pay schedules of Muzaffarnagar and Saháranpur due regard should be paid to these considerations. The object of the revision is

to apportion fairly both work and pay, and to ensure a fair salary to every patwári. Care must be exercised lest under the guise of equality the salaries of patwáris in various parts of the Province become in reality unequal.

The patwáris and assistants who have still to receive instruction amount to 11·88 per cent. of the total staff, and in Basti is extravagantly high. The Commissioner of Gorakhpur should give his immediate and best attention to this matter in conjunction with the Director of Land Records and Agriculture. The number (including candidates) who received instruction during the year amounted to 3,283, but the percentage of students who passed, varying from 95 per cent. in Gházipur to 10 per cent. in Bijnor, is sufficient evidence, even without the remarks of the Collectors, that neither the standard of examination nor the character of the teaching is uniform throughout the Province. It is satisfactory to find that the advantages of these schools are appreciated by patwáris' heirs, and reduction of the fee from Re. 1 to 8 annas a month will increase the number of such students. The experiment (instituted at Etáwah of opening patwári classes at the tahsíli schools) should be watched, and can only be pursued with the entire approval and support of the Educational authorities. The establishment (recently decided on) of an agricultural school at Cawnpore will further assist the training of kánúngos experimentally started at that place during the year of report.

The number of candidates other than heirs should not exceed the number for whom there is reasonable prospect of employment. In some districts, notably Gorakhpur, the number of outside candidates seems to be inconveniently large.

The percentage of patwáris resident in their circles has fallen from 86 to 85 owing mainly to the disturbance caused by revision of circles. There is marked retrogression in Bulandshahr, Fatehpur, Lalitpur, Jaunpur, Ballia and Gorakhpur, and the matter should receive the attention of the Collectors of those districts.

The punctuality with which the village papers were filed, notwithstanding the calls on the time of patwáris and kánúngos of census and settlement work, is creditable to the staff.

The accuracy of the village papers as regards the record of rental demands was the subject of special inquiry during the year. The conclusion arrived at was that, while in particular estates and tracts fraudulent understatement of rent probably occurred, yet as a rule the rent-rolls were sufficiently accurate for practical purposes.

The difficulty however noted in paragraph 43 of last year's review—that of obtaining a correct record of actual realisations of rent—still remains. According to the figures furnished the percentage of collections to current demand is 82, but this figure is the one matter regarding which the patwáris' returns are most untrustworthy. The experiment which was tried in two tahsíls, of inviting the landholders to file at the tahsíl lists of their collections, has not been attended with success.

The landlords still prefer to adjust their rent accounts without the intervention and presence of the patwári, and no satisfactory means have yet been found to ensure that the patwári shall be informed of all payments.

40. In conclusion I am to convey the thanks of the Lieutenant-Governor to the Board for their efficient administration and for a full and interesting report; and, through the Board, to the Divisional and District Officers, whose work has, as usual, been well carried out in a year of more than ordinary difficulty.

I have the honor to be,

SIR,

Your most obedient servant,

J. J. D. LATOUCHE,

Chief Secy. to Govt., N.-W. P. and Oudh.
